|--|-------------|
| Preface | xiii |
| Acknowledgements | xv |
| 1 Introduction | 1 |
| 1.1 A Brief Historical Account | 1 |
| 1.2 Significance of the Study of Cosmic Magnetic Fields | 2 |
| 1.3 Electromagnetic Properties of Celestial Bodies | 5 |
| 1.3.1 Electrical Conductivity | 5 |
| 1.3.2 Magnetic Coupling | 6 |
| 1.4 Present Status of the Study of Cosmic Magnetic Fields . . | 7 |
| 2 Principles of Measurement of Magnetic Fields of Celestial Bodies | 9 |
| 2.1 Zeeman Effect | 10 |
| 2.1.1 Basic Principles | 10 |
| 2.1.2 Patterns of Zeeman Splitting | 14 |
| 2.1.3 Relative Intensities of Zeeman Components | 14 |
| 2.1.4 Paschen-Back Effect | 15 |
| 2.2 Inverse Zeeman Effect | 16 |
| 2.2.1 Direct and Inverse Zeeman Effects | 16 |
| 2.2.2 Representation of Polarized Radiation | 17 |
| 2.2.3 Unno's Theory of Spectral Line Formation in a Magnetic Field | 21 |
| 2.2.4 Stepanov's Theory of Spectral Line Formation in the Magnetic Field | 24 |
| 2.3 Hanle Effect | 26 |
| 2.4 Faraday Rotation | 28 |
| 2.5 Radio Observations | 30 |
| 2.5.1 Non-Burst Solar Radio Emission | 30 |
| 2.5.2 Solar Radio Bursts | 31 |

| | |
|---|-----------|
| 2.5.3 Occultation of External Radio Sources | 32 |
| 2.6 Synchrotron Radiation | 32 |
| 2.7 Morphological Studies | 34 |
| 2.8 Theoretical Calculations and Other Methods | 35 |
| 2.8.1 Calculation of the coronal magnetic field | 36 |
| 2.8.2 Equipartition of Magnetic and Kinetic Energies . . | 37 |
| 3 Techniques for the Measurement of Magnetic Fields of Celestial Bodies | 41 |
| 3.1 Apparatus for Measuring Sunspot Magnetic Fields | 41 |
| 3.1.1 Basic Principles | 41 |
| 3.1.2 Sources of Error | 44 |
| 3.1.3 Theoretical Interpretation | 45 |
| 3.1.4 Seares' Formula | 47 |
| 3.2 Photoelectric Magnetographs | 48 |
| 3.2.1 Fundamental Idea | 50 |
| 3.2.2 Construction | 51 |
| 3.2.3 Interpretation of Magnetographic Recordings . . | 53 |
| 3.2.4 New Instruments | 56 |
| 3.3 Videomagnetographs | 59 |
| 3.4 Vector Magnetographs | 60 |
| 3.4.1 Significance of Observation of the Transverse Component | 61 |
| 3.4.2 Fundamental Difficulty | 62 |
| 3.4.3 Basic Principles | 65 |
| 3.4.4 Comparison of Vector Magnetographs of Two Types | 72 |
| 3.4.5 Methods of Calibration and Problem of 180° Ambiguity | 74 |
| 3.5 Stokesmeters | 78 |
| 3.5.1 Basic Principles | 78 |
| 3.5.2 Derivation of Information on the Magnetic Vector from Stokes Profiles | 78 |
| 3.5.3 Stokes Polarimetry | 82 |
| 3.6 Influence of Stray Light and Instrumental Polarization . | 87 |
| 3.7 Selection of Magneto-Sensitive Spectral Lines | 90 |
| 4 The Magnetic Fields of Sunspots | 95 |
| 4.1 Basic Characteristics | 96 |
| 4.2 Orientation | 100 |
| 4.2.1 Angle Between Magnetic Lines of Force and Line of Sight | 100 |

