

CONTENTS

Opening Talk	1
Odd DAHL, <i>Chr. Michelsen Institute</i>	

SESSION I / B-L SPACE

Models of the Earth's Magnetic Field	7
Joseph C. CAIN, <i>Goddard Space Flight Center</i>	
Adiabatic Theory of Charged Particle Motion	26
T. G. NORTHROP, <i>Goddard Space Flight Center</i>	
Magnetic Coordinates	45
Carl E. MCILWAIN, <i>University of California</i>	
Future Magnetic Field for B-L Space	62
Martin WALT, <i>Lockheed Missiles and Space Company</i>	

SESSION II / OBSERVED PARTICLE DISTRIBUTION IN THE NATURAL BELTS (I)

Some General Aspects of Geomagnetically Trapped Radiation	65
J. A. VAN ALLEN, <i>University of Iowa</i>	
Some Cosmic Ray and Radiation Belt Observations Based on Data from The Anton 302 G-M Counter in Ariel I	76
H. ELLIOT, <i>Imperial College</i>	
Low Altitude Measurements of Trapped Electrons	100
W. L. IMHOF and R. V. SMITH, <i>Lockheed Missiles and Space Company</i>	
Resonance Acceleration of Particles in the Inner Radiation Belt	112
J. B. CLADIS, <i>Lockheed Missiles and Space Company</i>	
Energy Spectrum of Inner Zone Protons	116
Stanley C. FREDEN, <i>Aerospace Corporation</i>	

Electron and Proton Observations	129
Ludwig KATZ, <i>Air Force Cambridge Research Laboratories</i>	
Temporal Stability of Inner Zone Protons	155
George F. PIEPER, <i>Goddard Space Flight Center</i>	
Some Observations of the Distribution of Energetic Protons in the Earth's Radiation Belts Between 1962 and 1964	165
J. D. GABBE and W. L. BROWN, <i>Bell Telephone Laboratories</i>	
Summary of Inner Zone Protons	185
Stanley C. FREDEN, <i>Aerospace Corporation</i>	
Conclusions on Neutron Albedo Decay Source	187
Wilmot N. HESS, <i>Goddard Space Flight Center</i>	

SESSION III / OBSERVED PARTICLE DISTRIBUTION IN THE NATURAL BELTS (II)

The Alouette Satellite Results	191
D. C. ROSE, <i>National Research Council, Canada</i>	
Outer Zone Protons	215
L. R. DAVIS and J. M. WILLIAMSON, <i>Goddard Space Flight Center</i>	
Vela Satellite Measurements of Particles in the Solar Wind and the Distant Geomagnetosphere	231
James H. COON, <i>Los Alamos Scientific Laboratory</i>	
Trapped Radiation Estimates for the Other Planets	256
L. REIFFEL, <i>Illinois Institute of Technology</i>	
Outer Zone Electrons	263
Donald J. WILLIAMS, <i>Johns Hopkins University</i>	

SESSION IV / SOURCES AND SINKS OF NATURAL TRAPPED RADIATION

Origin and Loss of Inner Zone Protons	287
A. M. LENCHEK, <i>University of Maryland</i>	
Particle Effects in the Geomagnetic Field	302
E. N. PARKER, <i>University of Chicago</i>	

Precipitation of Electrons and Protons into the Atmosphere Brian O'BRIEN, <i>Rice University</i>	321
Loss Rates of Trapped Electrons by Atmospheric Collisions Martin WALT, <i>Lockheed Missiles and Space Company</i>	337
Source of Outer Zone Protons Wilmot N. HESS, <i>Goddard Space Flight Center</i>	352
Diffusion of Protons in the Outer Radiation Belt N. P. NAKADA and G. D. MEAD, <i>Goddard Space Flight Center</i>	369
Longitude Dependence of Geomagnetically Trapped Electrons Juan G. ROEDERER, <i>Goddard Space Flight Center</i> and Jasper A. WELCH, <i>Systems Command</i>	373
On the Observation of Ionospheric Effects Due to Dumping of Trapped Particles G. J. GASSMANN, <i>Air Force Cambridge Research Laboratories</i> , and C. P. PIKE, Jr., <i>Lowell Technological Institute</i>	378

SESSION V / PHYSICS OF THE OUTER MAGNETOSPHERE

Survey of Acceleration and Diffusion J. W. DUNGEY, <i>Imperial College</i>	389
Coefficients of Diffusion in the Outer Radiation Belt Carl-Gunne FÄLTHAMMAR, <i>Stockholm Royal Institute of Technology</i>	398
Electron Loss from the Van Allen Zones Due to Pitch Angle Scattering by Electromagnetic Disturbances Charles S. ROBERTS, <i>Bell Telephone Laboratories</i>	403
Observations of Magnetospheric Boundary Phenomena L. A. FRANK, <i>University of Iowa</i>	422
Magnetospheric Models A. J. DESSLER, and F. C. MICHEL, <i>Rice University</i>	447
Nature of the Outer Magnetosphere and Magnetopause Theory David BEARD, <i>University of Kansas</i>	457
The Motion of Trapped Particles in a Distorted Field Gilbert D. MEAD, <i>Goddard Space Flight Center</i>	481

