

CONTENTS

Preface	V
SECTION I: F2 LAYER PHENOMENA	
Equatorial anomalies in the F2 layer of the ionosphere by Sir EDWARD APPLETON (Edinburgh)	3
Some F layer phenomena at Tsumeb, South West Africa by W. DIEMINGER AND G. LANGE-HESSE (Lindau)	8
Characteristic features of world distribution of F2 layer maximum ionization by P. HERRINCK (Leopoldville)	14
Analysis of the maximum electron density of the F2 layer at Leopoldville-Binza by P. HERRINCK (Leopoldville)	18
An investigation of the distribution of electron density with height based on I.G.Y. data by B. S. SHAPIRO (U.S.S.R.)	25
Peculiarities of the annual variation of ionization of the F2 layer, its connection with solar activity and the prediction of minimum and maximum critical frequencies by A. I. LIKHACHEV (U.S.S.R.)	27
Some peculiarities in the geographic distribution of the maximum electron density in the F2 layer over the Ural Mountains, Siberia, Northern Caucasus and Middle Asia by V. N. KESSENIKH (U.S.S.R.)	40
Photochemical rates in the F2 layer deduced from the 1958 eclipse at Danger Islands by T. E. VANZANDT, R. B. NORTON AND G. H. STONEHOCKER (Boulder, Colo.)	43
Correlation between $h_p F_2$ and $(M_{3000})F_2$ by TOKUJI KOIZUMI (Kokubunji)	47
SECTION II: HIGH LATITUDE STUDIES	
Some aspects of the incidence of polar blackout during the I.G.Y. by L. THOMAS AND W. R. PIGGOTT (Slough)	61
Variations in the incidence of polar blackout with magnetic activity by W. R. PIGGOTT AND L. THOMAS (Slough)	72
Enhanced ionization in the polar ionosphere associated with great solar eruptions and geomagnetic storms by Y. HAKURA, T. GOH, Y. TAKENOSHITA AND T. OBAYASHI (Hiraiso)	78
The energy spectrum of solar corpuscular emissions by T. OBAYASHI (Hiraiso)	83
Two magneto-ionic phenomena permitting the observation of valley minima between the E and F regions in the arctic by J. W. WRIGHT (Boulder, Colo.)	85
A daily index of the incidence of polar blackout during the I.G.Y. by W. R. PIGGOTT (Slough)	94
SECTION III: DISTURBANCE PHENOMENA	
Geomagnetic storms and the earth's outer atmosphere by T. OBAYASHI (Hiraiso)	107
On the relation between solar eruptions and geomagnetic and ionospheric dis- turbances by Y. HAKURA (Hiraiso)	109

Some new ionospheric phenomena in Japan by Y. NAKATA (Hiraiso)	111
Cosmic ray storms and solar radio outbursts by Y. KAMIYA (Nagoya) and M. WADA (Tokyo)	113
A daily index of F2 layer disturbance during the I.G.Y. by W. R. PIGGOTT (Slough)	116
S.I.D.'s during the I.G.Y. by J. A. RATCLIFFE (Cambridge)	124
On the ionizing radiations of solar flares by N. A. SAVITCH (U.S.S.R.)	130
The S.I.D. effect of v.h.f. scatter propagation associated with the great solar outburst of July 29, 1958 by T. OBAYASHI (Hiraiso)	137
Ionospheric propagation disturbances caused by high-altitude nuclear explosions by T. OBAYASHI (Hiraiso)	139
Geophysical effects associated with high-altitude nuclear explosions by H. UYEDA AND S. ISHIKAWA (Kokubunji)	142

SECTION IV: IONOSPHERIC IRREGULARITIES

The geomorphology of equatorial spread-F by A. J. LYON, N. J. SKINNER AND R. W. WRIGHT (Ibadan)	153
The diurnal and seasonal variations of the occurrence probability of spread-F by T. SHIMAZAKI (Kokubunji)	158
The world-wide occurrence probability of spread-F in severe magnetic storms by T. SHIMAZAKI (Kokubunji)	165
The temporal distribution of storm-type sporadic E in the northern hemisphere by L. THOMAS (Slough)	172
A preliminary report on observations of sporadic E by the back-scatter technique by J. HARWOOD (Slough)	180
Peculiarities of the ionosphere in the Far East: sporadic E and F region scatter by E. K. SMITH AND J. W. FINNEY (Boulder, Colo.)	182
Studies of scattering phenomena in the equatorial ionosphere based upon v.h.f. transmissions across the magnetic equator by K. L. BOWLES AND R. COHEN (Boulder, Colo.)	192

