CONTENTS

1. Molecular Dynamics and Monte–Carlo Simulations

Numerical Simulation of Strongly Coupled Binary Ionic Plasmas
H. DeWitt, W. Slattery & G. Chabrier 1

Path Integral Monte–Carlo Simulation of Hydrogen Plasma
C. Pierleoni, W. R. Magro, D. M. Ceperley & B. Bernu 11

Geometrically-Based Density Functional Theory of Strongly Coupled Plasma Mixtures 27
Y. Rosenfeld

Wave Packet Molecular Dynamics Simulation of Matter under Extreme Conditions 37
D. Klakow, H. Matuszok, P.-G. Reinhard & C. Toepffer

Molecular Dynamic Simulations of Strongly Coupled Plasmas 45
G. Zwicknagel, C. Toepffer & P.-G. Reinhard

2. Thermodynamic Properties

Correlation Functions and Thermodynamics of Partially Ionized Nonideal Plasmas 49
W. Ebeling, D. Beule, A. Förster & M. Kasch

Weakly Relativistic Plasmas at Equilibrium 59
A. Alastuey & W. Appel

Wigner–Kirkwood Quantum Corrections to the Pair Distribution Function in a One-Component Plasma 66
M.-M. Gombert & D. Leger

Algebraic Tails of Static Correlations in Quantum Plasmas 70
F. Cornu

The Equation of State of Hydrogen Plasma by Orbital Free Molecular Dynamics 78
J. I. Penman, J. G. Clérouin & G. Zérah

Equation of State of the Weakly Degenerate Multi Component Plasma 82
J. Riemann, M. Schlanges, H. E. DeWitt & W. D. Kraeft

Compressibility, Grüneisen Coefficient and Specific Heat for Adiabatic Exponents of Strongly Coupled Plasmas 87
W. Stolzmann & M. Rösler

Numerical Studies of Exchange and Correlation for the Compressibility, Grüneisen Coefficient, Specific Heats, and the Adiabatic Gradient 91
M. Rösler & W. Stolzmann

Electronic Correlations for Strongly Coupled Plasmas 95
W. Stolzmann & T. Blöcker

New Precise Interpolation Formulas for the Excess Internal Energy of the Classical One-Component Plasma Fluid 99
T. Kahlbaum

Model of Interaction in Overlapping Atomic Structure 103
A. Likalter & H. Schneidenbach

Thermodynamical Analysis of High-Temperature Media with Strong Interparticle Interactions 107
V. A. Dubovitskij, Yu. G. Krasnikov & G. A. Pavlov

3. Critical Phenomena and Dusty Plasmas

Universal Critical-Like Features of Coulumb Systems 109
B. Jancovici

Experimental Study of Lead Thermodynamics at Near Critical Point Parameters 119
V. Ya. Ternovoi, V. E. Fortov, A. S. Filimonov, S. V. Kvitov, M. E. Lebedev & D. N. Nikolaev

Experiments with Strongly-Coupled Dusty Plasmas 125
J. Goree

Effective Potential, Overscreening and Minimal Charge for Crystallization of the Macroions in Colloidal Systems 129
P. P. J. M. Schram & S. A. Trigger

The Melting Transition of the Plasma Crystal 135
A. Melzer, A. Homann & A. Piel

Two-Body Correlations and the Underlying Phase Transitions in Bilayers 139
V. I. Valtchinov, G. Kalman & K. B. Blagoev

Phase Transition in Simplest Plasma Models 145
I. L. Iosilevski & A. Yu. Chigvintsev

4. Kinetic Theory

Kinetic Description of the Second Order Phase Transitions in Dense Gases and Plasmas 149
Yu. L. Klimontovich

Stopping Power, Friction, and Self-Diffusion 165
J. E. Dufty & M. Berkovsky

Influence of Many-Particle Effects on Stopping Power 177
M. Bonitz, D. C. Sott, D. Kremp, S. Kosse, W. D. Kraeft & M. Schlanges

