

# Contents

<b>1</b>	<b>Mechanism of stimulated radiation ...</b>	<b>5</b>
1.1	Spontaneous Radiation . . . . .	5
1.2	Single-particle stimulated process . . . . .	8
1.3	Collective Stimulated Processes . . . . .	12
1.4	Anomalous And Normal Doppler Effects . . . . .	15
1.5	Stimulated Cyclotron Radiation . . . . .	19
1.6	The Mechanisms Of Non-linear Stabilization ... . . . .	22
<b>2</b>	<b>Linear theory of interaction of the ...</b>	<b>29</b>
2.1	Dispersion Equation Of Linear Theory . . . . .	29
2.2	Single-particle Cherenkov Radiation ... . . . .	38
2.3	Boundary value problem and ... . . . .	42
2.4	Transverse Inhomogeneous System ... . . . .	46
2.5	Wave Amplification in the Dielectrical ... . . . .	51
<b>3</b>	<b>Non-linear theory of wave ...</b>	<b>57</b>
3.1	Asymptotic Non-linear Equations . . . . .	57
3.2	Numerical Simulation of Non-linear Dynamics ... . . . .	62
3.3	The Plasma Waveguide With High ... . . . .	65
3.4	Amplification of Oblique Waves ... . . . .	68
<b>4</b>	<b>Theory of plasma-beam time ...</b>	<b>73</b>
4.1	Initial-Boundary Problem . . . . .	73
4.2	Space-Time Modulation ... . . . .	79
4.3	Theory of UHF Plasma Oscillator . . . . .	80
4.4	Cable Wave Plasma Oscillator . . . . .	84
<b>5</b>	<b>Three waves processes ...</b>	<b>91</b>
5.1	Classification of Three Wave ... . . . .	91
5.2	Non-linear Equations ... . . . .	96

5.3	Field Expansion-Linear ...	102
5.4	Non-linear Dynamics ...	107
5.5	Field Expansion-Cubic Non-linearity ...	109
5.6	Relativistic Equations ...	113
<b>6</b>	<b>Non-linear theory of radiative ...</b>	<b>119</b>
6.1	Stabilization Mechanisms ...	119
6.2	Resonance Buneman Instability ...	122
6.3	Path Expansion Technique ...	127
6.4	Momentum Expansion Technique ...	137
6.5	Space Charge Waves ...	139
6.6	Distribution Function ...	146
<b>7</b>	<b>Stimulated radiation of straight ...</b>	<b>153</b>
7.1	Radiation in Periodical ...	153
7.2	Electrostatic Free Electron Lasers ...	159
7.3	Efficiency of UHF Sources ...	166
<b>8</b>	<b>Beam radiation in a finite ...</b>	<b>171</b>
8.1	Helicon's Radiation in the Regime ...	171
8.2	Gas of Relativistic Oscillators ...	182
8.3	Theory of Gyrotron ...	190
<b>9</b>	<b>Radiation of unmagnetized ...</b>	<b>201</b>
9.1	Non-linear Cherenkov Radiation ...	201
9.2	Stimulated Scattering ...	210
9.3	Stimulated Radiation ...	215
<b>10</b>	<b>Nonradiative beam instabilities</b>	<b>223</b>
10.1	Vacuum Limit Current ...	223
10.2	Limit Current of Neutralized Beams ...	226
10.3	Non-linear Dynamics of Pierce Instability ...	230
10.4	Beam Instabilities in a Finite ...	234
