

CONTENTS

PREFACE <i>R. White</i>	v
AVANT-PROPOS / FOREWORD	vii
RÉSUMÉ	ix
COLOUR PLATES	x
1. SELF-ORGANISATION AND STATISTICAL PROPERTIES OF FLUID AND PLASMA TURBULENCE	1
W. Horton Coherent structures in plasma turbulence <i>(invited paper)</i>	2
C.F. Driscoll, K.S. Fine, X.P. Huang, T.B. Michell and B.P. Cluggish Vortices and turbulent relaxation in magnetized electron columns <i>(invited paper)</i>	19
N. Kukharkin, S. Orszag and V. Yakhot Spontaneous generation of coherent vortices and long-range order in 2-D turbulence <i>(invited paper)</i>	30
F.J. Øynes, H.L. Pécseli and K. Rypdal Fluctuations in a magnetized toroidal plasma without rotational transform <i>(invited paper)</i>	46
J.C. Bowman, B.A. Shadwick and P.J. Morrison Spectral reduction for two-dimensional turbulence <i>(invited paper)</i>	58
S. Im, E.J. Powers and I.S. Park Applications of higher-order statistical signal processing to nonlinear phenomena <i>(invited paper)</i>	74

G. Theimer, M. Endler, L. Giannone, H. Niedermeyer and ASDEX team Individual event analysis : a new tool for the investigation of structures in turbulence	89
K. Saeki Formation of coupled electron hole and ion soliton in a collisionless plasma	93
N. Chakrabarti, A. Sen, P.K. Kaw and A.K. Sundaram Ballooning vortices in plasmas with sheared field and flow	97
T. Klinger, A. Latten, A. Piel, T. Pierre and G. Bonhomme Experimental study of transition phenomena from regular to turbulent drift waves	101
C. Sandoz, M. Antoni and Y. Elskens Numerical study of turbulence in N-body hamiltonian systems with long range force - II Structures	105
P. Sosenko Quasiparticle invariants and constraints on energy transfer	111
W. Horton and S. Benkadda Turbulence and coherent structures (<i>summary of the working group</i>)	122
M. Endler Statistical analysis of turbulence fluctuation data (<i>summary of the working group</i>)	136
2. CHAOTIC DYNAMICS AND TRANSPORT	141
V.K. Mel'nikov On the existence of self-similar structures in the resonance domain (<i>invited paper</i>)	142
A.I. Neishtadt, D.L. Vainshtein and A.A. Vasiliev Diffusion of adiabatic invariant and chaotic advection in a confined incompressible Stokes flow (<i>invited paper</i>)	154

V. Rom-Kedar Some characteristics of two degrees of freedom Hamiltonian flows (<i>invited paper</i>)	164
Ph. Ghendrih, A. Grosman and H. Capes Theoretical and experimental investigation of ergodic divertor operation on Tore Supra (<i>invited paper</i>)	179
D. Bénisti and D.F. Escande Origin of diffusion in hamiltonian dynamics	194
B. Weyssow Diffusion of guiding centres due to a stochastic magnetic field and a two- state stochastic acceleration. (<i>invited paper</i>)	201
E. Vanden Eijnden and R. Balescu Subdiffusive behavior in sheared magnetic configurations	205
J.H. Misguich, M. Vlad, F. Spineanu and R. Balescu Diagram of collisional regimes for particle diffusion in a stochastic magnetic field	209
M. de Rover, A. Montvai, N.J. Lopes Cardozo and F.C. Schüller Magnetic topology in a tokamak due to current filaments	213
A. Montvai Degree of destruction of magnetic surfaces and plasma transport in a tokamak	218
J.P. Bizarro and J.S. Ferreira Lower-hybrid ray stochasticity induced by magnetic ripple	222
J.T. Mendonça and L. Oliveira e Silva Finite webs in Minkowski space: a covariant formulation of the problem of a charged particle in a perpendicular electrostatic wave	226