Kinetic Equation in First Order Retardation Expansion 181
Th. Bornath, D. Kremp, W. D. Kraeft & M. Schlanges

Memory Effects in Two-Particle Collisions 185
M. Bonitz, D. C. Sott, R. Binder, D. Kremp, W. D. Kraeft & H. S. Köhler

Population Kinetics of Dense Hydrogen Plasmas 189
R. Prenzel, M. Schlanges, Th. Bornath & D. Kremp

Relaxation of Chemical Composition and Temperature in Nonideal Partially Ionized Plasmas 193
T. Ohde, M. Bonitz, Th. Bornath, D. Kremp & M. Schlanges

Nonequilibrium Composition of Nonideal Plasmas in High Electric Fields 197
V. Rietz, Th. Bornath, M. Schlanges & D. Kremp

5. Transport Properties

Electric Conductivity of Non-Ideal Plasma 201
I. T. Iakubov

Electrical Conductivity Measurements in Copper Plasmas 216
A. W. DeSilva

Electrical Conductivity of a Partially-Ionized Dense Hydrogen Plasma 222
M. Belmir, J. M. Museux, B. Bernu & J. Wallenborn

First-Principles Calculation of Liquid Metal Structure 228
J. Chihara & S. Kambayashi

Electrical Conductivity Measurements of Strongly Coupled Al-Plasmas 234
I. Krisch, E. Schmieder & H.-J. Kunze

Electrical Resistivity Measurements of a Dense Aluminum Plasma 240
J. F. Benage, Jr., W. R. Shanahan & M. S. Murillo

Conductivity and Cross Sections in Alkali Plasmas 244
J. Starzynski, R. Redmer & M. Schlanges

Wigner Approach to Plasma Electrical Conductivity 248
V. S. Filinov

The RPA Conductivity of Two-Components Fully Ionized Plasma 254
A. A. Mihajlov, V. M. Adamyan, Z. Djurić, I. M. Thacheno & A. M. Ermolaev

Effective Potentials and Transport Properties of a Strongly Coupled Hydrogen Plasma 257
F. B. Baimbetov, T. S. Ramazanov, Kh. T. Nurekenov, M. A. Bekenov & K. N. Dzhumagulova

Metal-Nonmetal Transition in Hydrogen Plasma 261
H. Reinholz, R. Redmer & S. Nagel

Electrical Conductivity of High Density Argon Plasmas Generated by Ballistic Gas Compression 265
H. J. Kusch, F. Lässig & U. Groth

Transport Processes in Low Temperature Plasma with Strong Interparticle Interactions 269
G. A. Pavlov

6. Spectral Lines, Optical Properties

Advances in the Theory of the Dynamic Stark Broadening of Hydrogen and Hydrogen-Like Lines in Dense Plasmas 272
E. Oks

Bound States in Strongly Coupled Plasma. Optical Properties 278
A. S. Kaklyugin & G. E. Norman

Hydrogenic Ion Lines Emitted from Dense Plasmas 282
S. Günter & A. Könies

Exact Solution for the Impact Broadening of Hydrogen Spectral Lines 286
A. Derevianko & E. Oks

On Exact Solutions for the Impact Broadening of Hydrogen and Hydrogen-Like Spectral Lines 292
A. Derevianko & E. Oks

One-Particle Spectral Function for Electrons in the Solar Core Plasma 297
A. Wierling & G. Röpke

Self-Energy and Spectral Function — An Approach to Single-Particle Energies and Thermodynamics in Dense Plasmas 301
R. Fehr & W. D. Kraeft

X-Ray Absorption Edge in Dense Coulomb Systems: One-Body Theory and Extension to Finite Temperature 305
J. Ortner

Two-Particle Bound States and Resonances in Dense Plasmas 309
H. Haberland, W. D. Kraeft, M. Schlanges & D. O. Gericke

