

CONTENTS

Introduction, F. Lied, Director NDRE	1
<i>Section 1. Electron densities in the undisturbed E- and D-region</i>	
Rocket experiments in the mid-latitude lower ionosphere, J. A. Kane, A. C. Aikin, J. Tröim	6
Electron densities in the D-region from rocket measurements, J. E. Hall	11
Experimental studies of the electron densities in the E- and D-region, W. R. Piggott, E. V. Thrane	13
Summary of discussion on the normal D-region	15
A method for the determination of E_S -gradients, A. K. Paul	17
<i>Section 2. Electron density distributions during polar black-outs</i>	
Derivation of electron density profiles in the lower ionosphere using radio absorption measurements at multiple frequencies, R. Parthasarathy, G. M. Lorfald, C. G. Little (Abstract)	21
Electron density and collision frequency observations in the lower D-region during auroral absorption, M. Jespersen, O. Petersen, J. Rybner, B. Bjelland, O. Holt, B. Landmark	22
Electron density measurements during a strong auroral absorption event, O. Holt	36
Electron density measurements in the D-region by the method of partial reflection, J. S. Belrose	41
The effect of auroral bremsstrahlung on the lower ionosphere, A. C. Aikin, E. J. Maier	50
Parameters in the D-region attainable with a Gerdien condenser rocket probe, A. Pedersen	60
Some V.L.F. observations under disturbed D-region conditions, B. Burgess	65
Summary of the discussion on electron density distributions during polar black-outs	69
<i>Section 3. Electron densities in the F-region</i>	
Recent developments in the theory of the F-region, L. Thomas	71
Composition changes in the upper atmosphere, F. S. Johnson	81
Direct measurements of positive ion density and electron temperature in the F-region, L. H. Brace, N. W. Spencer	85
Frequency correlation measurements as a new method of studying the ionosphere, P. Christophersen, T. Hagfors	93

Some results of a new method for obtaining ionospheric $N(h)$ profiles with a bearing on the structure of the lower F-region, A. K. Paul, J. W. Wright	105
Ionosonde studies of some chemical releases in the ionosphere, J. W. Wright	116
Méthode de détermination des hauteurs réelles de réflexion dans l'ionosphère au moyen de paramètres lus sur les ionogrammes, Ch. Taieb	138
Real height analysis of an ionospheric storm, W. Becker	152
Acoustic gravity waves caused by the nuclear explosion on October 30th, 1961, H. Kohl	160
Distribution of the electron density in the ionosphere over Athens during the solar eclipse of 15 February 1961, D. Ilias, M. Anastasiadis	170
Discussion on electron densities in the F-region	184
 Section 4. <i>On the seasonal and diurnal variation of the electron densities in the F-region</i>	
On the implication of diurnal, seasonal and geographical variations in composition of the high atmosphere, from F-region measurements, J. W. Wright	186
The daily response in the F-region to variations in solar activity, W. Becker	199
On the seasonal effect of the F-region at medium latitudes, W. Becker	217
L'ionisation de la région F au lever du soleil, A. Haubert, F. Laloe	222
The electron density distribution in the F2-layer of the ionosphere in winter, J. O. Thomas	226
Discussion on the diurnal variation of electron density in the F-region	243
 Section 5. <i>Measurements of the total electron content of the ionosphere</i>	
Measurement of total electron content using the Faraday effect of the satellite signal, Chr. Münther	244
An observation of a large, sudden ionospheric total electron content decrease, J. A. Klobuchar, H. E. Whitney, R. S. Allen	250
Electron content of the ionosphere deduced from radar-satellite reflections, G. H. Millman	256
 Section 6. <i>Electron densities deduced from measurements of incoherent backscatter</i>	
Incoherent backscatter studies of the ionosphere at Millstone Hill, J. V. Evans	266
Discussion on incoherent backscatter studies	305
 Section 7. <i>Electron densities in the upper F-region and exosphere</i>	
The topside sounder satellite Alouette, J. H. Chapman, E. S. Warren	307

Preliminary investigations of the structure of the upper ionosphere as observed by the topside sounder satellite, Alouette, J.W.King, H. Helm, G. W. Luscombe, P. A. Smith	322
NASA investigation of the topside ionosphere, J. E. Jackson	325
On the constitution of the topside ionosphere, R.W. Knecht, H. Rishbeth, T. E. Vanzandt	348
The calculation of electron density profiles from "topside sounder" records, J. O. Thomas, A. R. Long, D. Westover	351
Dynamic diffusion processes in the exosphere, W. B. Hanson	361
Direct measurements of helium and hydrogen ion concentration and total ion density to an altitude of 940 kilometers, H.A. Taylor Jr., L. H. Brace, H. C. Brinton, C. R. Smith	371
Field aligned enhanced ionization density strata above the F-layer, P. Rothwell, J. Sayers, J. Wager	384
The French VLF satellite programme, L. R. O. Storey	385
Discussion on electron densities in the upper F-region and exosphere	386
Electron-to-ion temperature ratios, J. V. Evans	387
List of participants	393
Author index	395
