

CONTENTS

Preface	1
<i>Section 1. Comets</i>	
First Results from the Energetic Particle Analyzer (EPONA) on the Giotto Extended Mission during P/Grigg-Skjellerup Encounter	5
<i>S. M. P. McKenna-Lawlor, P. W. Daly, E. Kirsch, D. O'Sullivan, A. Thompson, K.-P. Wenzel and V. Afonin</i>	
Comparison of the Halley and Giacobini-Zinner Plasma Environments	9
<i>M. A. Lee</i>	
Cometary Shocks	21
<i>A. A. Galeev and I. Kh. Khabibrakhmanov</i>	
Physics of the Cometary Shock	31
<i>G. P. Zank, F. M. Neubauer and I. Kh. Khabibrakhmanov</i>	
Interplanetary Effects at the Time of Suisei's and Giotto's Encounter with Comet Halley	45
<i>M. Tátrallyay, M. I. Verigin, I. Apáthy, A. P. Remizov and I. Szemerey</i>	
Comet Halley's Plasma Environment during the Encounter by Giotto	53
<i>K. Altwegg, H. Balsiger, R. Goldstein and M. Neugebauer</i>	
Diffusion of Cometary Pick-up Ions on Bispherical Characteristics	61
<i>D. E. Huddleston, A. D. Johnstone and A. J. Coates</i>	
Pitch-Angle Diffusion Coefficient for Cometary Ions Near Comet Halley	65
<i>K. Kecskeméty, T. E. Cravens, G. Gévai, P. Kapoor, P. Puhl and K. Schwingenschuh</i>	
Pitch Angle Scattering of Cometary Ions Due to MHD Turbulence Generated by Obliquely Propagating Nonlinear Magnetosonic Waves	69
<i>K. M. Srivastava, B. T. Tsurutani and B. E. Goldstein</i>	
Modulation of Plasma Instabilities Near Comet Halley by MHD Waves	75
<i>Yu. M. Mikhailov</i>	
The Effect of Discontinuities in the Solar Wind on the Plasma Tails of Comets	81
<i>R. Wegmann, H. Rauer and H. U. Schmidt</i>	
A Magnetohydrodynamic Model of a Comet	85
<i>C. J. Lindgren and T. E. Cravens</i>	

Analysis of Comet Halley's Heavy Ion- and Micro-Dust Fluxes and Discussion of Possible Acceleration Processes

89

*E. Kirsch, S. McKenna-Lawlor, A. Thompson, D. O'Sullivan, A. Korth,
R. Schwenn and K.-P. Wenzel*

Low Energy Ions in Comet Halley's Mystery Region

93

A. J. Coates, A. D. Johnstone and D. E. Huddleston

The Cometary Diamagnetic Cavity Boundary and Inner Shock

99

K. R. Flammer

The Cometopause as a Multifluid Combustion Shock

105

I. Kh. Khabibrakhmanov and G. P. Zank

Explanation and Modeling of the Pronounced Decline in Energetic Particle Flux Intensities (Observed Range – 100–300 KEV) Recorded by the EPONA and Tunde-M Instruments on Giotto and Vega-1 on Approaching the Cometopause of Comet P/Halley

109

S. M. P. McKenna-Lawlor and M. Verigin

Current Layers in a Cometary Environment

113

*H. Laakso, T. Aggson, J. Slavin, R. Grard, A. Pedersen and
K. Schwingenschuh*

The Dominance of Positive and Negative Heavy Water Cluster Ions in the Inner Coma of Active Comets

121

J. F. Crifo

Ion Glow in Halley Comet

131

V. Guineva, P. Stoeva, R. Werner and St. Spasov

Investigation of Halley Comet's Jets using Data from the Three-Channel Spectrometer on Board of the Vega-2 Interplanetary Station

135

R. Werner, V. Chr. Guineva, P. Vl. Stoeva and St. Spasov

Doppler-Velocity Measurements of H_2O^+ -Ions in the Plasma Tail of Comet Levy 1990XX

