

CONTENTS

| | |
|---|-----------|
| Preface | xi |
| Introduction | |
| A. BLAAUW: Oort in Memoriam | xv |
| Chapter 1: Are the Disk and Halo Axisymmetric? | |
| J.J. BINNEY: Should the Outer Milky Way be Axisymmetric? .. | 1 |
| M.D. WEINBERG: The Shape of the Disk: Clues from the Kinematics of Disk Stars | 11 |
| H.-W. RIX: The Shapes of Dark Halos | 23 |
| J.A. SELLWOOD: The Axisymmetric Stability of the Milky Way | 31 |
| C. PRITCHET, S. VAN DEN BERGH: Faint Surface Photometry of the Halo of M31 | 39 |
| S.M. KENT: A Survey of Surveys | 47 |
| U. HAUD: Ellipticity of Outer Regions of Galactic Disks | 57 |
| J.E. RHOADS: Near Infrared Star Counts as a Probe of Asymmetries in the Galaxy's Disk | 59 |
| Chapter 2: Is the Milky Way a Barred Spiral Galaxy? | |
| E. DWEK: Morphology of the Galactic Bulge from COBE DIRBE Observations | 61 |
| K. KUIJKEN: Is There a Bulge Distinct from the Bar? | 71 |
| O.E. GERHARD: Dynamics of the Bar at the Galactic Centre .. | 79 |
| B. PACZYŃSKI, <i>et al.</i> : Results from the Optical Gravitational Lensing Experiment (OGLE) | 93 |
| K.Z. STANEK, <i>et al.</i> : Evidence for the Galactic Bar from the Two Color Photometry of the Bulge Red Clump Stars | 103 |

| | |
|--|-----|
| R.D. BLUM, <i>et al.</i> : M Giant Kinematics in Off-axis Fields between 150 and 300 PC from the Galactic Center | 111 |
| S. DEGUCHI, <i>et al.</i> : Results of the SiO Maser Survey of the Galactic Bulge IRAS Sources | 119 |
| R. FUX, <i>et al.</i> : 3D N-Body Simulations of the Milky Way | 125 |
| F. COMBES: Comparison with External Galaxies Dynamics ... | 133 |
| B.J. WEINER, J.A. SELLWOOD: Properties of the Galactic Bar from Hydrodynamical Simulations | 145 |
| K. WADA, <i>et al.</i> : Position-Velocity Diagrams as a Probe of the Bar in Edge-on Galaxies | 147 |
| Chapter 3: What is the Nature of the Center of the Galaxy? | |
| C.H. TOWNES: Is There a Compact Central Mass Concentration in our Galaxy? | 149 |
| H. FALCKE: What is Sgr A*? | 169 |
| L.M. OZERNOY, R. GENZEL: Is Sgr A* Underfed, Underefficient, or Underdone ? | 181 |
| L. OZERNOY: Recurrent Starbursts or Intermittent Starburst/AGN Phenomena at the Galactic Center ? | 189 |
| D.C. BACKER: Diameter and Proper Motion of Sgr A* | 193 |
| W.J. DUSCHL, H. LESCH: The Radio Spectrum of Sgr A* | 199 |
| M.G. BURTON: Evolution in the Nucleus | 205 |
| H.M. LEE: Dynamical Evolution of Galactic Center Star Cluster and Importance of Stellar Collisions | 215 |
| R.D. BLUM, D.L. DEPOY, K. SELLGREN: A Comparison of Near Infrared Spectra of the Galactic Center He I Emission Line Sources and Early Type Mass Losing Stars | 225 |
| D. GEZARI, E. DWEK, F. VAROSI: Mid-Infrared Imaging of the Galactic Center | 231 |
| A.M. FRIDMAN, <i>et al.</i> : Mini-Spiral at the Galactic Center: a Link between its Structure and the Value of a Central Point Mass | 241 |
| M. MORRIS: What are the Radio Filaments near the Galactic Center? | 247 |
| E. SERABYN: The Nature of the Galactic Center Arc | 263 |
| F. YUSEF-ZADEH, <i>et al.</i> : The Nature of the Scattering and Faraday Screens Toward the Galactic Center | 271 |
| D. SCHAEItER: The Galactic Center Star Cluster: Normal Evolution!? | 279 |
| M. LINDQVIST, <i>et al.</i> : C ¹⁸ O and HNCO in the Galactic Centre | 281 |

