The subject matter in the *Encyclopedia of Applied Physics* is presented in approximately 500 individual articles, arranged alphabetically. The topics can be classified into 20 sections, similar to the AIP Physics and Astronomy Classification Scheme (PACS):

General Aspects: Mathematical, Computational, and Information	11	Condensed Matter B: Thermal, Acoustic, and Quantum Properties
Techniques	12	Condensed Matter C: Electronic
Measurement Science, General		Properties
Devices and/or Methods	13	Condensed Matter D: Magnetic
Nuclear and Elementary Particle		Properties
Physics	14	Condensed Matter E: Dielectrical
Atomic and Molecular Physics		and Optical Properties
Electricity and Magnetism	15	Condensed Matter F: Surfaces
Optics (classical and quantum)		and Interfaces
Acoustics	16	Materials Science
Thermodynamics and Properties	17	Physical Chemistry
of Gases	18	Energy Research and
Fluids and Plasma Physics		Environmental Physics
Condensed Matter A: Structure and Mechanical Properties	19	Biophysics and Medical Physics
	20	Geophysics, Meteorology, Space
		Physics, and Aeronautics
	Computational, and Information Techniques Measurement Science, General Devices and/or Methods Nuclear and Elementary Particle Physics Atomic and Molecular Physics Electricity and Magnetism Optics (classical and quantum) Acoustics Thermodynamics and Properties of Gases Fluids and Plasma Physics Condensed Matter A: Structure	Computational, and Information Techniques 12 Measurement Science, General Devices and/or Methods 13 Nuclear and Elementary Particle Physics 14 Atomic and Molecular Physics Electricity and Magnetism 15 Optics (classical and quantum) Acoustics 16 Thermodynamics and Properties 17 of Gases 18 Fluids and Plasma Physics Condensed Matter A: Structure 19

Each article has been assigned a code number consisting of two digits which denotes the section, and a letter which gives the type of article. There are six types: A = Devices, Equipment; B = Materials; C = Methods, Processes; D = Phenomena, Effects; E = Scientific or Technological Fields; F = Institutions, Companies, Societies and other organizations.
