

CONTENTS

Preface	vii
-------------------	-----

Acknowledgments	ix
---------------------------	----

CHAPTER 1 PLANETARY ATMOSPHERES

1.1 Formation and Evolution of Planetary Atmospheres	1
1.2 The Structure of the Terrestrial Atmosphere	5
1.3 The Temperature of the Neutral Atmosphere	10
1.4 The Escape of the Atmospheric Gases	14
1.5 The Atmospheres of the Planets	19
1.6 Bibliography	25

CHAPTER 2 THE IONOSPHERE

2.1 Introduction.	28
2.2 The Chapman Layer Theory	30
2.3 The Plasma Frequency	36
2.4 Collision Frequency and Absorption	42
2.5 The Structure of the Ionosphere and the Plasmasphere	46
2.6 Regular and Irregular Variations of the Ionosphere	53
2.7 Bibliography	61

CHAPTER 3 THE MAGNETOSPHERE

3.1	The Earth's Magnetic Field	63
3.2	The Dipole Magnetic Field	65
3.3	Motions of Charged Particles in a Dipole Magnetic Field	71
3.4	The Radiation Belts	76
3.5	The Boundary and the Tail of the Magnetosphere	83
3.6	Bibliography	90

CHAPTER 4 THE ACTIVE SUN

4.1	Introduction	92
4.2	The Photosphere	93
4.3	The Chromosphere and the Corona	96
4.4	Sunspots and the Solar Cycle	105
4.5	Faculae, Flares and Prominences	112
4.6	Radio and X-Ray Bursts from the Sun	117
4.7	The Development of an Active Region on the Sun	123
4.8	Bibliography	126

CHAPTER 5 THE INTERPLANETARY SPACE

5.1	Introduction	128
5.2	Characteristic Parameters of Fully Ionized Plasmas	129
5.3	Hydrodynamic Equations in the Solar Corona	134
5.4	The Supersonic Flow of the Solar Wind	138
5.5	The Interplanetary Magnetic Field	144
5.6	Interplanetary Dust	150
5.7	Bibliography	157

CHAPTER 6 SOLAR-TERRESTRIAL RELATIONS

6.1	Introduction	158
6.2	Geomagnetic Storms and Ring Currents	161
6.3	Galactic and Solar Cosmic Rays	169
6.4	Auroras	178
6.5	Ionospheric Disturbances	182
6.6	Bibliography	190

CHAPTER 7 SOLAR AND PLANETARY SPACE
ASTRONOMY

7.1	The Domain and the Scope of Space Astronomy	192
7.2	Solar X-Ray Astronomy	196
7.3	Ultraviolet, Optical, and Infrared Solar Space Astronomy	202
7.4	Solar Space Radioastronomy	209
7.5	Planetary Space Astronomy	216
7.6	Bibliography	219

CHAPTER 8 GALACTIC SPACE ASTRONOMY

8.1	Introduction	221
8.2	Gamma-Ray Astronomy	231
8.3	X-Ray Astronomy	237
8.4	Ultraviolet Space Astronomy	246
8.5	Optical and Infrared Space Astronomy	251
8.6	Space Radio Astronomy	258
8.7	Bibliography	265

APPENDIX I Radiative Transfer and the Eddington Approximation 267

APPENDIX II The Development of the Space Age 276

Acknowledgment of Sources 283

Index 285
