

## TABLE OF CONTENTS

List of Participants	xiii
Foreword	xvii

### SOHO OVERVIEW

SOHO and the Solar Community R. M. Bonnet	3
The Scientific Payload of the Space-Based Solar and Heliospheric Observatory (SOHO) V. Domingo, B. Fleck, and A. I. Poland	7
SOHO Operations and Ground System A. I. Poland, V. Domingo, and B. Fleck	13

### I SMALL SCALE STRUCTURES

Solar Mass Flow in Fine-Scale Structures K. P. Dere	21
Magnetic Fine Structures in Coronal Loops A. A. van Ballegooijen	31
Small Scale Structures in the Solar Corona S. R. Habbal	37
The Dynamics of Chromospheric Spicules P. G. Papushev and R. T. Salakhutdinov	47
Numerical Simulations of Spicule Driving Mechanisms A. S. Andreev and A. G. Kosovichev	53
The Chromospheric Network Dynamics as Derived from the Analysis of Ca II K and He I 1083 nm Lines K. Bocchialini, J.-C. Vial, and S. Koutchmy	57
Dynamical Fine Structures of the Chromosphere G. Tsiropoula, B. Schmieder, and C. E. Alissandrakis	65
Energy Input for Explosive Events in the Transition Zone G. M. Simnett	69

Jets and Brightenings Generated by Energy Deposition in the Middle and Upper Solar Chromosphere	77
A. C. Sterling, K. Shibata, and J. T. Mariska	
The Coronal Context of Transition Region Explosive Events	81
D. Moses and J. W. Cook	
The Extension of Explosive Events from the Transition Region to the Corona	85
O. Kjeldseth-Moe and C. C. Cheng	
Fine Structure and the Emission Filling Factor	89
O. Kjeldseth-Moe, N. Brynildsen, P. Brekke, and P. Maltby	
Turbulent Transition in Solar Surges	93
R. B. Dahlburg and J. T. Karpen	
Observed Redshifts of Transition Region/Corona Lines	97
P. Brekke	
Transition Region Line-Shifts in the Rebound Shock Spicule Model	103
V.H. Hansteen and Ø. Wikstøl	
Analysis of a Redshifted Plasma Flow over a Sunspot	107
J. M. Laming	
Spectroscopic Diagnostics for CDS and SUMER	111
H. E. Mason	
SUMER Science Database	115
J. Aboudarham	
TRACE - The Transition Region and Coronal Explorer	119
K. Strong, M. Bruner, T. Tarbell, A. Title, and C. J. Wolfson	
Working Group 1: Small Scale Features	123
O. Kjeldseth-Moe	

## II LOOPS AND PROMINENCES

Observations of Loops and Prominences	133
K. T. Strong and the Yohkoh Team	
Mass Flows in Coronal Loops	143
S. K. Antiochos	

SOHO Contribution to the Understanding of Mass Supply and Flows in the Solar Corona E. Antonucci	149
Features of Mass Supply and Flows Related with Reconnection in the Solar Corona B. V. Somov	161
Coronal Heating due to the Emergence of Magnetic Flux S. T. Wu, M. T. Song, C. C. Cheng, and M. Dryer	167
Modeling of Dynamic Evolution of Coronal Loops T.V. Stepanova and A.G. Kosovichev	171
Hierarchy of Spatial Scales in UV Prominences B. Schmieder, J.E. Wiik, and K.P. Dere	175
Coordinated Optical and Yohkoh Observations of 26 June 1992 Flare Loops P. Heinzel, P. Kotrč, B. Schmieder, E. Hiei, and B. Anwar	181
Coronal Electron Density Measurements Using the Near-IR [Fe XIII] Emission Lines M. J. Penn, J. R. Kuhn, J. Arnaud, D. L. Mickey, and B. J. Labonte	185
Structure and Development of Quiet Loops in the Solar Corona E. Hiei	189
Coronal Loops and Prominences as Observed with RATAN 600 A. N. Korzhavin, V. M. Bogod, V. N. Borovik, G. B. Gelfreikh, and V. I. Makarov	193
Millimeter Wave Radiation Sources Visible in Solar Corona S. Urpo, S. Pohjolainen, and A. Krüger	199
Stationary Flows in Coronal Loops S. Orlando, S. Serio, and G. Peres	203
Observational Evidence for Non-Equilibrium Ionization in the Solar Corona D. Spadaro, P. Leto, and S. K. Antiochos	207
ASAP: A Systematic Approach to Plasma Spectral Synthesis F. Reale, A. Maggio, A. Ciaravella, and G. Peres	211
Eruptive Prominences as Sources of Magnetic Clouds in the Solar Wind V. Bothmer and R. Schwenn	215
Working Group 2: Loops and Prominences E. R. Priest	221

