

CONTENTS

VOLUME 1

Foreword, M. Roy	v
Preface, R. L. Smith-Rose	vii
Part I. <i>Interactions between the neutral and ionized parts of the atmosphere</i>	
1. Dynamics of the Neutral Atmosphere	
Circulation of the middle and upper atmosphere, W. L. Webb	1
Planetary waves in the stratosphere and their upward propagation, B. W. Boville	20
Tidal oscillations, shorter-period gravity waves, and shear waves, C. O. Hines	30
Turbulence in the lower thermosphere, W. G. Elford, R. G. Roper	42
2. Movements of Ionization Irregularities	
Travelling ionospheric disturbances, L. H. Heisler	55
Comparison of ionospheric drift velocities by the spaced receiver technique with neutral winds from luminous rocket trails, J. W. Wright, L. S. Fedor	67
Mesures de vents ionosphériques au moyen d'un radar météorique, A. Spizzichino	73
Turbulent and wave structures in the distribution of ionization in the D region, E. E. Gossard	76
Motion of artificial ion clouds in the upper atmosphere, G. Haerendel, R. Lüst, E. Rieger	77
The influence of ionization on movement of the atmosphere at F region heights, and a suggested explanation of the general eastward rotation of the atmosphere at these heights, D. F. Martyn	87
3. Wind shears and sporadic E layer	
Survey of sporadic E processes, J. D. Whitehead	89
Measured wind shears and electron densities, J. F. Bedinger, L. G. Smith	100
Profiles of winds in the lower thermosphere by the gun-launched probe technique and their relation to ionospheric sporadic E, J. W. Wright, C. H. Murphy, G. V. Bull	113
Composition measurements of sporadic E in the nighttime lower ionosphere, R. S. Narcisi, A. D. Bailey, L. Della Lucca	123

CONTENTS

Rocket results on sporadic E layers and their interpretation, L.R.O. Storey, A. P. Willmore	124
The wind shear theory of the formation of temperate zone sporadic E layers, W. I. Axford	126
Laboratory measurements of ionospheric ion-molecule reactions, E. E. Ferguson, F. C. Fehsenfeld, A. L. Schmeltekopf	135
Parameters of the low ionosphere at night deduced from parachute borne blunt probe measurements, L. C. Hale	140
Aeronomy of the lower ionosphere, A. P. Mitra	152
Laboratory measurements of electron-ion recombination coefficients, M. A. Biondi	154
 4. Photochemistry and transport of minor mesosphere constituents	
The problem of sodium distribution, T. M. Donahue	165
The average distribution and time variation of ozone in the stratosphere and mesosphere, J. London	172
Ion composition of the mesosphere, R. S. Narcisi	186
Ionospheric implications of minor mesospheric constituents, G. C. Reid	197
 5. Stratospheric-ionospheric coupling	
Present research aspects in ionosphere-stratosphere coupling effects, E. A. Lauter	212
The morphology of winter anomaly of absorption, W. Dieminger, G. Rose, H. Schwentek, H. U. Widdel	228
Mesospheric ionization changes and their causes, J. B. Gregory	240
Mise en évidence au moyen de la diffusion incohérente des collisions entre particules ionisées et particules neutres, M. Petit, P. Waldteufel	241
Ionization changes coupled to stratospheric effects, A. H. Shapley	245
Rocket ionization measurements on a winter day of high absorption, S. A. Bowhill, E. A. Mechtly, C. F. Sechrist, L. G. Smith	246
The vertical drift of charged particles as a possible cause of variations in the ionospheric absorption, P. Tříška	247
Electronic component and collision interaction in the D region, K. Rauer	254
 6. Turbopause changes and their consequences	
Turbopause processes and effects, F. S. Johnson	262
Turbulence and eddy coefficients deduced from vapor trails, O. R. Coté	270
Investigations of the turbulence in the mesosphere determined from rocket measurements, H. -R. Lehmann	277
Ionospheric evidence for composition changes, H. Rishbeth	284
The part of radiation in the heat regime of the atmospheric layer from 30 to 100 km, K. Y. Kondratyev, G. M. Shved	288
The neutral composition of the lower thermosphere, A. O. Nier, A. E. Hedin	311

