

Preface xiii

Tutorial: Solar

R. L. Moore 1

Tutorial: Magnetosphere

J. L. Burch 9

I. Three-Dimensional Structure and Turbulence in Solar System Plasmas

How is free magnetic energy built up and held in the solar atmosphere?

Magnetic Free-Energy in the Solar Atmosphere

B. C. Low 21

Optical Disk Processing of Solar Images

Alan Title and Theodore Tarbell 31

An Imaging Vector Magnetograph for the Next Solar Maximum

Richard C. Canfield and Donald L. Mickey 37

Emergence of Anchored Flux Tubes Through the Convection Zone

George H. Fisher, Dean-Yi Chou, and Alexander N. McClymont 47

Magnetoconvection on the Solar Surface

G. W. Simon, A. M. Title, K. P. Topka, T. D. Tarbell, R. A. Shine, S. H. Ferguson

H. Zirin, and the SOUP Team 53

What new insight can be gained by understanding the three-dimensional structure and temporal variations of macroscale and microscale plasma and electromagnetic phenomena in the solar wind and in planetary magnetospheres?

Simulating the Magnetosphere: The Structure of the Magnetotail

Raymond J. Walker, Tatsuki Ogino, and Maha Ashour-Abdalla 61

Instrumentation for Global Magnetospheric Imaging via Energetic Neutral Atoms

R. W. McEntire and D. G. Mitchell 69

Spectroscopic Measurements of Solar Wind Parameters Near the Sun

John L. Kohl, Heinz Weizer, and Stefano Livi 81

Test Particle Measurements in Space Plasmas

Carl E. McIlwain 89

Compressible Dynamic Alignment

R. B. Dahlburg, J. M. Picone, and J. T. Karpen 95

Thermal Instability in Magnetized Solar Plasmas

J. T. Karpen, S. K. Antiochos, J. M. Picone, and R. B. Dahlburg 99

The Plasma Environment at Saturn: Progress and Problems

John D. Richardson 105

What is the role of turbulence in the transfer of energy in solar wind and magnetospheric plasmas?

Numerical Simulation of Interplanetary and Magnetospheric Phenomena: The Kelvin-Helmholtz Instability

Melvyn L. Goldstein, D. Aaron Roberts, and William H. Matthaeus 113

MHD Intermediate Shocks and the Magnetopause

C. C. Wu 127

*What determines the composition and charge state of solar-wind and magnetospheric ions?***Composition of the Solar Wind***P. Bochsler and J. Geiss* 133**Space Plasma Mass Spectroscopy Below 60 keV***D. T. Young* 143**Remote Sensing of Planetary Magnetospheres: Mass and Energy Analysis of Energetic Neutral Atoms***K. C. Hsieh and C. C. Curtis* 159**Instrumentation for Energetic Neutral Atom Imaging of Magnetospheres***E. P. Keath, G. B. Andrews, A. F. Cheng, S. M. Krimigis, B. H. Mauk, D. G. Mitchell, and D. J. Williams* 165**A 360° Field-of-View Toroidal Ion Composition Analyzer Using Time-of-Flight***D. T. Young, J. A. Marshall, J. L. Burch, S. J. Bame, and R. H. Martin* 171**II. Mass, Momentum, and Energy Release and Transfer in Solar System Plasmas***What is the magnetic energy conversion process in flares?***Energy Conversion in Solar Flares***Peter A. Sturrock* 181**The Soft X-Ray Telescope for the Solar A Mission***M. E. Bruner, L. W. Acton, W. A. Brown, R. A. Stern, T. Hirayama, S. Tsuneta, T. Watanabe, and Y. Ogawara* 187**Power Supply Process for Solar Flares***S.-I. Akasofu* 199**Imaging Solar Flares in Hard X Rays and Gamma Rays from Balloon-Borne Platforms***C. J. Crannell* 203**Is the Plasma Truly Turbulent During the Impulsive Phase of Solar Flares?***P. L. Bornmann* 209**The Evaluation of Energy Storage Mechanisms in the Gradual Phase of Solar Flares***H. A. Garcia* 213**On the Mechanical Energy Available to Drive Solar Flares***A. N. McClymont and G. H. Fisher* 219*What do solar radio bursts tell us about particle beams and wave-particle interactions in flares?***Electron Beams and Instabilities During Solar Radio Emission***Martin V. Goldman* 229**Solar Radio Burst Spectral Observations, Particle Acceleration, and Wave-Particle Interactions***Dale E. Gary and G. J. Hurford* 237**Remote Sensing of Planetary Magnetospheres: Imaging via Energetic Neutral Atoms***C. C. Curtis and K. C. Hsieh* 247**Energetic Neutral Particle Imaging of Saturn's Magnetosphere***A. F. Cheng and S. M. Krimigis* 253**Novel Methods for Active Spacecraft Potential Control***R. Schmidt, H. Arends, K. Torkar, and N. Valanvanoglou* 261*How are coronal mass ejections driven?***Driving Mechanisms for Coronal Mass Ejections***R. S. Steinolfson* 269**CME and Solar Wind Studies Using GOES Solar X-Ray Imagers and SOHO Remote Sensing***W. J. Wagner* 279**Heliospheric Remote Sensing Using the Zodiacal Light Photometers of the Helios Spacecraft***B. V. Jackson* 287