| | |
|--|-----|
| D.T. JAFFE, R. PLUME, S. PAK: Two New Views of the Galactic Center | 283 |
| E.J.A. MEURS: Possible Evidence for a Binary Massive Black Hole in the Galactic Nucleus | 285 |
| Chapter 4: Is there a Consistent Picture of the Inner kpc of the Milky Way? | |
| K. KOYAMA, Y. MAEDA: The Hot Gas in the Galactic Bulge .. | 287 |
| H.S. LISZT, W.B. BURTON: Motions and Deformations of the Inner-Galaxy Neutral Gas Layer | 297 |
| P.J. BOYCE, R.J. COHEN: A Survey of OH in the Galactic Centre Region | 311 |
| H.J. HABING: Stellar Populations in the Galactic Bulge | 317 |
| D. MINNITI: Metallicity, Structure and Kinematics of the Milky Way's Bulge | 329 |
| R.-J. DETTMAR: Galactic Bulges as an Evolutionary Phenomenon | 335 |
| H. IZUMIURA: Observational Properties of SiO Masers in the Galactic Bulge IRAS Sources | 341 |
| D.A. LEVINE, M. MORRIS: Report on a Survey of H ₂ O Masers Towards the Galactic Center | 343 |
| M.N. SEVENSTER, <i>et al.</i> : Dynamical Properties of Galactic OH/IR Stars | 345 |
| M. SCHULTHEIS, <i>et al.</i> : Semiregular Variables in the Galactic Bulge | 347 |
| P. VAUTERIN, H. DEJONGHE: Instabilities of Uniformly Rotating Disks | 349 |
| W. DEHNEN: F(E,L _z) for Kent's Model of the Galactic Bulge .. | 351 |
| Chapter 5: How Did the Milky Way Form? | |
| J.E. NORRIS: The Age Structure of the Older Parts of the Galaxy | 353 |
| F. MATTEUCHI: Is the Dynamical History at odds with the Chemical History? | 367 |
| S. VAN DEN BERGH: Globular Clusters and the Formation of the Galactic Halo | 381 |
| I.F. BIKMAEV, <i>et al.</i> : Chemical and Dynamical History of the Milky Way | 389 |
| M. SAMLAND, G. HENSLER: The Metal Pre-Enrichment of the Galactic Disk: Solving the G-Dwarf Problem | 395 |
| R.M. RICH: Did the Bulge Form All at Once? | 402 |
| P. WHITELOCK: Late-Type Giants in the Bulge, at High Galactic Latitudes and in the Plane | 411 |

| | |
|--|-----|
| W.J. SCHUSTER, C. ALLEN: Effects of Chaos in the Galactic Halo | 419 |
| Y. KAN-YA, <i>et al.</i> : The Velocity Dispersion in the Cold Collapse | 423 |
| T. TSUJIMOTO, <i>et al.</i> : The Chemodynamical Evolution of Spheroidal Systems and the Resultant Stellar Abundance Distribution Function | 425 |
| R. BUSER, J. RONG: Metallicity Structures of the Milky Way .. | 427 |
| M. SAMLAND, G. HENSLER: The Formation of the Galactic Bulge | 429 |
| B. FUCHS, C. DETTBARN, R. WIELEN: The Scatter of Metallicities of Stars in the Solar Neighbourhood | 431 |
| A.M. FRIDMAN, <i>et al.</i> : Different Laws of Increasing of Stellar Dispersion | 433 |
| M.G. LEE: UBV CCD Photometry of an old Open Cluster AM-2 | 435 |

Chapter 6: How are we to Understand the Large Scale Structure of the ISM?

| | |
|---|-----|
| H. BLOEMEN: What do Gamma Rays tell us about the ISM?: New Insight from the Compton Observatory | 437 |
| W.B. BURTON, <i>et at.</i> : HI in the Milky Way | 447 |
| D.T. JAFFE: How Important is Neutral Carbon to an Understanding of the Dense Interstellar Medium? | 469 |
| A. FERRARA: Why is the HI Scale Height Constant with Galactocentric Radius? | 479 |
| J.M. DICKEY: The Z Velocity Dispersion of Outer HI Disks .. | 489 |
| H. OKUDA, <i>et al.</i> : Diffuse [CII] Emission in the Galaxy | 497 |
| S. MALHOTRA: Vertical Equilibrium of HI in the Galactic Disk .. | 499 |
| S. SAKAMOTO, <i>et at.</i> : Physical Conditions of Molecular Gas in the Galaxy | 501 |
| A.M. FRIDMAN, <i>et at.</i> : Does a Rotation Velocity Jump Generate the Outer Spiral Structure? | 505 |
| P.A. PATSIS, P. GROSBOHL: Dynamics of Thick Spirals | 507 |
| D.J.D. EARN: Potential-Density Basis Sets for Three-Dimensional Disks | 509 |
| H. DEJONGHE, <i>et al.</i> : The Dynamics of Planetary Nebulae in the Galaxy: Evidence for a Third Integral | 511 |
| B. CHEN, <i>et al.</i> : The Existence of Moving Groups and the Disk Heating Problem | 513 |
| M. WAHDE, K.J. DONNER, B. SUNDELIUS: The Influence of Velocity Dispersion on Dynamical Friction in Stellar Discs | 515 |

