

CONTENTS

Opening speech, F. Lied

Sir Edward V. Appleton, G.B.E., K.C.B., F.R.S., by F. Lied

The constitution of the upper atmosphere

Ionizing radiations and the constitution of the upper atmosphere, S. J. Bauer 1

The disturbed D region

Physics of the D region at high latitudes, G. C. Reid 17

Electron density and collision frequency observations in the arctic D region, M. Jespersen, A. Haug and B. Landmark 27

D-region ion densities measured in the auroral zone with rocket probes, A. Pedersen 31

Observations of the quiet D region

The collision frequency in the E and D regions of the ionosphere, E. V. Thrane and W. R. Piggott 35

A preliminary investigation of diurnal and seasonal changes in electron number density over Resolute Bay as observed by partial reflections, J. S. Belrose, L. R. Bodé and L. W. Hewitt 37

The winter variability of electron number density in the lower ionosphere over Ottawa. A discussion of results and possible cause, J. S. Belrose, I. A. Bourne and L. W. Hewitt 48

Electron densities in the auroral zone D layer during quiet ionospheric conditions, A. Haug 61

The effect of irregularities in collision frequency on the amplitude of weak partial reflections, W. R. Piggott and E. V. Thrane 66

Electron density and collision frequency measurements of the D region with radio wave phase and amplitude interaction, A. J. Ferraro and H. S. Lee 69

Specific absorption in the lower ionosphere, J. E. Barety and R. S. Allen 83

The variation of 10 Mc/s cosmic-noise absorption with the solar zenith angle, G. M. Lerfald and R. Parthasarathy 90

Rocket measurements of D-region electron densities, J. E. Hall 93

The possibility of D-D-region ion mass spectrometry based on cyclotron resonance, A. Johannesen, J. Trøim and J. A. Kane 95

Rocket measurements of electron density profiles in the lower ionosphere by the VLF Doppler method, T. Stockflet Jørgensen and E. Ungstrup 101

Preliminary results of rocket measurements of D-region ion density, L. C. Hale, D. P. Hoult and R. G. Willis	108
Positive ion density measurements in the lower ionosphere, R. E. Bourdeau and J. L. Donley	116
Summary of the discussion on the quiet D region	117
<i>VLF observations of the D region</i>	
On the use of VLF measurements for obtaining information about the lower ionosphere, especially during solar flares, D. D. Crombie	118
D-region electron distributions in middle latitudes deduced from the reflection of long radio waves, D. G. Deeks	134
An investigation into experimental D-region electron density distribu- tions using full-wave techniques, B. R. May	136
<i>The E region</i>	
Review of phenomena in the E region, W. R. Piggott	137
Etude des régimes transitoires dans la théorie de la formation des couches E sporadiques par gradients des vents, Nguyen Minh Tri	140
Etude de la formation des couches E sporadiques à deux ions positifs de propriétés de recombinaison distinctes dans le cadre de la théorie des cisaillements de vents, L. Cuchet	153
Données expérimentales sur la structure des couches E sporadiques, A. Spizzichino	193
High sensitivity radar investigations of magnetic field-aligned ioniza- tion in the E region, C. D. Watkins	208
Summary of the discussion on the E region papers	217
<i>The bottomside F region</i>	
The seasonal anomaly of the F region at mid-latitudes and its inter- pretation, W. Becker	218
The possible effect of diffusion between magnetically conjugate points on the seasonal anomaly of the F layer, H. Kohl	231
Lunar tidal effects in the F region above Lindau/Harz, W. Becker	239
The attachment coefficient in the F layer and its temperature depen- dence, P. Stubbe	249
A method to calculate the electron density profile from ionograms by using an analog computer in realtime, G. Freier	258
Summary of the discussion on the bottomside F layer	263
<i>The topside F region</i>	
The topside ionosphere, J. H. Chapman	264
The constitution of the topside ionosphere, S. J. Bauer	270
Observations of ionospheric irregularities and plasma resonances by the fixed-frequency topside sounder satellite, W. Calvert	280
The topside ionosphere, I. The analysis of Alouette I topside iono- grams, J. O. Thomas, M. J. Rycroft, L. Colin and K. L. Chan	299

The topside ionosphere, II. Experimental results from the Alouette I satellite, J. O. Thomas, M. J. Rycroft, L. Colin and K. L. Chan	322
Seasonal and diurnal variations of the distribution of electron density in the topside of the ionosphere, G. L. Nelms	358
Ion composition and temperature at 1000 km as deduced from VLF resonances and topside ionograms, R. E. Barrington, J. S. Belrose and G. L. Nelms	387
Latitudinal variations of electron temperature and concentration from Explorer XXII, L. H. Brace and B. M. Reddy	397
Summary of the discussion on the topside F region	398

Incoherent scatter

Ionospheric backscatter observations at Millstone Hill, J. V. Evans	399
Observations of the equatorial ionosphere using incoherent backscatter, D. T. Farley, Jr.	446
Electron densities and temperatures in the F region from backscatter measurements at Arecibo, H. C. Carlson and J. S. Nisbet	470
Evidence for a magnetic conjugate-point origin of ionospheric heating, H. C. Carlson	478
Electron temperature and density fluctuations in the daytime ionosphere, J. Doupnik and J. S. Nisbet	493
Radar spectrographic estimates of ionic composition and temperatures from 250 km to 1400 km, H. C. Carlson and W. E. Gordon	505
A short-pulse backscatter study of the lower ionosphere, L. M. LaLonde	515
Incoherent scatter from plasma oscillations in the ionosphere, F. W. Perkins, E. E. Salpeter and K. P. Yngvesson	522
Recombination in the nighttime F region from incoherent scatter measurements, J. S. Nisbet and D. McCrory	530
Magnetic field measurements by the incoherent scatter technique, G. H. Millman	540
Discussion on incoherent scatter	541

Total electron content measurements

The seasonal anomaly in electron content, G. N. Taylor	543
Latitudinal and diurnal variations of the ionospheric electron content near the auroral zone in winter, L. Liszka	549
The variation of electron content in the ionosphere at a low latitude, G. H. Millman	555
Faraday rotation measurements of decameter wavelength radiation from the planet Jupiter, R. M. Straka, C. L. Bennet and D. Gaunt	567
Summary of the discussion on total electron content	574

The F region

Preliminary studies of the ionization maxima which exist in the equatorial and mid-latitude ionospheres, J. W. King, D. Eccles and P. A. Smith	575
--	-----

Summary of the discussion on the F region	577
<i>Irregularities in the F region</i>	
Observation d'irrégularités d'ionisation dans l'ionosphère inférieure et supérieure, F. Du Castel, J. M. Faynot et G. Vasseur	579
<i>The exosphere</i>	
Ion-electron distribution in the upper ionosphere above the F2 peak at low and middle latitudes as deduced from whistler observations, C. Beghin	587
Determination of exospheric electron densities through the use of VLF background radiations, T. F. Bell	602
<i>Summary of the conclusions of the meeting</i>	
The D and E regions. Summary of a talk, W. R. Piggott	615
Concluding remarks on ionospheric F-region temperatures, J. V. Evans	616
Ion composition in the topside ionosphere, S. J. Bauer	622
Summary of the topside ionosphere, J. H. Chapman	623
Author index	626
