

## TABLE OF CONTENTS

Opening Address	1
A. Unsöld, <i>University of Kiel</i>	
Fourty Years of Solar Spectroscopy	3
M. Minnaert, <i>Sterrewacht 'Sonnenborgh', Utrecht</i>	

### SESSION I

#### THE PHOTOSPHERE

La Structure de la Photosphère	29
Jean-Claude Pecker, <i>Observatoires de Paris-Meudon et de Nice</i>	
The Current Revision of the Solar Spectrum Table $\lambda$ 2935 Å to $\lambda$ 8770 Å	89
Charlotte E. Moore-Sitterly, <i>National Bureau of Standards, Washington, D.C.</i>	
Discussion on Line Formation and Photospheric Structure	102
A. Unsöld (chairman), <i>University of Kiel</i>	
Discussion on New Instrumental Techniques	110
A. Unsöld (chairman), <i>University of Kiel</i>	
Discussion on Photospheric Motions	116
A. Unsöld, <i>University of Kiel</i>	

### SESSION II

#### THE QUIET CHROMOSPHERE

The Theory of the Chromospheric Spectrum	131
John T. Jefferies, <i>University of Hawaii, Honolulu</i>	
The Chromospheric Spectrum at Eclipse	151
R. Grant Athay, <i>High Altitude Observatory, Boulder, Colo.</i>	
Rocket Spectra of the Chromosphere	179
H. E. Hinteregger, <i>U.S. Air Force Research Laboratories, Bedford, Mass.</i>	
Discussion on the Quiet Chromosphere	206
R. O. Redman (chairman), <i>Cambridge, U.K.</i>	

## SESSION III

THE ACTIVE PHOTOSPHERE AND CHROMOSPHERE  
SPOTS, PLAGES, FLARES AND PROMINENCES

Spectra of Solar Activity Regions	221
A. Severny, <i>Crimean Astrophysical Observatory, Naučnyj, U.S.S.R.</i>	
About the Flare Problem	240
K. O. Kiepenheuer, <i>Fraunhofer Institut, Freiburg/Br.</i>	
Discussion on the Active Chromosphere	249
J. Evans (chairman), <i>Sacramento Peak Observatory, Sunspot, N. Mex.</i>	

## SESSION IV

## THE CORONA

The Theory of the Coronal Spectrum	273
M. J. Seaton, <i>University College, London</i>	
The Coronal Spectrum	280
Donald E. Billings, <i>High Altitude Observatory, Boulder, Colo.</i>	
Discussion on the Corona	293
R. Lüst (chairman), <i>Max Planck Institut für Astrophysik, München</i>	

## SESSION V

## PARTICLE AND RADIO EMISSION FROM THE SUN

Particle and Radio Emission from the Sun	313
E. Schatzman, <i>Institut d'Astrophysique, Paris</i>	
The Variable Solar Radio Spectrum	342
A. Maxwell, <i>Harvard Radio Astronomy Station, Fort Davis, Texas</i>	
Non-Thermal Sources and Amplified Emission in Solar Radio Bursts	398
S. F. Smerd, <i>CSIRO, Sydney</i>	
Some Aspects of the Type-IV Continuum Radiation on Decimeter Wavelengths	408
M. R. Kundu, <i>Cornell University, Ithaca, N.Y.</i>	
Discussion on Radio and Particle Emission from the Sun	413
M. Minnaert, (chairman) <i>Sterrewacht 'Sonnenborgh', Utrecht</i>