139

H. Rauer and K. Jockers

Fabry-Perot Techniques of Observing Cometary Plasmas

143

D. Schultz

Section 2. Planetary Satellites

Io's Interaction with the Plasma Torus

149

J. A. Linker

The Velocity Distribution Functions of Oxygen and Sulphur Ions in the Io
Plasma Torus

159

M. Banaszkiewicz and W.-H. Ip

Titan's Magnetospheric Interaction: From Plasmoids to Aurora

165

W.-H. Ip

A Time-Dependent Model of Suprathermal Electrons at Titan

171

L. Gan, T. E. Cravens and C. N. Keller

The Role of Triton in Neptune's Magnetosphere

177

A. F. Cheng and R. B. Decker

Dust–Plasma Interactions in the Environments of Solar System Bodies of
Negligible Intrinsic Magnetization

187

D. A. Mendis and M. Horanyi

Section 3. Venus

A Two-Dimensional MHD Model of the Solar Wind Interaction with the
Venus Ionosphere

199

H. Shinagawa

Numerical Simulation of the Bow Shocks Near Comets and Planets

203

A. S. Lipatov

Scenario of Solar Wind Interaction with Venus and Mars

207

W. I. Axford and T. K. Breus

On the Source of Upstream Whistlers in the Venus Foreshock

217

D. S. Orlowski, C. T. Russell, D. Krauss-Varban and N. Omidi

ULF Waves in Venus Upstream Region: Critical Test for Two-Fluid Model

229

D. S. Orlowski, C. T. Russell, D. Krauss-Varban and N. Omidi

On the Cause of Distant Bow Shock Encounters

241

C. T. Russell, T. L. Zhang and J. G. Luhmann

Electron Acceleration Above the Dayside Ionopause of Non Magnetic Bodies

247

K. Szegö, A. F. Nagy, V. D. Shapiro and V. I. Shevchenko

VLF Emissions at the Venus Dayside Ionopause

253

G. K. Crawford, R. J. Strangeway and C. T. Russell

On the Venus Ion Magnetotail Structure

259

M. Verigin, J. G. Luhmann and C. T. Russell

On the Compressibility of the Magnetic Tails of Mars and Venus <i>K. I. Gringauz, M. Verigin, J. G. Luhmann, C. T. Russell and J. Mihalov</i>	265
Charging of Venus Clouds and Lightning Discharges <i>R. N. Singh</i>	271
Section 4. Mars	
The Solar Wind Interaction with Mars: Phobos-2 Bow Shock Observations on 24 March 1989 <i>J. Slavin, M. Verigin, K. Gringauz, G. Kotova, S. Stahara, J. Spreiter, W. Riedler, K. Schwingenschuh, H. Rosenbauer and S. Livi</i>	279
Upstream Regions at Mars <i>S. Barabash, R. Lundin and O. Norberg</i>	285
Termination of the Solar Wind Proton Flow Due to Charge Exchange Effect Near Mars <i>W.-H. Ip, T. K. Breus and T. Zarnowiecki</i>	291
Bi-Ion Sound Layer as Flow Boundary at Solar Wind–Mars Interaction <i>K. Sauer, K. Baumgärtel, Th. Roatsch and J. F. McKenzie</i>	295
Observations of Molecular Ions in the Martian Plasma Environment <i>O. Norberg, S. Barabash and R. Lundin</i>	299
ASPERA Observations of the Momentum Transfer in the Boundary Layers of Mars <i>R. Lundin, O. Norberg, S. Barabash and E. Dubinin</i>	305
ASPERA Observations of Martian Magnetospheric Boundaries <i>R. Lundin, E. Dubinin, S. Barabash and O. Norberg</i>	311
Selected Wave and Plasma Features of the Martian Environment <i>R. Grard, A. Skalsky and J. G. Trotignon</i>	321
Dynamics of Bi-Ion Plasma Interaction: Relevance to Phobos Events <i>K. Baumgärtel and K. Sauer</i>	329
Author Index	333