| | |
|--|-----|
| X. ZHANG: On the Spiral-Induced Nonlinear Dissipative Process to the Evolution of the Galactic Disk | 517 |
| E. GRIV: Stability of a Collisionless Stellar Disk | 519 |
| E. GRIV: Stability of a Collisional Galactic Disk | 521 |
| L.P. OSSIPKOV, S.A. KUTUZOV: Galactic Orbits of Different Galactic Population Objects | 523 |
| M. MORENO, J. TORRA, E. OBLAK: Local Variations of the Velocity Ellipsoid | 525 |
| J. ANOSOVA, <i>et al.</i> : Escape Velocities from Unstable Triple Stars | 527 |
| J. ANOSOVA, <i>et al.</i> : Hierarchical and Non-Hierarchical Triples | 529 |
| L. KISELEVA, J. ANOSOVA: Criteria of Dynamical Isolation of Binaries and Multiples | 531 |

Chapter 7: How are we to Understand the Small Scale

Structure of the ISM?

| | |
|--|-----|
| C.J. LADA: The Unsolved Problem of Stellar Origins | 533 |
| B.G. ELMEGREEN: What do we really know about Cloud For- mation? | 551 |
| J. BRAND, J.G.A. WOUTERLOOT: Far-Outer Galaxy Molecu- lar Clouds | 561 |
| W.T. REACH: Far-Infrared Spectral Observations of the Galaxy by the Far-Infrared Absolute Spectrophotometer | 567 |
| E.J. DE GEUS, J.A. PHILLIPS: The Search for Cold Molecular Gas in the Outer Galaxy | 575 |
| J. PALOUŠ: How does Star Formation Affect the Large Scale Structure of the ISM? | 583 |
| A. WHITWORTH: The Structure of the Neutral Interstellar Medium: A Theory of Interstellar Turbulence | 591 |
| A.M. FRIDMAN, <i>et al.</i> : Are there Giant Vortices near Solar Circle? | 597 |
| B.P. WAKKER, <i>et al.</i> : Distance and Metallicity of HVCs | 605 |
| S.J. CAREY, K.N. MEAD, M.L. KUTNER: Molecular Mass Dis- tribution in the Outer Galaxy | 607 |
| B.M. DEISS, A. JUST: A Hydromagnetic Model for the Hierar- chical Structure of Molecular Clouds | 609 |
| A.J. GREEN, <i>et al.</i> : Galactic Fine Structure at 843 MHz | 611 |
| S.J. PETUCHOWSKI, C.L. BENNETT: Neutral Gas Contribu- tions to [S II] Galactic Background Emission | 613 |

| | |
|--|-----|
| V.R. SHOUTENKOV: Study of the Magnetic Field of the Galaxy using Correlation Functions of the Intensity of Synchrotron Background Radio Emission | 615 |
| C. CAPPA DE NICOLAU, <i>et al.</i> : HI Bubbles around NGC 6888 | 617 |
| C. CAPPA DE NICOLAU, <i>et al.</i> : Search for HI Bubbles around WR Stars: WR 149 | 619 |
| S. EHLOEROVÁ, <i>et al.</i> : GS64-01-97: Expanding Supershell in the Milky Way | 621 |
| L.G. BALÁZS, P. ÁBRAHÁM: Multi-Wavelength Study of the Giant Bubble in Cepheus | 623 |
| A.M. BYKOV: Non-Thermal Particles near OB Associations | 625 |
| N. JUNKES: G54.4-0.3 – Multi-Frequency Investigation of an SNR in Interaction with the ISM | 627 |
| R.H. RUBIN, <i>et al.</i> : HST Spectroscopy of the Orion Nebula | 629 |
| Chapter 8: How do we put it together? | |
| P.L. SCHECHTER: How ought one Parameterize the Milky Way? | 633 |
| K.C. FREEMAN: Does Our Galaxy have a Massive Dark Corona? | 645 |
| A. GOULD: Mass near the Sun | 651 |
| F. PONT, <i>et al.</i> : Outer Disc Rotation from Cepheid Variables | 661 |
| F.D.A. HARTWICK: Where Does the Galaxy End? | 669 |
| A.C. ROBIN, M. CRÉZÉ, V. MOHAN: How do the Stellar Disc and Thick Disc Stop? | 681 |
| B. FUCHS, <i>et al.</i> : Proper Motion Study of the Galactic Rotation Curve | 689 |
| B. DAUPHOLE, <i>et al.</i> : The Mass Distribution of the Milky Way Deduced from Globular Cluster Dynamics | 697 |
| D.M. PETERSON, D. SLOWIK: The Rotation Curve from A-F Supergiants | 703 |
| R. BUSER, J. RONG: The Structural Parameters of the Milky Way | 707 |
| S. NINKOVIĆ: A System of Galactic Constants Based on Stellar Dynamics | 709 |
| S.A. KUTUZOV: Estimation of Galactic Model Parameters by Interval Method | 713 |
| Subject Index | 715 |
| Object Index | 723 |
