

Contents

<i>Preface</i>	v
<i>List of Contributors</i>	ix
The medical implications of nuclear power plant accidents	1
<i>J. G. Tyror</i>	
Setting the scenario—potential hazards of the nuclear fuel cycle.	37
<i>R. J. Berry and N. McPhail</i>	
The medical management of radiation casualties	51
<i>A. W. Lawson</i>	
Medical management of the patient immunosuppressed by ionising radiation	75
<i>J. C. Cawley</i>	
The Goiânia accident	83
<i>J. R. Croft</i>	
Current radiation risk estimates and implications for the health consequences of Windscale, TMI and Chernobyl accidents	102
<i>R. H. Clarke</i>	
The role of biological dosimetry in a radiological accident in the UK .	119
<i>D. Lloyd</i>	
Some priorities in experimental radiobiology	132
<i>G. E. Adams</i>	
Arrangements for dealing with emergencies at civil nuclear installa- tions	151
<i>M. J. Turner and I. F. Robinson</i>	
The National Response Plan and Radioactive Incident Monitoring Network (RIMNET)	181
<i>M. W. Jones</i>	

The role of MAFF following a nuclear accident	195
<i>M. G. Segal</i>	
Medical response to effects of ionising radiation: resources for coping with an event, the role of the Community Physician	224
<i>J. D. Terrell</i>	
Local emergency arrangements for radiation accidents	230
<i>A. Jones</i>	
Monitoring and assessment of radiation exposure from routine radioactive discharges, and its relevance to the question of disease clusters	241
<i>S. R. Jones</i>	
Studies of leukaemia incidence in Scotland (<i>Abstract</i>)	271
<i>J. Urquhart</i>	
The relevance of population mixing to the aetiology of childhood leukaemia	272
<i>L. J. Kinlen</i>	
The role of ionising radiation in the aetiology of the leukaemias	279
<i>R. A. Cartwright</i>	
A method of detecting spatial clustering of disease	295
<i>S. Openshaw, D. Wilkie, K. Binks, R. Wakeford, M. H. Gerrard and M. R. Croasdale</i>	
Prediction of the effect of small doses: inconsistencies in the epi- demiological evidence (<i>Abstract</i>)	309
<i>R. Doll</i>