D.L. Vainshtein, A.I. Neishtadt and L.M. Zelenyi The regular and stochastic motion of charged particles in the earth magnetotail	230
G. Figueira, J.T. Mendonça and L. Oliveira e Silva Discrete Fermi mapping for photon acceleration in a time varying plasma cavity	237
F. Brini, G. Turchetti and A. Bazzani Action and tune diffusion for hamiltonian systems with a modulated linear frequency	241
M.M. Skoric, M.S. Jovanovic, M.R. Rajkovic and M. Kono Spatio-temporal intermittency and chaotic stimulated Raman backscattering	245
J. Mendanha Dias and J.T. Mendonça Observation of harmonic bifurcation route to turbulence in an air jet by collective light scattering	249
3. TURBULENT TRANSPORT IN PLASMAS	253
G.R. Tynan On the origins of tokamak edge turbulence and the H-mode transition (<i>invited paper</i>)	254
E. Sánchez, C. Hidalgo, M.A. Pedrosa, R. Balbín, I. García-Cortés, T. Estrada and B. van Milligen On the statistical properties of turbulent transport in TJ-I Tokamak and TJ-IU Torsatron (<i>invited paper</i>)	264
S. Parker, J.V. Kepner, W.W. Lee, H.E. Mynick, W.M. Tang, M. Artun and V. Decyk Gyrokinetic simulation studies of transport barriers (<i>invited paper</i>)	271
B. Scott Toroidal computation of drift wave turbulence and transport (<i>invited paper</i>)	283

H. Lütjens and J.F. Luciani Numerical simulation of moderate-n ballooning modes in tokamaks (<i>invited paper</i>)	299
D.E. Newman, B.A. Carreras and P.H. Diamond Sandpile dynamics as a paradigm for turbulent transport (<i>invited paper</i>)	307
H. Sugama and W. Horton Neoclassical and anomalous transport in weakly turbulent toroidal plasmas (<i>invited paper</i>)	322
L. Guiziou and X. Garbet Correlation lengths of electrostatic turbulence	337
A. Latten, T. Klinger, A. Piel, T. Pierre and G. Bonhomme Experimental investigation of fluctuation-induced radial transport due to drift wave turbulence	341
W.X. Ding, T. Klinger and A. Piel Observation of chaotic fluctuation-induced transport in a magnetized discharge plasma	345
4. DIAGNOSTICS OF TRANSPORT AND THEIR CONFLICTING INTERPRETATIONS	349
R.V. Bravenec Effects of finite sample volumes on fluctuation measurements (<i>invited paper</i>)	350
N.J. Lopes Cardozo, C.J. Barth, M.N.A. Beurskens, C.C. Chu, J. Lok, F. van der Loo, A. Montvai, A.A.M. Oomens, M. Peters, F.J. Pijper, M. de Rover, F.C. Schüller, M. Steenbakkers and RTP team Experimental access to the topology of the magnetic field in a tokamak ; measurements of plasma filamentation in RTP (<i>invited paper</i>)	358

C. Watts, R.L. Gandy, D.L. Brower, G. Cima, Y.Y. Karzhavin, J.W. Heard and A. Ouroua Comparison of results from core fluctuation diagnostics on TEXT-U	373
F. Clairet, P. Devynck, C. Laviron, P. Moreau, M. Paume, F. Gervais, P. Hennequin, A. Quéméneur and A. Truc Local density fluctuation dependencies in TORE SUPRA tokamak L mode plasmas	377
L. Colas, X.L. Zou, M. Paume, J.M. Chareau, M. Guiziou, G.T. Hoang and D. Grésillon Parametric analysis of internal magnetic fluctuations in the TORE SUPRA tokamak	381
P.P. Sosenko, N. Maafa and D. Grésillon Fluctuations and electromagnetic wave scattering in low-frequency oscillating magnetized plasma	385
5. WAVE-PARTICLE INTERACTION	401
K. Akimoto Phase transition of Langmuir turbulence and disappearance of weak and strong turbulence regimes in strong magnetic fields	402
D. Guyomarc'h, F. Doveil, Y. Elskens and D. Fanelli Warm beam-plasma instability beyond saturation	406
B.R. Ragot Nonlinear dynamics of wave-particle interaction in the case of a wide spectrum, and diffusivity	411
P. Chaix and N. Piovela An instability of high currents beams	418
List of participants	423
Author Index	431
