TABLE OF CONTENTS

Foreword ix

List of Sponsors of the Workshop xi

Preface 1

Part I. Review Articles

Transitions between Spatio-Temporal Patterns in Non Equilibrium Systems
D. Walgraef 5

Galilean and Relativistic Nonlinear Wave Equations: An Hydrodynamical Tool?
M. Abid, M. Brachet, F. Debbasch and C. Nore 33

Part II. Instabilities and Pattern Formation

Chaotically Induced Defect Diffusion
P. Coullet and K. Emilsson 55

Pattern Formation and Phase Turbulence in the Transverse Section of Lasers
G. Huyet and S. Rica 63

Long Wavelength Oscillatory Instability in Binary Fluids
T. Clune, M.C. Depassier and E. Knobloch 75

Multiple Front Propagation in a Potential Non-Gradient System
M. San Miguel, R. Montagne, A. Amengual and E. Hernández-García 85

Pattern Selection and Diffusive Instability
M'F. Hilali, S. Métens, G. Dewel and P. Borckmans 99

Monotonic Fronts of the Reaction-Diffusion Equation in one Space Dimension
R.D. Benguria and M.C. Depassier 105

Poiseuille Flux of Hard Particles: Theory and Simulations
D. Risso and P. Cordero 111

Stationary Convection due to Resistivity and Viscosity in a Cylindrical Plasma with a Free Boundary
L. Gomberoff 119

Ginzburg-Landau Equations for Oscillatory Convection in Oldroyd-B Fluids
J. Martinez-Mardones, R. Tiemann and W. Zeller 129

Laser Model with Periodic External Injected Signal and Noise: Small Net Gain Limit
R.C. Buceta, M.S. Torre and H.F. Ranea-Sandoval 137

Flow Transitions in Rayleigh-Bénard Convection: Influence of Heating Rate
R. Hernandez 145

Part III. Stochastic Effects

Noise Induced Phase Transitions
J.M.R. Parrondo and C. Van den Broeck 157

Competitive Coexistence in Biological Systems: Exact Analytical Results through a Quantum Mechanical Analogy
H.S. Wio, M.N. Kuperman, B. Von Haeften, M. Bellini, R.R. Deza and C. Schat . . 167

Effects of Disorder on Reaction-Diffusion Systems: An Analytical Approach
M.A. Rodriguez 183

Concerning the Noise Strength in Periodically driven Pattern Convection
M.O. Cáceres 193

Quasi-Stationary Distribution and Gibbs Measure of Expanding Systems
P. Collet, S. Martínez and B. Schmitt 205

Detailed Balance and Reversed Process for Macroscopic Systems
F. Barra, M. Clerc, C. Huepe and E. Tirapegui 221

Part IV. Statistical Mechanics and Applications

Substantial Irreversibility in Quantum Cosmology
M. Castagnino, F. Gaioli and D. Sforza 233

Generalized Spectral Decompositions for a Class of One-Dimensional Chaotic Maps
D.J. Driebe and H.H. Hasegawa 247

Two-Photon Micromaser: From Trapping to Ideal Sqeezed States
M. Orszag, L. Roa and R. Ramirez 259

Thermodynamic Instabilities in Quantum Liquids
E.S. Hernández 273

Construction of Hamiltonian Structures for Dynamical Systems from Scratch
S.A. Hojman 281

Part V. Granular Matter

A Visit of Granular Matter
E. Guyon and J.-P. Troadec 291

A Dissipative Model for Parametric Waves in Granular Materials
E. Cerda and F. Melo 299

Simple Models for Fragmentation
G. Hernández, H.J. Herrmann and H. Nakanishi 313

Part VI. Short Communications

Chaos and Three-Frequency Resonances in a Dynamical System
S. Blanco, D. Gonzalez, O.A. Rosso and F. Sportolari 329

Shape Transition in a Two-Dimension System of Bubbles
V.A. Kuz 335

Nonlinear Behavior and Trapped Dynamics in the Micromaser
E. Lazo, J.C. Retamal and C. Saavedra 339

Analytical Study of the Codimension Two Bifurcations of the New Lorenz System
A.C. Sicardi Schifino and C. Masoller 345

A New Basis of Wavelets for Studying Three Periodic Attractors
A. Figliola and E. Serrano 349

Trehalose in Solution and Its Interaction with Water and Biological Structures. Molecular Dynamics Simulation
M.C. Donnamaria and J.R. Grigera 359

Subject Index 365