| | |
|--|------------|
| 4.2.2 Azimuth | 103 |
| 4.3 Fine Structures | 106 |
| 4.4 3-D Models | 111 |
| 4.4.1 Fan-Shaped Model | 111 |
| 4.4.2 Configuration of Magnetic Field Lines on the Spot Surface Plane | 113 |
| 4.4.3 Possible Twisting of Magnetic Field Lines | 114 |
| 4.4.4 Inclination of Magnetic Field Lines | 115 |
| 4.5 Sunspot Magnetic Fields and the Evershed Effect | 119 |
| 4.6 Magnetic Fields of Sunspot Groups and Complexes of Activity | 122 |
| 4.6.1 Magnetic Types of Spot Groups | 122 |
| 4.6.2 Magnetic Field Configurations of Complex Spots and Spot Groups | 123 |
| 4.6.3 Magnetic Fields of Complexes of Activity | 124 |
| 4.7 Influence of Magnetic Fields on Sunspot Spectra | 124 |
| 5 Background and Local Magnetic Fields on the Solar Surface | 129 |
| 5.1 Solar Background Magnetic Field | 129 |
| 5.1.1 "Hidden" Magnetic Fields | 130 |
| 5.1.2 Infrared Diagnostics | 131 |
| 5.1.3 Correlation of the Background Field with Other Magnetic Structures | 132 |
| 5.2 Small-Scale Magnetic Fields | 133 |
| 5.3 Magnetic Fields of Active Regions | 138 |
| 5.4 Large-Scale Magnetic Fields | 144 |
| 5.5 Solar Flares and Magnetic Fields | 150 |
| 5.5.1 Flare Energy Source and Storage | 150 |
| 5.5.2 Sudden Release of Flare Energy | 151 |
| 5.5.3 Changes of Local Magnetic Fields Before and After Flares | 153 |
| 5.5.4 Flares and Cancelling Magnetic Fields | 156 |
| 5.6 Magnetic Fields of Solar Prominences | 158 |
| 6 Magnetic Fields of the Solar Atmosphere | 163 |
| 6.1 Photospheric Magnetic Fields | 163 |
| 6.1.1 Granular Magnetic Fields | 163 |
| 6.1.2 Two-Component Model | 165 |
| 6.1.3 Physics of Photospheric Flux Tubes | 166 |
| 6.2 Chromospheric Magnetic Fields | 168 |

| | | |
|----------|---|------------|
| 6.3 | Coronal Magnetic Fields | 174 |
| 6.3.1 | Inferences and Measurements | 174 |
| 6.3.2 | Theoretical Calculations | 176 |
| 6.3.3 | Transient Changes | 178 |
| 6.4 | Magnetic Field Gradient of the Solar Atmosphere | 178 |
| 6.4.1 | Methods of Measurement | 179 |
| 6.4.2 | Some Problems Associated With the Magnetic Field Gradient | 183 |
| 6.4.3 | Theoretical Limit of the Sunspot Magnetic Field Gradient | 183 |
| 7 | The General Magnetic Field of the Sun | 185 |
| 7.1 | Strength of the General Magnetic Field | 186 |
| 7.2 | Fine Structures of the General Magnetic Field | 188 |
| 7.3 | Polarity Reversals of the General Magnetic Field | 191 |
| 7.4 | Rapid Changes of the General Magnetic Field | 194 |
| 7.5 | The Global Magnetic Field of the Sun | 197 |
| 7.5.1 | Net Magnetic Flux of the Solar Disk | 197 |
| 7.5.2 | Characteristics of the Global Field | 198 |
| 7.5.3 | Rapid Changes of the Global Field | 201 |
| 7.6 | The Internal Magnetic Field of the Sun | 203 |
| 8 | Magnetic Fields of the Solar System | 207 |
| 8.1 | Magnetic Field of Interplanetary Space | 207 |
| 8.1.1 | Early Speculations | 207 |
| 8.1.2 | The Coronal Expansion | 209 |
| 8.1.3 | The Sectoral Structure | 210 |
| 8.2 | Magnetospheres and the Heliosphere | 212 |
| 8.2.1 | The Magnetosphere of the Earth | 212 |
| 8.2.2 | Planetary Magnetospheres | 213 |
| 8.2.3 | The Heliosphere | 215 |
| 8.3 | The Lunar Magnetic Field | 216 |
| 8.3.1 | Space and <i>in situ</i> Measurements | 216 |
| 8.3.2 | Origin | 217 |
| 8.4 | Planetary Magnetic Fields | 219 |
| 8.4.1 | Methods of Measurement | 220 |
| 8.4.2 | A Brief Account of Observational Results | 220 |
| 9 | Stellar Magnetic Fields | 223 |
| 9.1 | Observations of Stellar Magnetic Fields | 224 |
| 9.1.1 | The Pioneering Work of Babcock | 224 |