Interparticle Correlations and Dense Noble Gas Plasma Spectra 313
Yu. I. Kurilenkov, L. G. D'yachkov, M. A. Berkovsky & Y. Vitel

7. Beam Plasma Interaction and Shock Compression

The Generation of Non-Ideal Plasma by Shock Compression of High-Porous SiO_2-Aerogel 317
V. E. Fortov, A. S. Filimonov, V. K. Gryaznov, D. N. Nikolaev, V. Ya. Ternovoi & N. Keeler

A Study of Debris Clouds from Laser Induced Shock Waves 322
Z. Henis, B. Arad, S. Eliezer, Y. Horowitz, A. Ludmirsky, S. Maman, E. Moshe & M. Werdiger

Intense Light Ion Beam Matter Interaction Experiments on KALIF 331
K. Baumung, H. Bluhm, L. Buth, B. Goel, P. Hoppé, H. U. Karow, G. Meisel, D. Rusch, O. Stoltz, J. Singer, G. J. Kanel, A. V. Utkin, S. V. Razorenov & O. Yu. Vorobjev

Nonideal Plasma of Ar and Xe in Shock Waves 337
M. Kulish, V. Gryaznov, A. Mezhiba, V. Mintsev, V. Fortov, D. H. H. Hoffmann, C. Stöckl, H. Wetzler, M. Dornik, W. Laux, B. Sharkov & A. Golubev

Experimental and Theoretical Investigation of Strongly Coupled Cathode Microplasma 343
V. A. Skvortsov & N. Vogel

Calculation of Porous Metal Hugoniots 351
V. K. Gryaznov, V. E. Fortov & I. L. Iosilevski

Plasma Diagnostics by Fast Heavy Ion Beams 357
H. Wetzler, C. Stöckl, W. Seelig, J. Jacoby & D. H. H. Hoffmann

Nonlinear Dynamics of Semicrystalline Beams of Charged Particles 361
V. A. Skvortsov & P. V. Milyutin

Heavy Ion Beam Driven Plasma in Solid Rare Gas Crystals 365
M. Dornik, W. Laux, P. Spiller, M. Stetter, S. Stöwe, W. Seelig, C. Stöckl, W. Süß, H. Wetzler, V. Dubenkov, B. Sharkov, A. Filimonov, M. Kulish & D. H. H. Hoffmann

The Equation of State of High Density Argon Plasmas Generated by Ballistic Gas Compression 369
H. J. Kusch, S. O. Schapals & U. Groth

8. Magnetic Fields and Trapped Particles

Magnetic Field Effects and Plasma Ionization Balance 373
J. C. Weisheit

Edge Effects in Magnetoplasmas 381
L. G. Suttorp

Observation of Long-Range Order in Trapped Ion Plasmas by Bragg Scattering 387
J. N. Tan, J. J. Bollinger, B. Jelenkovic, W. M. Itano & D. J. Wineland

Correlation Effects on Static and Dynamic Properties of Nonneutral Plasmas 397
D. H. E. Dubin

9. Collective Phenomena in Strongly Coupled Plasmas

Collective Excitations in Correlated Superlattices 409
K. I. Golden, L. Miao & G. Kalman

Dielectric Response and Momentum Distribution of the Degenerate Plasma of Charged Bosons 419
S. Moroni, S. Conti & M. P. Tosi

The Local Field of the Electron Gas 429
G. Senatore, S. Moroni & D. M. Ceperley

Plasma Waves in Strongly Coupled Electron-Ion Plasmas 435
A. S. Kaklyugin, G. E. Norman & A. A. Valuev

Diffusion of Electron Currents by Ion Acoustic Turbulence Driven by the Current Itself 441
C.-V. Meister & I. Kubyshkin

Model of Local Currents Caused by Neutral Winds in Weakly-Ionized Plasmas 446
C.-V. Meister & V. A. Liperovsky

Frequency Moments of the Quadratic Response and the Three-Point Correlation 450
J. M. Rommel & G. Kalman

List of Participants 455