SECTION V: $N(h)$ PROFILES

$N(h)$ work at Lindau by W. BECKER (Lindau)	197
Some results on $N(h)$ profiles and their application to specific communication problems by M. D. VICKERS (Slough)	206
The latitude variation of electron density in the ionosphere by SHEILA CROOM, AUDREY ROBBINS AND J. O. THOMAS (Cambridge)	212
The C.R.P.L. electron density profile programme: some features and early results by J. W. WRIGHT (Boulder, Colo.)	215
Electron density profiles in the lower E layer deduced from a study of ionospheric cross modulation by B. LANDMARK AND F. LIED (Kjeller)	221
$N(h)$ profiles deduced from oblique incidence backscatter by R. D. EGAN (Stanford, Calif.)	231

SECTION VI: ABSORPTION

Some results of investigations of absorption in the U.S.S.R. by N. BENKOVA AND M. FLIGEL (Nizmir)	241
Preliminary results of absorption measurements at Lindau and Tsumeb by G. UMLAUFT (Lindau)	244

Reflecting properties of the ionosphere between 350 and 1500 kc/s at Tsumeb by W. ELLING (Lindau)	252
The physical interpretation of absorption measurements by K. RAWER (Breisach/Rhein)	260
Discrepancies in the ionospheric absorption deduced from the first order and multiple order reflections by W. R. PIGGOTT (Slough)	263
Measurement of cosmic noise absorption at Delhi on 22.4 Mc/s by K. A. SARADA AND A. P. MITRA (New Delhi)	270
V.h.f. radio wave absorption in northern latitudes and solar particle emissions by H. LEINBACH AND G. C. REID (College, Alaska)	281

SECTION VII: DRIFTS

A preliminary report on horizontal drifts in the F region during the I.G.Y. by B. H. BRIGGS (Cambridge)	297
The movement and parameters of large-scale irregularities by V. D. GUSEV, S. F. MIRKOTAN, I. B. BEREZIN AND M. P. KIYANOVSKY (Moscow)	304
The drift of small-scale irregularities in the F ₂ layer by J. V. KUSHNEREVSKY AND E. S. ZAYARNAYA (Nizmir)	313
Comparison of results of observations of large-scale and small-scale inhomogeneities in the F ₂ layer by V. D. GUSEV, J. V. KUSHNEREVSKY AND S. F. MIRKOTAN (Moscow)	322
Preliminary results of horizontal drift measurements in the F ₁ layer near the magnetic equator by A. J. LYON, N. J. SKINNER (Ibadan) AND R. W. WRIGHT (Achimoto)	333
The determination of wind velocities at heights of 85-130 km, by radio-echo methods by B. L. KASHCHEYEV, V. I. TARAN AND I. A. LYSENKO (Kharkhov)	338
A comparison of horizontal ionospheric drifts at different latitudes by T. SHIMAZAKI (Kokubunji)	345
Vertical transport velocities in the F region by S. CHANDRA, J. J. GIBBONS AND E. R. SCHMERLING (Pittsburg, Pa.)	355

SECTION VIII: NOISE, WHISTLERS, ROCKETS, SATELLITES

A review of the I.G.Y. programme on atmospheric radio noise by F. HORNER (Slough)	367
Preliminary discussion of atmospheric radio noise measurements in Japan by T. ISHIDA (Kokubunji)	371
Some results of the investigation of the intensity of atmospheric radio noise at Moscow by J. I. LICHTER AND G. I. TERINA (Moscow)	376
V.l.f. spectra of atmospherics propagated through the ionosphere by T. OBAYASHI (Hiraiso)	383
Preliminary results from the U.S. I.G.Y. "whistlers-East" programme by M. G. MORGAN AND W. C. JOHNSON (Hanover, N.H.)	386
Summary of progress made in ionospheric research using rockets and satellites during the I.G.Y. by J. C. SEDDON AND J. E. JACKSON (U.S.A.)	388
On the analysis of polarisation rotation recordings of satellite radio signals by R. S. LAWRENCE AND C. G. LITTLE (Boulder, Colo.)	391