Some Plasma Instabilities of the Magnetosphere	491
David B. CHANG, <i>John Jay Hopkins Laboratory for Pure and Applied Science</i>	
Auroral Phenomena Associated with Particle Precipitations	504
Bernt MÆHLUM, <i>Norwegian Defence Research Establishment</i>	
Ionospheric Response to Particle Precipitation by f_{\min} -Blackout Technique	538
Harold L. STOLOV, <i>Goddard Institute for Space Studies</i>	
The Tail of the Magnetosphere and Particle Acceleration	547
F. C. HOH, <i>Boeing Scientific Research Laboratories</i>	
A Fluid Model for the Interaction of the Solar Wind and the Geomagnetic Field	551
John R. SPREITER, Audrey L. SUMMERS, and Alberta Y. ALKSNE, <i>Ames Research Center</i>	
SESSION VI / ARTIFICIAL INJECTED RADIATION	
Sources of Artificial Radiation Belts	565
N. C. CHRISTOFILOS, <i>Lawrence Radiation Laboratory</i>	
Spatial Distribution and Time Decay of the Intensities of Geomagnetically Trapped Electrons from the High Altitude Nuclear Burst of July 1962	575
J. A. VAN ALLEN, <i>University of Iowa</i>	
Measurements of Trapped Electron Intensities Made by the Explorer XV Satellite	593
C. E. MCILWAIN, <i>University of California</i>	
Observations of the Transient Behavior of Electrons in the Artificial Radiation Belts	610
W. L. BROWN, <i>Bell Telephone Laboratories</i>	
Some Observations of the Trapped Electrons Produced by the Russian High-Altitude Nuclear Detonation of October 28, 1962	634
Harry I. WEST, Jr., <i>Lawrence Radiation Laboratory</i>	
The Trapped Electron Spectra from the Starfish Detonation and from the Outer Belt in the Fall of 1962	663
Harry I. WEST, Jr., <i>Lawrence Radiation Laboratory</i>	
Overall Analysis of Experiments on Artificial Radiation Belts	666
Martin WALT, <i>Lockheed Missiles and Space Company</i>	

The Motion of Bomb Debris Following the Starfish Test	671
John ZINN, Herman HOERLIN, and Albert G. PETSCHKE, <i>Los Alamos Scientific Laboratory</i>	

Energetic Electrons from Shock Heating in the Exosphere	693
Stirling A. COLGATE, <i>New Mexico Institute of Mining and Technology</i>	

SESSION VII / SYNCHROTRON RADIATION

Synchrotron Radiation Measurements near the Magnetic Equator	703
Gerard R. OCHS, <i>National Bureau of Standards</i>	

Theoretical Model of Synchrotron Radiation and Comparison with Observations	714
Allen M. PETERSON, <i>Stanford Research Institute and Stanford University</i> and Glen L. HOWER, <i>Washington State University</i>	

SESSION VIII / EFFECTS OF TRAPPED RADIATION ON SENSORS, ELECTRONIC DEVICES, ETC.

Effects of Trapped Radiation on Electronic Devices	757
W. L. BROWN, <i>Bell Telephone Laboratories</i>	

Radiation Damage to Orbiting Solar Cells and Transistors	793
R. E. FISCHER, J. H. MARTIN, W. E. RADFORD, and W. E. ALLEN, <i>The Johns Hopkins University</i>	

A Method for Calculation of Average Radiation Fluxes on Satellites	808
D. H. SOWLE and R. W. LOWEN, <i>General Dynamics/Convair</i>	

SESSION IX / RADIATION DOSES RECEIVED BY MANNED FLIGHT IN THE TRAPPED RADIATION BELTS

Predictions and Observations for Space Flight	817
Duane A. ADAMS, <i>Air Force Weapons Laboratory</i> and Brian W. MAR, <i>The Boeing Company</i>	

Shielding Techniques	846
J. Warren KELLER, <i>Headquarters NASA</i>	

A Model Proton Environment Above 4 MeV	865
James I. VETTE, <i>Aerospace Corporation</i>	

Some New Methods for Space Shielding Calculations	875
R. W. LOWEN and D. H. SOWLE, <i>General Dynamics/Convair</i>	
Summary	887
B. M. McCORMAC, <i>Illinois Institute of Technology</i>	
Index of Persons	891
Index of Subjects	898
