SECTION V MONITORING OF GLOBAL THUNDERSTORM ACTIVITY

V-1 <i>Monitoring of global thunderstorm activity</i> (E. T. PIERCE)	3
V-2 <i>Investigation on the results of the observation using the Pierce-Golde type lightning flash counter in Japan</i> (S. FIJITAKA, T. KAWAMURA, and S. TSURUMI)	19
V-3 <i>A lightning counter to distinguish between ground and cloud flashes</i> (K. S. KREIELSHEIMER and D. LODGE-OSBORN)	29
V-4 <i>Present status of lightning flash counter observations</i> (F. HORNER)	43
V-5 <i>Some observations of electric field variations following lightning discharges</i> (ST. MICHNOWSKI)	51
V-6 <i>Relation of ELF noise and Schumann resonances to thunderstorm activity</i> (C. POLK)	55
V-7 <i>Schumann resonances and worldwide thunderstorm activity</i> (T. OGAWA, Y. TANAKA, and M. YASUHARA)	85
V-8 <i>Some lightning discharge characteristics at extremely low-frequencies determined from 'slow tail' measurements</i> (H. G. HUGHES)	93

V-9	<i>Investigations of global thunderstorm activity from the Ariel III satellite</i> (R. B. BENT)	111
V-10	<i>Locating global thunderstorm activity by satellite</i> (R. J. MASSA and S. C. CORONITI)	129
SECTION VI SIMULATION OF ATMOSPHERIC ELECTRICAL PHENOMENA		
VI-1	<i>Conductivity of electrostatic plumes and electrostatic turbulence in insulating fluids</i> (S. A. COLGATE)	143
VI-2	<i>Electrostatic forces between ice crystals situated in electric fields</i> (C. P. R. SAUNDERS)	151
VI-3	<i>On the role of the atmosphere's fair-weather electric field in the development of thunderstorm electricity</i> (J. D. SARTOR)	161
VI-4	<i>Electrode effect: comparison of theory and measurement</i> (W. A. HOPPEL)	167
VI-5	<i>Analog simulation of global electric currents</i> (R. V. ANDERSON and S. G. GATHMAN)	183
VI-6	<i>Model for ball lightning</i> (G. A. DAWSON and R. C. JONES)	193
VI-7	<i>Decaying lightning channels, bead lightning, and ball lightning</i> (M. A. UMAN)	199
VI-8	<i>Lightning discharge simulation and triggered lightning</i> (M. M. NEWMAN)	213
SECTION VII PLANETARY ATMOSPHERIC ELECTRICITY		
VII-1	<i>Electric fields in space—A survey</i> (C. G. FÄLTHAMMAR)	225
VII-2	<i>Global electrical structure</i> (W. L. WEBB)	245
VII-3	<i>Tentative synthesis of electrohydrodynamic phenomena in the Earth's atmosphere—Theoretical development</i> (J. CARSTOIU)	277
VII-4	<i>Electric field in the ionosphere—A theory of its origin and effect</i> (H. K. SEN)	291
VII-5	<i>Electrostatic instability in the magnetosphere as a cause for electric field</i> (C. S. LIU)	303

VII-6	<i>Turbulent conductivities in the magnetosphere</i> (F. V. CORONITI)	309
VII-7	<i>Electrical nature in the planetary upper atmosphere</i> (T. OBAYASHI)	325
	<i>Invited short contributions:</i>	
VII-7a	<i>Possible effects of an extensive air shower</i> (J. NISHIMURA)	333
VII-7b	<i>Ion chemistry in the region of 80 km</i> (E. C. WHIPPLE)	337
VII-7c	<i>Transition region 30 km to 70 km</i> (E. T. PIERCE)	339
VII-8	<i>Ionospheric electrodynamics</i> (R. LÜST)	341
	<i>Invited short contributions:</i>	
VII-8a	<i>Heating of electrons in the 85 to 120 km region</i> (H. K. SEN)	343
VII-8b	<i>Field aligned currents</i> (C. G. FÄLTHAMMAR)	345
VII-9	<i>Magnetosphere and interplanetary space</i> (C. G. FÄLTHAMMAR)	349
	<i>Invited short contributions:</i>	
VII-9a	<i>Relation between the interplanetary and magnetospheric electric field</i> (A. NISHIDA)	353
VIII-9b	<i>Electric field and currents</i> (F. V. CORONITI)	359
VII-10	<i>Electric fields in space and on lunar surface</i> (W. I. LINLOR)	363
VII-11	<i>Principle of planetary unipolar generators</i> (C. P. SONETT)	373
 SECTION VIII PLANETARY ATMOSPHERIC ELECTRICITY MEASUREMENTS		
VIII-1	<i>Electric fields in the upper atmosphere</i> (C. HAERENDEL and R. LÜST)	381
VIII-2	<i>Quadruple probe for D.C. electric field measurement in space</i> (H. OYA)	401
VIII-3	<i>Investigation of the operation of a double probe electric field detector</i> (U. FAHELSON)	413

VIII-4	<i>Electric field measurements in an aurora</i> (F. S. MOZER)	423
VIII-5	<i>Balloon measurements of ionospheric electric fields</i> (P. J. KELLOGG and M. WEED)	431
VIII-6	<i>Discussion on methods of measuring electric fields in the ionosphere</i> (led by C. G. FÄLTHAMMAR)	437
VIII-7	<i>On water cluster ions in the ionosphere D region</i> (R. S. NARCISI)	447
VIII-8	<i>Measurement plan of atmospheric electric field for altitudes between 60 and 0 kilometers</i> (T. OGAWA, Y. TANAKA, and Y. TAMURA)	461
VIII-9	<i>Air-Earth current density in the stratosphere</i> (K. UCHIKAWA)	469
VIII-10	<i>Electric field and conductivity measurements in the stratosphere</i> (G. W. HOFFMANN and V. D. HOPPER)	475
VIII-11	<i>Balloon observation of atmospheric electrical conductivity up to 24 km in altitude</i> (H. ISHIKAWA, Y. MORITA, and M. TAKAGI)	485
	<i>Index</i>	497
