Chapter 1. The Thermosphere—The Earth's Outermost Atmosphere

SYDNEY CHAPMAN

1.1 Outline Description of the Earth's Atmosphere.....	1
1.2 The Boundary between the Earth's Atmosphere and the Solar Corona.....	7
References.....	16

Chapter 2. The Properties and Constitution of the Upper Atmosphere

M. NICOLET

2.1 The Atmospheric Regions.....	17
2.2 Interrelation between Pressure, Temperature, and Composition.....	22
2.3 Composition of the Homosphere.....	25
2.4 The Dissociation of Molecular Oxygen.....	29
2.5 The Problem of Diffusion.....	35
2.6 Thermal Conductivity in the Thermosphere.....	48
2.7 Constitution of the Upper Atmosphere.....	54
References.....	69

Chapter 3. The Upper Atmosphere Studied by Rockets and Satellites

HOMER E. NEWELL, Jr.

3.1 Introduction.....	73
3.2 Atmospheric Structure.....	74
3.3 Winds.....	97
3.4 Charge Densities in the Ionosphere.....	102
3.5 Earth's Magnetic Field.....	108
3.6 Chemical and Ion Composition of the Upper Atmosphere.....	111
3.7 Atmospheric Contamination Experiments.....	118
3.8 Night Airglow.....	119
3.9 Auroral Particles.....	120
3.10 Cosmic Rays.....	122
3.11 Micrometeors.....	123
3.12 Discussion.....	125
References.....	129

Chapter 4. The Sun's Ionizing Radiations

HERBERT FRIEDMAN

Introduction.....	133
4.1 Solar Levels.....	135
4.2 Rocket Measurements of the Quiet Solar Spectrum.....	151
4.3 Interaction of Solar Radiation with the Atmosphere.....	178
4.4 Formation of the Ionosphere.....	186
4.5 Solar Flares.....	193
4.6 X-Ray and Ultraviolet Radiation in the Night Sky.....	202

4.7 Atmospheric Densities and Composition from Radiation Measurements.....	208
4.8 Auroral X-Rays.....	214
References.....	215

Chapter 5. The Airglow

D. R. BATES

5.1 Nightglow.....	219
5.2 Twilightglow.....	251
5.3 Dayglow.....	260
References.....	261

Chapter 6. General Character of Auroras

D. R. BATES

6.1 Appearance.....	269
6.2 Classification of Auroral Forms.....	271
6.3 Altitude.....	272
6.4 Other Features of the Geometry	278
6.5 Geographical Distribution.....	280
6.6 Temporal Distribution.....	284
6.7 Relation with Other Geophysical Phenomena.....	288
6.8 Motion of Aurora along Lines of Latitude.....	293
References.....	294

Chapter 7. The Auroral Spectrum and its Interpretation

D. R. BATES

7.1 Identifications.....	298
7.2 Absolute Intensity.....	304
7.3 Relative Intensities.....	307
7.4 Variations in the Auroral Spectrum.....	310
7.5 Theory of the Auroral Spectrum.....	316
7.6 Temperature.....	339
7.7 Electric Fields.....	343
References.....	348

Chapter 8. Radar Studies of the Aurora

HENRY G. BOOKER

8.1 Introduction.....	355
8.2 Pulse Radar Experiments.....	356
8.3 Analysis of Observations in Terms of Azimuth.....	359
8.4 The Distribution of Auroral Echoes with Range.....	360
8.5 Analysis of Auroral Echoes in Terms of Height.....	360
8.6 Diurnal, Seasonal, and Sunspot Cycle Variations of Auroral Echoes.....	362
8.7 Motion Associated with Auroral Echoes.....	362
8.8 Frequency Dependence of Auroral Echoes.....	366
8.9 Polarization of Auroral Echoes.....	366
8.10 The Importance of Approximate Perpendicularity between the Earth's Magnetic Field and the Radius from the Radar to the Aurora.....	366
8.11 Theories of Auroral Radar Echoes.....	369
8.12 The Cause of Movement in the Location of Auroral Echoes.....	373
References.....	374

Chapter 9. The Ionosphere

J. A. RATCLIFFE AND K. WEEKES

9.1 Introduction	378
9.2 Theory of the Origin and Shape of Layers of Electrons.....	380
9.3 The Ionosphere as a Dynamo and a Motor.....	392
9.4 Theory of Wave Propagation through the Ionosphere.....	397
9.5 The Undisturbed <i>D</i> Region.....	403
9.6 The Undisturbed <i>E</i> Layer.....	414
9.7 The Undisturbed <i>F1</i> Layer (or Ledge).....	425
9.8 The Undisturbed <i>F2</i> Layer.....	427
9.9 The Collision Frequency of Electrons.....	441
9.10 Horizontal Irregularities and Movements.....	445
9.11 Disturbances and Storms in the Ionosphere.....	450
References.....	456

Chapter 10. The Upper Atmosphere and Geomagnetism

E. H. VESTINE

10.1 Solar Daily Variation, S_v	471
10.2 Lunar Daily Magnetic Variation.....	490
10.3 Magnetic Storms.....	495
10.4 Minor Magnetic Disturbances.....	506
10.5 Magnetic Pulsations.....	508
10.6 Geomagnetism in Relation to other Geophysical Phenomena.....	509
References.....	511

Chapter 11. The Upper Atmosphere and Meteors

J. S. GREENHOW AND A. C. B. LOVELL

11.1 Introduction.....	513
11.2 Techniques of Measurement.....	514
11.3 Evaporation of Meteors in the Upper Atmosphere.....	515
11.4 Scattering of Radio Waves from Meteor Trails.....	518
11.5 Total Meteor Influx	520
11.6 Determination of Scale Heights and Densities.....	528
11.7 Winds in the Upper Atmosphere: Determination by Meteor Techniques.....	536
11.8 Recombination and Diffusion of Ionization in Meteor Trails.....	544
References	548

Chapter 12. Advances during the IGY 1957/58

BY AUTHORS OF PREVIOUS CHAPTERS

12.1 The Van Allen Radiation Belts That Surround the Earth.....	551
12.3 The Upper Atmosphere Studied by Rockets and Satellites.....	555
12.4 The Sun's Ionizing Radiations.....	556
12.8 Radar Studies of the Aurora.....	558
12.9 The Ionosphere.....	558
12.11 The Upper Atmosphere and Meteors.....	561

AUTHOR INDEX.....	565
SUBJECT INDEX.....	579