| | |
|---|------------|
| 9.1.2 Magnetographic Observations | 225 |
| 9.1.3 Diagnostic Methods | 226 |
| 9.2 Characteristics of Magnetic Stars | 228 |
| 9.3 Chemical Composition of Magnetic Stars | 232 |
| 9.3.1 Anomalies in Chemical Composition | 232 |
| 9.3.2 Inhomogeneous Distribution of Chemical Elements on the Surface of Magnetic Stars | 234 |
| 9.4 Models of Magnetic Stars | 235 |
| 9.5 The Magnetic Field of Pulsars | 240 |
| 9.5.1 Discovery and Identification of Pulsars | 240 |
| 9.5.2 Rotation and the Magnetic Field | 241 |
| 9.5.3 Superstrong Magnetic Fields | 242 |
| 9.5.4 Magnetic Dipole Model of Pulsars | 244 |
| 9.6 The Magnetic Field of White Dwarfs | 245 |
| 10 Magnetic Fields of Galaxies and Intergalactic Space | 251 |
| 10.1 The Interstellar Magnetic Field | 251 |
| 10.1.1 Evidence of Existence and Indirect Measurements | 252 |
| 10.1.2 Direct Measurements | 254 |
| 10.1.3 Structure of the Galactic Magnetic Field | 257 |
| 10.2 Magnetic Fields of Extragalactic Nebulae | 262 |
| 10.2.1 The Magellanic Clouds | 263 |
| 10.2.2 Spiral Galaxies | 263 |
| 10.2.3 Clusters of Galaxies | 265 |
| 11 Some Theoretical Problems of Cosmic Magnetic Fields | 269 |
| 11.1 Theory of Spectral Line Formation in the Magnetic Field . | 269 |
| 11.1.1 A Brief Historical Retrospect | 270 |
| 11.1.2 Matrix Representation of the Transfer Equations . | 271 |
| 11.1.3 Various Solutions of Equations of Transfer of Po- larized Radiation | 273 |
| 11.2 Theory of the Sunspot Magnetic Field | 279 |
| 11.2.1 Basic Equations | 280 |
| 11.2.2 The Origin and Decay of the Sunspot Magnetic Field | 281 |
| 11.2.3 The Cooling of Sunspots | 282 |
| 11.2.4 The Stability of Sunspots | 284 |
| 11.3 Theory of the Solar Activity Cycle | 286 |
| 11.3.1 Magnetic Buoyancy and Birth of Sunspots | 287 |
| 11.3.2 Drift of Sunspot Areas | 287 |
| 11.3.3 Interpretation of the Solar Magnetic Cycle | 291 |

| | |
|--|------------|
| 11.4 Magnetic Fields and the Structure and Evolution of Stars | 296 |
| 11.5 The Origin of Cosmic Magnetic Fields | 301 |
| 11.5.1 Rotator Theory | 301 |
| 11.5.2 Battery Theory | 302 |
| 11.5.3 Fossil Theory | 303 |
| 11.5.4 Dynamo Theory | 304 |
| 11.6 Magnetic Fields and Cosmic Rays | 308 |
| 11.6.1 Motion of Cosmic Ray Particles | 308 |
| 11.6.2 Acceleration of Cosmic Ray Particles | 309 |
| References | 311 |
