

CONTENTS

Introduction	1
H. Kikuchi	

1. COSMIC DUSTY PLASMAS

1.1 Cosmic Dusty Plasmas: Some Recent Results	1
D. A. Mendis, M. Rosenberg, and V. W. Chow	
1.2 Parametric Excitation of the Low-Frequency Oscillations in the Dusty plasma of Planetary Rings	23
P. V. Bliokh and V. V. Yaroshenko	
1.3 Spokes in the Saturn's Ring as Solutions in Dusty Plasma	29
P. V. Blikoh, S. I. Khankina, and V. V. Yaroshenko	
1.4 Effects of the Charged Dust in a High Energy Electron Beam	33
M. Niimura and H. Amemiya	
1.5 Plasma Tail and Dust Tail of Comets	55
T. Saito, Y. Kozuka, K. Saito, and S. Minami	
1.6 CRRES PlasmaWave Observations during Quiet Times, during Geomagnetic Disturbances, and during Chemical Releases	73
R. R. Anderson	

2. LABORATORY DUSTY PLASMAS: THEORY AND EXPERIMENT

2.1 Coherent Structures in Low-Temperature Dusty Plasmas	97
P. K. Shukula and N. N. Rao	
2.2 Electron-Free Plasma	111
H. Amemiya	
2.3 Measurement of Electric Charge of Dust in a Plasma	123
T. Tuziuti and Y. Nakamura	

2.4 Effects of Intersteller Neutral Wind on the Structure of the Heliosphere - Laboratory Simulation	129	5. LIGHTNING DISCHARGES AND LABORATORY SIMULATION		
S. Minami		5.1 A New Model of Lightning	285	
3. METEOROLOGICO-ELECTRIC ENVIRONMENT AND EHD				
3.1 EHD and EHMD Transport Processes in Dusty and Dirty Plasmas	139	5.2 Acoustic-based Real Time Reconstruction of Lightning Discharge Channel Using Parallel Processing	295	
H. Kikuchi		K. Nakamura, T. Manik, and K. Horii		
3.2 The Mechanism of Electrohydrodynamic Wind Generation in a Lower Atmosphere	149	5.3 Forecast of Winter Thundercloud of by Frequency Analysis of Atmospheric Pressure	305	
A. Watson and J. S. Chang		N. Takeuchi, K. Narita, and Y. Goto		
3.3 Verhulst Dynamics and Fractal Streching of Transition Layer Vorticity	163	5.4 Fundamental Experiments Concerning Laser Triggered Lightning ...	313	
G. C. Dijkhuis		D. Wang, Y. Shimada, S. Uchida, E. Fujiwara, Z-I. Kawasaki, K. Matsuura, Y. Izaka, and C. Yamanaka		
3.4 The state of Matter FIELD and Its Property - A New Basic Approach to the Understanding of Terrestrial and Extraterrestrial Electromagnetic Environment	177	6. ATMOSPHERIC ELECTRICITY AND NOISE		
S. Alfasi and S. Ipavec		6.1 Jet Stream Electrodynamics	323	
4. SELF-ORGANIZATION AND TURBULENCE				
4.1 Self-Organization Processes in Turbulent Atmosphere and Methods for Their Study	197	6.2 Fading Patterns on on the Sonagram of Atmospherics	329	
A. A. Lazarev and S. S. Moiseev		S. Yano, T. Ogawa, H. Hagino, and K. Kawakami		
4.2 Studying of Helical Turbulence Self-Organization Based on 3D-Generation of Hasegawa-Mima Equation	211	6.3 Mobility Distributions and Mass Distributions of Atmospheric Ions near the Ground	341	
N. S. Erokhin, W. Horton, and S. S. Moiseev		K. Nagato and T. Ogawa		
4.3 Quantum Aspects of Self-Organization in Dynamically Random Systems	225	7. MAGNETOSPHERIC NOISE AND PULSATIONS		
A. A. Berezin		7.1 Local Time Dependence of Wave Characteristics of Pi2 Pulsations Observed at Synchronous Orbit	347	
4.4 Self-Organization in Plasmas	241	H. Takeuchi, T. Saito, and H. Matsuoka		
N. Bekki		7.2 Solar Cycle Variation of Local Time Dependence in Frequency of Occurrence of Pi2	369	
4.5 Plasma Maser in Turbulent Media	249	Y. Kozuka, T. Saito, H. Takeuchi, and T. Takahashi		
M. Nambu		7.3 Magnetospheric VLF Waves Observed by DE-1	379	
4.6 A Statistical Theory of Turbulence	265	T. Ondan and Y. Nakamura		
Y. Kaneda		7.4 The Experimental Results of triggering Chorus Emissions from Monochromatic Wave Components in the Hiss Band in the Outer Magnetosphere	395	
4.7 Two-Time Fourier Convolution Theorem and Its Applications	273	K. Hattori, M. Hayakawa, D. Lagoutte M. Parrot, and F. Lefevre		

7.5 A New Direction Finding Method of Magnetospheric VLF/ELF Radio Waves Using the Linear Regularization and Generalized Cross Validation	405	M. Yamaguchi, K. Hattori, N. Iwama, and M. Hayakawa	10.4 Pre-Earthquake Ionospheric Effects and their Possible Mechanisms	545
			S. A. Pulinet, A. D. Legen'ka, and V. A. Alekseev	
8. PLANETARY AND SOLAR NOISE AND PLASMAS			10.5 Plasma-Based Particle Acceleration	559
8.1 Non-Auroral Lights on Jupiter's Dark Side	415	J. W. Warwick	Y. Nishida	
8.2 Venus Plasma Noise Studies: A Lesson from Flawed Analysis and Interpretation	421	H. A. Taylor, Jr.	11. BALL LIGHTNING AND MICROWAVE DISCHARGES	
8.3 Beaming Geometry of the Io-Related Decametric Radiation	435	K. Maeda	11.1 A Novel Method to Induce Atmospheric Microwave Discharges by Moderate Powers	569
8.4 Yohkoh Observations from the Onset of Several Flares	435	R. D. Bentley and Yohkoh Team	M. Kando	
8.5 Plasma Corona and Dust Corona of the Sun	449	T.Saito, S.-I. Akasofu, Y. Kozuka, S. Minami, and S. Tuneta	11.2 Nature of Fireballs Produced by Microwave Interference	577
			Y. H. Ohtsuki and H. Ofuruton	
9. GALACTIC NOISE AND PLASMAS			11.3 Considerations of Internal Mechanism of Ball Lightning - Based on the simulation experiment of damages on the tree which were seemed to be produced by ball lightning	581
9.1 An Overview of Observations with X-Ray Astronomy Satellite GINGA	477	F. Makino	Y. Nagai	
9.2 X-Ray Emission from Compact X-Ray Sources and the Dust near or surrounding the Sources	487	M. Matsuoka	Index	589
9.3 A Systematic Study of Dense Cloud Cores and Star Formation	493	A. Mizuno and Y. Fukui		
10. FLUCTUATIONS, CHAOS, RECONNECTION, AND ACCELERATION				
10.1 Chaos in Plasmas: A Case Study in Thermionic Discharges	501	A. Piel, F. Greiner, T. Klinger, H. Klostermann, and A. Rohde		
10.2 Fluctuational and Intermittent Chaos: Wave-Turbulent and Wave-Fluctuation Amplification Processes in Geophysical Hydrodynamics	523	V. A. Buts, P. I. Kolykhlov, S. S. Moiseev, and V. G. Pungin		
10.3 Electric Reconnection and Chaos in Dusty and Dirty Plasmas	535	H. Kikuchi
