INVITED PAPERS

Non-thermal phenomena of astrophysics and their relation to plasma physics

A. G. W. Cameron	1
------------------	---

Plasma Instabilities

MHD instabilities	
E. A. Frieman	17
The tearing mode	
H. P. Furth	33
Two-stream instabilities	
A. Simon	49
Velocity-anisotropy instabilities	
E. G. Harris	59

Solar Activity

Solar flares	
A. Bruzek	71
Observations of an x-ray flare: Spatial distribution and physical parameters	
G. S. Vaiana and R. Giacconi	91
Radio evidence of instabilities and shock waves in the solar corona	
J. P. Wild	119
The microstructure of sunspots	
J. M. Beckers	139
Sunspots and photospheric convection	
N. O. Weiss	153

Earth Environment

Instability phenomena of the magnetosphere	
C. F. Kennel	171
Observations of the microstructure of the earth's bow shock	
R. W. Fredricks	199
Shock waves in collisionless plasmas	
D. A. Tidman	229

Cosmic Radiation

Dynamical properties and effects of cosmic rays in the galaxy E. N. Parker	237
Particle dynamics in stochastic electromagnetic fields D. E. Hall	253
Particle acceleration in astrophysics D. G. Wentzel	271
The structure and evolution of extragalactic sources K. I. Kellermann	283
Explosions in galaxies and quasars P. A. Sturrock	297
The role of the magnetic field in star formation L. Mestel	329
Concluding remarks L. Woltjer	353

ABSTRACTS OF CONTRIBUTED PAPERS

Cosmic Radiation

Growth rates for the relativistic firehose instability A. K. Yui and P. D. Noerdlinger	357
Cosmic rays and plasma instabilities R. Kulsrud and W. Pearce	358
Anisotropies of cosmic electrons J. A. Earl and A. M. Lenchek	359
The interaction of relativistic waves and particles in the crab nebula J. D. Scargle	360
Energy spectra in synchrotron sources D. B. Melrose	361
Thermal instability resulting from synchrotron radiation M. Simon	362
Relativistic particle acceleration at neutral sheets F. Curtis Michel	363
The stability of extra-galactic jets P. D. Noerdlinger	364
Simulation of extragalactic plasma jets D. S. De Young	365
A generalization of the virial theorem and its implication on the cosmic ray spectrum A. J. Klimas and G. Sandri	366
Cosmic ray streaming in the supernova origin model F. C. Jones	367
The interstellar magnetic field strength G. L. Verschuur	368

Variability of x-ray sources H. M. Johnson	369
Supra-luminous waves in astrophysical plasmas I. Lerche	370
Instability of synchrotron radiation in a stream-plasma system P. C. W. Fung	371
Coherent radiation from a relativistic plasma R. A. Wolf and W. H. Tucker	372
<u>Earth Environment</u>	
Collisionless heating of the solar wind plasma A. Barnes	373
Helmholtz instability in the interplanetary medium L. F. Burlaga and K. W. Ogilvie	374
Self consistent boundary layer between a plasma and a magnetic field R. E. Laquey	375
Laboratory simulation of earth's bow shock wave D. L. Chubb	376
The acceleration of energetic electrons observed in the Van Allen radiation belt G. K. Parks	377
Oscillatory phenomena in the earth's magnetic tail V. Nardi	379
Transverse wave propagation and instabilities within the magnetosphere H. H. Bird and G. Schmidt	380
A guiding center Vlasov equation and its application to Alfven waves J. A. Fejer and J. R. Kan	381
Stability of a ring current in a magnetic dipole field K. Schindler and M. Soop	382
<u>Solar Activity</u>	
Heating of the solar corona N. D'Angelo	383
The models of internal magneto-acoustic gravity waves F. Winterberg and A. McLellan IV	384
General consequences of the magnetic field dissipation theory of flares T. Gold	385
A note on radiation instability as a possible mechanism for rapid dissipation of "frozen" magnetic fields O. P. Manley and S. Olbert	387
Flux reconnection at the magnetic neutral point: Some laboratory observations A. Bratenahl and C. Yeates	389
The stability of a neutral sheet with an anisotropic velocity distribution D. W. Forslund and B. Coppi	391

Nonlinear instability in two-dimensional plasma configurations H. Wobig and D. Pfirsch	392
Hectometer radio emissions observed from space R. G. Stone	394
Statistical acceleration of electrons in the solar corona: Interpretation of the moving type IV burst of 14 September 1966 A. Mangeney and C. Lacombe	396
Synchrotron deceleration of electrons and the generation of type II and type III electromagnetic radiation in solar flares A. F. Kuckes	397
Cyclotron resonance instability characteristics H. B. Liemohn and H. S. Ho	398
The Kelvin-Helmholtz instability and its application to the sunspot phenomenon R. K. Jaggi	399
Stability analysis of magnetic-field patterns near supergranulation boundaries E. J. Weber	400
<u>Plasma Physics</u>	
Nonlinear wave stability with collisionless shock application D. M. Spero	401
Observation of microturbulence in a collisionless shock J. M. W. Paul, C. C. Daughney, L. S. Holmes and R. A. Hardcastle	403
Collisionless shock waves and turbulent heating in a high voltage theta pinch G. D. Goldenbaum, A. W. DeSilva, D. F. Düchs, H. R. Griem and H. J. Kunze	404
Theoretical and experimental results on the current interruption instability A. A. Ware and J. E. Faulkner	405
Relation between radiative and material coefficients in a non-equilibrium magnetoplasma J. Heyvaerts	407
Wave-propagation in a homogeneous plasma with supra-thermal noise N. Bel and J. Heyvaerts	408
Study of the production of ortho and para vortices in the plasma coaxial accelerator W. Y. Bostick, W. Prior, L. Grunberger	411
Index	413
