PREFACE	ix
ACKNOWLEDGEMENTS	x
CHAPTER 1 INTRODUCTION TO QUIESCENT SOLAR PROMINENCES (E R Priest)	1
1.1 Basic Description	1
1.1.1 Different Types	1
1.1.2 Properties	3
1.1.3 Development	3
1.1.4 Structure	4
1.1.5 Eruption	4
1.2 Basic Equations of MHD	7
1.2.1 Magnetohydrostatics	10
1.2.2 Waves	11
1.2.3 Instabilities	12
1.3 Prominence Puzzles	12
CHAPTER 2 OVERALL PROPERTIES AND STEADY FLOWS (B Schmieder)	15
2.1 Basic Properties	15
2.1.1 Description and Classification	15
2.1.2 Fine Structure in $H\alpha$	17
2.1.3 Evolution of Filaments During the Solar Cycle	19
2.2 Physical Characteristics : Density and Temperature	22
2.2.1 Density and Ionization Degree	22
2.2.2 Non LTE Models	24
2.2.3 Turbulent Velocity and Electron Temperature	26
2.3 Velocity Field and Mass Flux	28
2.3.1 Instrumentation	28
2.3.2 $H\alpha$ Profile Analysis	31
2.3.3 Vertical Motions	31
2.3.4 Horizontal Motions	34
2.3.5 Oscillations	37
2.4 Instability	38
2.4.1 Disparition Brusque of Filaments	38
2.4.2 Model Support	45
2.4.3 Post-Flare Loops and Loop Prominences	45
2.5 Conclusion	46

CHAPTER 3	PROMINENCE ENVIRONMENT (O Engvold)	47
3.1	Introduction	47
3.2	Helmet Streamers	48
3.2.1	Eclipse Photography	48
3.2.2	Morphology	48
3.2.3	Location of Current Sheet	51
3.2.4	Brightness	52
3.3	Coronal Cavities	52
3.3.1	Brightness and Structure	52
3.3.2	Temperature and Density	53
3.4	Filament Channels	54
3.4.1	Association with Neutral Lines	54
3.4.2	Poleward Migration of Filament Channels	55
3.4.3	Presence of Prominences	55
3.4.4	Temperature and Electron Pressure	59
3.4.5	Cool Matter in the Filament Channels	59
3.5	Prominence-Corona Transition Region	61
3.5.1	Line Emission	61
3.5.2	Empirical Modelling	61
3.5.3	A Fragmented and Dynamic Transition Region	64
3.6	Prominences and Environment	66
3.6.1	Magnetic Fields and Chromospheric Structure	66
3.6.2	Association with Supergranulation Network	66
3.6.3	Dynamics	68
3.6.4	The Mass of Coronal Cavity and Prominence	68
3.6.5	Coronal Voids - a Source of Prominence Mass?	71
3.7	Modelling of the Helmet Streamer/Prominence Complex	72
3.7.1	Helmet Streamer and Cavity	72
3.7.2	Magnetic Field Topology	73
3.7.3	Siphon-Type Models	74
3.8	Conclusions	75
CHAPTER 4	OBSERVATION OF PROMINENCE MAGNETIC FIELDS (J L Leroy)	77
4.1	Historical Steps	77
4.2	Investigations Based on the Polarimetry of Spectral Lines	79
4.2.1	Zeeman Effect	79
4.2.2	Hanle Effect	83
4.2.3	180° Ambiguity	85
4.2.4	Instrumental Achievements	87
4.3	Indirect Magnetic Field Determinations	89
4.4	Magnetic Field at the Photospheric Level	90
4.5	Main Features of the Magnetic Field in Quiescent Prominences	93
4.5.1	Field Strength	93
4.5.2	Angle with Horizontal	99

4.5.3	Angle with Prominence Axis	100
4.5.4	Magnetic Structure with Normal or Inverse Polarity	102
4.5.5	Homogeneity of the Field	107
4.6	Some Important Problems	109
4.6.1	Magnetic Field in Sub Arc Second Structures	109
4.6.2	Paradox of Fine Vertical Structures	109
4.6.3	Determination of Currents	110
4.6.4	Evolution of Prominence Magnetic Structure	111
CHAPTER 5 THE FORMATION OF SOLAR PROMINENCES (J M Malherbe)		115
5.1	Introduction	115
5.2	Overview of Observations	116
5.3	Main MHD Instabilities Involved in Prominence Formation	130
5.3.1	Radiative Thermal Instability	130
5.3.2	Resistive Instabilities	131
5.4	Steady Reconnection in Current Sheets	132
5.4.1	Incompressible and Compressible Theories	132
5.4.2	Unification of Different Regimes	133
5.5	Static Models	133
5.5.1	Condensation in a Loop	134
5.5.2	Condensation in an Arcade	134
5.5.3	Condensation in a Sheared Magnetic Field	134
5.5.4	Condensation in a Current Sheet	135
5.6	Dynamic Models: Injection from the Chromosphere into Closed Loops	135
5.6.1	Surge-Like Models	135
5.6.2	Evaporation Models	136
5.7	Dynamic Models: Condensation in Coronal Current Sheets	138
5.7.1	Numerical Simulations	138
5.7.2	Role of Shock Waves in Condensation Process	138
5.8	Unsolved Problems	140
5.9	Conclusion	141
CHAPTER 6 STRUCTURE AND EQUILIBRIUM OF PROMINENCES (U Anzer)		143
6.1	Introduction	143
6.2	Prominence Models	144
6.2.1	Global Structure	144
6.2.1.1	Two-Dimensional Equilibria	144
6.2.1.1.1	Models with Normal Magnetic Polarity	144
6.2.1.1.2	Models with Inverse Magnetic Polarity	149
6.2.1.1.3	Force-Free Fields	152
6.2.1.2	Quasi-Three-Dimensional Models	154
6.2.1.3	Support by Alfvén Waves	154
6.2.2	Internal Structure and Thermal Equilibrium	155

6 .2 .2 .1 Hydrostatic Equilibrium	155
6 .2 .2 .2 Thermal Equilibrium	158
6 .3 Concluding Remarks	164
CHAPTER 7 STABILITY AND ERUPTION OF PROMINENCES (A W Hood)	167
7.1 Introduction	167
7.2 Description of MHD Instabilities	168
7.3 Methods of Solution	170
7 .3 .1 Normal Modes	170
7 .3 .2 Energy Method	172
7 .3 .3 Non Equilibrium	174
7.4 Effect of the Dense Photosphere	176
7 .4 .1 Physical Arguments	176
7 .4 .2 Ballooning Modes	177
7.5 Coronal Arcades	178
7 .5 .1 Distributed Current Models - Eruptive Instability	178
7 .5 .2 Localised Modes - Small Scale Structure	180
7 .5 .3 Arcades Containing a Current Sheet	181
7.6 Thermal Stability	183
7.7 Resistive Instabilities - Tearing Modes	184
7 .7 .1 Introduction	184
7 .7 .2 Estimate of Tearing Mode Growth Rate	186
7 .7 .3 Effect of Line Tying	187
7.8 Simple Model of Prominence Eruption and a Coronal Mass Ejection	188
7.9 Conclusions and Future Work	189
