Nobel Symposium Committee	11
Organizing Committee	11
List of participants	12
H. ALFVÉN	
From plasma to planet. Plans for the symposium	15
Chemical state of plasma and gas in space	
H. MASSEY	
Atomic and molecular reactions in space	17
<i>Discussion:</i> Alfvén, Arrhenius, Massey, Vanýsek and Whipple	
Z. KOPAL	
Origin of the planetary systems: Astronomical evidence in other stars . .	39
<i>Discussion:</i> Anders, Kopal, Lal, Millman, Pellas, Vanýsek and Whipple	
Irradiation of grains in space	
D. LAL	
Accretion processes leading to formation of meteorite parent bodies . .	49
<i>Discussion:</i> Alfvén, Anders, Arrhenius, Lal, Pellas and Whipple	
P. PELLAS	
Irradiation history of grain aggregates in ordinary chondrites. Possible clues to the advanced stages of accretion	65
<i>Discussion:</i> Anders, Arrhenius, Lal, Pellas and Whipple	
Interaction of plasma and gas with solids	
H. SATO	
A gasdynamical view on the motion, heating and accretion of solid bodies in the solar system	93
<i>Discussion:</i> Alfvén, Anders, Kopal, Lehnert, Pellas, Runcorn, Sato and Whipple	
B. LEHNERT	
On the conditions for cosmic grain formation	111
<i>Discussion:</i> Lal, Lehnert, Pellas and Runcorn	

H. E. NEWELL	
A computer-generated motion picture showing a rendezvous mission with comet Encke	115
<i>Discussion:</i> Alfvén, Gehrels, Lindblad, Millman, Newell and Whipple	
G. ARRHENIUS	
Chemical effects in plasma condensation	117
<i>Discussion:</i> Arrhenius, Gehrels, Kopal, Lodén, Öhman and Whipple	
Chemical studies of meteorites and moon	
E. ANDERS	
Conditions in the early solar system, as inferred from meteorites	133
<i>Discussion:</i> Alfvén, Anders, Arrhenius, Lal, Lindblad, Pellas, Sherman and Whipple	
Small bodies in the solar system	
P. M. MILLMAN	
Cometary meteoroids	157
<i>Discussion:</i> Anders, Arrhenius, Massey, Millman, Pellas, Vanýsek and Wallis	
T. GEHRELS	
Physical parameters of asteroids and interrelations with comets.	169
<i>Discussion:</i> Anders, Gehrels, Runcorn and Vanýsek	
J. TRULSEN	
Theory of jet streams	179
<i>Discussion:</i> Alfvén, Anders, Gehrels, Kopal and Trulsen	
B. A. LINDBLAD	
Meteor and asteroid streams	195
<i>Discussion:</i> Lehnert, Lindblad, Millman and Whipple	
Formation of comets	
F. L. WHIPPLE	
On certain aerodynamic processes for asteroids and comets	211
<i>Discussion:</i> Alfvén, Anders, Arrhenius, Pellas, Sato and Whipple	
V. VANÝSEK	
The structure and formation of comets	233
<i>Discussion:</i> Elvius, Gehrels, Öhman, Vanýsek and Wallis	

A. MRKOS

- Observation and feature variations of comet 1969e before and during the Perihelion passage 261
Discussion: Alfvén, Anders, Danielsson, Lal, Lindblad, Trulsen, Vanýsek, Wallis and Whipple

Space research and the origin of the solar system**G. I. PETROV**

- Investigation of solar system evolution by automatic vehicles on the Moon 273

H. E. NEWELL, D. H. HERMAN AND P. TARVER

- Potential contributions of the United States space program to exploration of the solar system 285

Plasma dynamics**J. C. SHERMAN**

- The critical velocity of gas-plasma interaction and its possible heterogenic relevance 315

Discussion: Alfvén, Lehnert, Sherman and Whipple

Short communications**Y. ÖHMAN**

- On some plasma rotation phenomena on the Sun 343

Discussion: Lehnert, Lindblad, Öhman and Runcorn

D. LAL

- A »cometary» suggestion 349

Discussion: Gehrels, Lal, Vanýsek, Wallis and Whipple

L. DANIELSSON AND W.-H. IP

- On the existence of a resonance-captured "quasi-satellite" of the Earth . 353

Discussion: Alfvén, Anders, Danielsson, Gehrels, Lal, Lindblad and Whipple

B. A. LINDBLAD

- The possibility of a trans-Saturnian belt of particulate matter 359

H. ALFVÉN

- Semantics 361

Discussion: Alfvén, Danielsson, Gehrels, Kopal, Lal, Lindblad, Millman, Newell, Persson and Vanýsek

Future space exploration in relation to research on the origin of the solar system	
— General discussion	
H. ALFVÉN	
Introduction to summary papers	367
P. M. MILLMAN	
The meteoritic complex	367
H. S. W. MASSEY	
Some suggested research activities	368
<i>Discussion:</i> Alfvén, Anders, Arrhenius, Lal, Lindblad, Millman, Newell, Pellas and Runcorn	
<i>Discussion after a Summary Paper by G. Arrhenius and E. Anders</i> . . .	372
S. K. RUNCORN	
Fossil magnetic fields	373
<i>Discussion:</i> Alfvén and Arrhenius	
T. GEHRELS	
Remarks on techniques for future studies	377
<i>Discussion:</i> Alfvén, Anders, Kopal and Whipple	
H. E. NEWELL	
Planning of space experiments	381
<i>Discussion:</i> Alfvén	
Z. KOPAL	
Studies of other planetary systems with space techniques	381
<i>Discussion:</i> Kopal and Newell	
G. I. PETROV	
Comments on space programs	384
General discussion	
Alfvén, Arrhenius, Gehrels, Lal, Lindblad, Millman, Newell, Petrov and Whipple
