

CONTENTS

Preface	v
Solar Magnetohydrodynamics <i>B. Roberts</i>	1
Summary of the Scientific Results of the Giotto Mission to Halley's Comet: Nucleus, Dust and Gas Composition and Fluxes <i>R. Reinhard</i>	81
Observations of the Interaction between Comet Halley and the Solar Wind by the Giotto Spacecraft <i>A. D. Johnstone</i>	110
Plasma Physics Phenomena Detected at Comet Giacobini- Zinner <i>Frederick Scarf</i>	141
Interaction of Comets with the Solar Wind and Solar Radiation <i>D. A. Mendis</i>	155
Second Order Fermi Acceleration of Implanted Cometary Ions <i>T. I. Gombosi</i>	183
Stochastic and Coherent Processes in Space Plasmas <i>B. Buti</i>	221
Is the Cometary "Bow Shock" Really a Shock? <i>P. J. Cargill, K. Hizanidis and K. Papadopoulos</i>	285
A Particle MHD Simulation Approach with Application to a Global Comet-Solar Wind Interaction Model <i>Richard D. Sydora and Joachim Raeder</i>	310