Part II. *Ionosphere and Airglow*

Measurements of night glow from the Cosmos 92 satellite, V. A. Krasnopolsky, A. I. Lebedinsky	315
The earth's ultraviolet spectrum according to the measurements from the Cosmos 65 satellite, A. I. Lebedinsky, V. A. Iozenas, V. A. Krasnopolsky, A. P. Kuznetsov	328
Some results concerning the principal airglow lines as measured from the OGO-II satellite, E. I. Reed, J. E. Blamont	337
On space correlation of night sky emissions, T. M. Tarasova	353
Ion composition and effective recombination coefficient variations in the ionosphere, G. S. Ivanov-Kholodny	362
Ion composition variations during a day at heights of 400-1000 km according to measurements on the satellite Electron 2, V. G. Istomin	368
Variations in the position of mirror points of electrons with energies > 40 keV, O. L. Vaisberg	
Absorption of ultraviolet solar radiation in the upper atmosphere near the main ionization maximum, according to measurements of photoemission by means of an earth satellite, B. N. Gorozhankin, K. I. Gringauz, N. M. Shutte	369
On the role of corpuscular radiation in the formation of the lower ionosphere (below 100 km), V. F. Tulinov	378
Direct measurements of ion and electron concentration in the stratosphere and the mesosphere, I. A. Bragin	386
Comparison of ionospheric probe techniques, W. J. Heikkila, J. A. Fejer, J. Hugill, W. Calvert	391
Low frequency probe measurements in the ionosphere, J. K. E. Tunaley, T. R. Kaiser	395
Measurements of electron density in the upper ionosphere by propagation measurements between sections of a high altitude rocket, J. S. Nisbet, T. P. Quinn, J. Widmaier	407
Equatorial nighttime E region ionization sources, F. De Mendonça, L. G. Meira Jr.	417
A Langmuir probe for the measurement of electron density and electron temperature in the ionosphere, S. Prakash, B. H. Subbaraya	426
Investigation of electrical phenomena in the equatorial ionosphere, M. Smiddy, R. C. Sagalyn	427
The composition of the lower ionosphere during the 1965 Leonid meteor shower, R. S. Narcisi, A. D. Bailey, L. Della Lucca	428
Experimental investigation of the nighttime E region, R. C. Sagalyn, M. Smiddy, W. P. Sullivan	446
The E region at sunrise: 1. Ionization by Lyman- α , L. G. Smith	448
The E layer at sunrise: 2. Effective recombination coefficients, S. A. Bowhill, P. Paramasivaiah	464
Direct electron density measurements in the ionosphere below 200 km, P. Bross, K. G. Jacobs, K. Rawer	466
	467

Layer structure in the electron temperature profile in the ionosphere, K. Hirao	477
Plasma waves in the ionosphere, J. Ohtsu	479
Measurements of ionospheric electron density by gyro-plasma probe, H. Oya, T. Obayashi	480
The measured impedance of a dipole antenna in the ionosphere, A.R. Molozzi, J. R. Richardson	489
Direct measurements bearing on the question of the nighttime heating mechanism in the ionosphere, A. F. Nagy, T. B. Lee, J. C. G. Walker	506
Evidence for a nighttime westward current in the equatorial E region, B. B. Balsley	508
Ambipolar diffusion of a plasma cloud in a magnetic field, G. Haerendel, M. Scholer	509
A systematic height discrepancy between simultaneous Alouette I and incoherent scatter electron density profiles, R. Cohen, T. E. VanZandt	515
On the decay of the ionospheric airglow 6300 Å line at night, W. Swider	516
 Part III. <i>Magnetosphere and Aurora</i>	
Thermal plasma measurements within the magnetosphere, G. P. Serbu, E. J. R. Maier	527
Quiet magnetosphere at the distance $\sim 10R_e$ according to the Electron-2 and Electron-4 observation data, E. G. Eroshenko	535
Low energy solar protons and the magnetosphere, C. O. Bostrom, D. J. Williams	547
A two-dimensional model of the magnetosphere, Yu. S. Sigov	550
Evidence of laminar structure and periodicity in the outer radiation belt, A. Lundbak	555
Observation of the electron flux by L-3 rockets, S. Nakagawa, M. Tsukuda, A. Sasaki, K. Nagata, T. Doke	572
On the Coulombic interaction influence upon the electron distribution in the radiation belts at low altitudes in the magnetic anomaly region, E. V. Gortchakov, A. V. Gurevitch, G. A. Timofeev	573
The structure of the earth's proton radiation belts according to the data of the "Electron" series of satellites, S. N. Vernov, P. V. Vakulov, S. N. Kuznetsov, Yu. I. Logatchev, A. G. Nikolaev, E. N. Sosnovets, V. G. Stolpovsky	577
Photon spectrums produced by bremsstrahlung of electrons precipitated on the top of the atmosphere, O. R. Santochi, J. C. Ceballos, J. R. Manzano	587
Résultats préliminaires sur la propagation TBF dans la basse magnétosphère, obtenus par le satellite FR-1, L. R. O. Storey	588
Early results from the topside sounder in the Alouette II satellite, G. L. Nelms, G. E. K. Lockwood	604

Ion composition from VLF phenomena observed by Alouette I and II, R. E. Barrington, D. J. McEwen	624
Mesure du rayonnement X auroral, F. Cambou, F. Cotin, H. Rème	634
Energy variations of auroral electrons according to balloon measurements, A. Bewersdorff, J. Dion, J. P. Legrand, E. Keppler, G. Kremser, W. Riedler	645
Far ultra violet auroral spectra, Wm. G. Fastie, R. E. Miller, R. C. Isler	654
Direct measurements of the ionizing flux in different types of auroral forms, J. C. Ulwick, W. P. Reidy, K. D. Baker	656
Charge densities and temperatures measured in active auroras, K. D. Baker, W. Pfister, J. C. Ulwick	665