### III CORONAL STREAMERS

Coronal Streamers' Theories C. G. Schultz	233
Understanding Solar Streamers: The Role of SOHO G. Poletto	241
Ultraviolet Spectroscopy of the Extended Solar Corona during the SPARTAN 201 Mission J. L. Kohl, L. D. Gardner, L. Strachan, and D. M. Hassler	253
Preliminary Results from SPARTAN 201: Coronal Streamer Observations L. Strachan, L. D. Gardner, D. M. Hassler, J. L. Kohl	263
SPARTAN 201 White Light Coronagraph Experiment R. R. Fisher and M. Guhathakurta	267
Soft X-Ray Observations of Helmet Structures from SXT/Yohkoh C. C. Cheng and the SXT/Yohkoh Team	273
Radio Emission from Coronal Streamers F. C. Drago	279
Magnetic Configuration of Coronal Streamers and Threads S. Koutchmy, V. A. Koutvitsky, M. M. Molodensky, L. S. Solov'iev, and O. Koutchmy	283
Modeling Coronal Streamers and Their Eruption R. S. Steinolfson	289
Magnetohydrodynamic Simulation of a Streamer Beside a Realistic Coronal Hole S. T. Suess, S. T. Wu, A.-H. Wang, and G. Poletto	295
Manifestation of Magnetic Reconnection in Coronal Streamer Current Sheets A. I. Verneta, E. Antonucci, and D. Marocchi	299
Coronal Magnetic Field Evolution under Reconnective Relaxation G. E. Vekstein, E. R. Priest, and R. Wolfson	303
Working Group 3: Coronal Streamers R. A. Kopp	309

## IV CORONAL HOLES AND SOLAR WIND

Observations of the Solar Wind from Coronal Holes M. Neugebauer	319
Unsolved Problems of Solar Wind Expansion: Can We Learn Anything from SOHO? R. Esser	331
Diffusive Fractionation in the Chromosphere R. von Steiger and E. Marsch	341
Coupling of the Coronal He Abundance to the Solar Wind V. H. Hansteen, E. Leer, and T. E. Holzer	347
Electron Coronal Density Irregularity $\overline{n^2}/(\bar{n})^2$ from Measurements of K-Coronal and Lyman Lines Brightnesses S. Fineschi and M. Romoli	353
Simulated Observations of the Electron Coronal Density Irregularity $\overline{n^2}/(\bar{n})^2$ M. Romoli and S. Fineschi	359
UV Spectral Lines from Coronal Transients D. Spadaro, R. Ventura, and R. Martin	365
Modeling the Coronal Magnetic Field in a Polar Hole X.-P. Zhao and J. T. Hoeksema	369
Broadening of Fe X (6374 Å) Profiles above the Limb in a Coronal Hole D. M. Hassler and T. G. Moran	373
Signature of Coronal Holes and Streamers in the Interplanetary Space Y. I. Yermolaev	379
Effect of Areal Expansion and Coronal Heating on the Solar Wind Y.-M. Wang	387
Coronal Plumes and Final Scale Structure in High Speed Solar Wind Streams M. Velli, S. R. Habbal, and R. Esser	391
Radial Profile Measurements of the Solar Wind Speed Using Radio Sounding Techniques A. I. Efimov	397
