

Contents

Preface	vii
1 The Earth's Radiation Belts	1
1.1 Introduction	1
1.2 High Energy Protons	3
1.3 Low Energy Protons	15
1.4 Electrons	20
1.5 Magnetic Cavity Effect on L	28
1.6 Summary	29
References	29
2 The Earth's Atmosphere	35
2.1 Introduction	35
2.2 Pressure, Temperature, and Density Relations	38
2.3 Experimental Measurements	40
2.4 Atmospheric Density Variations	49
2.5 Atmospheric Composition	55
2.6 Atmospheric Density	63
2.7 Conclusions	66
References	67
3 The Earth's Ionosphere	71
3.1 Introduction	71
3.2 D Region	78
3.3 E Region	81
3.4 F Region	85
3.5 High Ionosphere	108
3.6 Ionospheric Winds	116

3.7	Wave Particle Interactions	118
3.8	Summary of Ionosphere Electron Densities	120
	References	122
 4	 The Sun	 127
4.1	Introduction	127
4.2	Abundances of the Elements on the Sun	130
4.3	Origin of the Sun	133
4.4	Transport of Energy on the Sun	135
4.5	The Photosphere	138
4.6	The Chromosphere	141
4.7	The Corona	142
4.8	The Magnetic Field	145
4.9	Sunspots	148
4.10	The Quiet Sun	152
4.11	Solar Flares	159
	References	186
 5	 Interplanetary Space	 191
5.1	Introduction	191
5.2	The Solar Wind	195
5.3	Magnetic Fields	206
5.4	Solar-Proton Streams	221
5.5	Solar Wind Temperature	226
5.6	Shock Waves	229
5.7	Magnetic Field Power Distribution	233
5.8	Cosmic Ray Modulation by Interplanetary Magnetic Fields	235
5.9	Propagation of Low Energy Solar Protons and Electrons	242
5.10	Solar Wind Interactions with the Moon	246
	References	249
 6	 The Earth's Magnetic Cavity (Magnetosphere)	 255
6.1	Introduction	255
6.2	Magnetic Field Measurements	256
6.3	Charged Particles	261
6.4	Magnetic Storms	263
6.5	The Aurora	271

6.6	Theory	278
6.7	Conclusions	287
	References	290

Appendix—Definition of Symbols		293