**Design Considerations for a “Solar Mass Ejection Imager”
on a Rotating Spacecraft**

B. V. Jackson, H. S. Hudson, J. D. Nichols, and R. E. Gold 291

Flux Rope Dynamics for Loop Prominences, Coronal Mass Ejections and Interplanetary Magnetic Clouds

Tyan Yeh 299

What macroscopic and microscopic processes are responsible for particle acceleration in the solar wind and in planetary magnetospheres?

Acceleration and Transport in the Plasma Sheet Boundary Layer

Maha Ashour-Abdalla and David Schriver 305

Macroscopic Magnetospheric Particle Acceleration

B. H. Mauk and C.-I. Meng 319

New Techniques for Charged Particle Measurements in the Interplanetary Medium

R. P. Lin 333

A Technique for Fully Specifying Plasma Waves

Paul M. Kintner 341

Flux Transfer Events: A Theoretical Overview

J. R. Kan 347

The Solar Wind Interaction with Non-Magnetic Bodies and the Role of Small-Scale Structures

T. E. Cravens 353

Magnetic Field and Electric Current Measurements of Critical Phenomena in Solar Wind Interactions

R. C. Elphic 367

Plasma Observations of Flux Transfer Events: Present and Future Measurements

M. F. Smith and A. D. Johnstone 379

Ion Spectrometers for Studying the Interaction of the Solar Wind with Non-Magnetic Bodies

Marcia Neugebauer 389

Critical Problems Requiring Coordinated Measurements of Large-Scale Electric Field and Auroral Distribution

L. R. Lyons and O. de la Beaujardière 399

Instantaneous Measurements of the Global High-Latitude Convection Pattern

O. de la Beaujardière and L. R. Lyons 405

Surface Waves on a Generalized Current Sheet

S. T. Suess and Z. E. Musielak 413

The ASPERA Experiment on the Soviet Phobos Spacecraft

R. Lundin, B. Hultqvist, S. Olsen, R. Pellinen, I. Liede, A. Zakharov, E. Dubinin, and N. Pissarenko 417

What are the important ring, moon, and dust interactions in planetary and cometary magnetosphere and ionosphere systems?

Dust-Plasma Interactions in Planetary Rings

C. K. Goertz 427

Cometary Dusty Gas Dynamics

T. L. Gombosi and A. Körösmezey 433

Three-Dimensional Plasma Measurements from Three-Axis Stabilized Spacecraft

S. J. Bame, R. H. Martin, D. J. McComas, J. L. Burch, J. A. Marshall, and D. T. Young 441

Polymers in Comet Comae

W. F. Huebner and D. C. Boice 453

Charged Dust in the Earth’s Magnetosphere

Mihaly Horanyi 457

Author Index 461

List of Participants 463
