

# CONTENTS

|   |     |
|---|-----|
| Preface   | vii |
| Reduction of N-Body Dynamics to Particle-Wave Interaction<br>in Plasmas   | 1   |
| <i>M. Atoni, Y. Elskens and Dominique F. Escande</i>  |     |
| Microscopic Description of Langmuir Waves Revisited<br>through Classical Mechanics                                    | 18  |
| <i>Dominique F Escande, S Zekri and Y. Elskens</i>  |     |
| Turbulent Transport of Diluted Impurities   | 27  |
| <i>M. Ottaviani</i>   |     |
| Nonlinear Coherent Structures in Open Strongly Non-Equilibrium<br>Vlasov Plasma Systems                               | 40  |
| <i>Yurii S. Sigov and Vadim D. Levchenko</i>  |     |
| Object-Oriented Plasma Model (Code Sur)   | 55  |
| <i>Vadim D. Levchenko and Yurii S. Sigov</i>  |     |
| Numerical Quasilinear Study of Collisionless Relaxation of a<br>Diffuse Electron Beam Injected into Plasma Half-Space | 70  |
| <i>Yurii S. Sigov and Dmitrii E. Tamarkin</i>   |     |
| Stochastic Computer Simulation of Nonequilibrium Media  | 84  |
| <i>Galina I. Zmievskaia</i>   |     |
| From Kinetic Equation to Clausius Inequality  | 99  |
| <i>V. G. Molinari and F. Pizzio</i>   |     |
| Spatial Equilibrium Distribution Function of a Degenerate Gas<br>in an External Field                                 | 110 |
| <i>V. G. Molinari and D. Mostacci</i>   |     |
| A Monte Carlo Code for Photon Transport in Plasma-Derived<br>X-Ray Evaluations  | 123 |
| <i>A. Tartari, J. Felsteiner and C. Bonifazzi</i>   |     |

|   |     |
|---|-----|
| The Cascade-Exciton Approach to Nuclear Reactions<br>(Foundation and Achievements)<br><i>S. G. Mashnik and S. A. Smolyansky</i>                                   | 137 |
| Charged Particle Self-Interactions<br><i>Erkki J. Brändas</i>   | 160 |
| Local Diffusion Properties of the Standard MAP<br><i>G. Turchetti, A. Bazzani, R. Cesari and S. Siboni</i>  | 178 |
| Solution of the Liouville Propagation Equation and the<br>Symmetric Split Operator Technique<br><i>L. Giannessi and A. Marranca</i>                               | 193 |
| Results for an Integro-Differential Equation Arising in a<br>Radiation Evolution Problem<br><i>G. Dattoli, S. Lorenzutta, G. Maino, D. Tocci<br/>and A. Torre</i> | 202 |
| Free Electron Lasers: The Turbulent Regime<br><i>P. Chaix</i>   | 222 |
| Author Index  | 229 |
