

CONTENTS

<i>Preface</i>	v
<i>Opening Address</i> <i>E. Economou</i>	xiii
<i>Opening Address</i> <i>S. Finzi and G. Desmet</i>	xiv
SESSION 1: OVERVIEW OF MODEL RELIABILITY AND TESTING STUDIES <i>(Chairman: C. MYTTENAERE)</i>	
An overview of the IAEA Safety Series on procedures for evaluating the reliability of predictions made by environmental transfer models <i>F. O. Hoffman</i>	1
Verification and validation of NRPB models for radionuclide transfer through the environment. <i>M. D. Hill</i>	15
BIOMOVS: an international model validation study <i>C. Haegg and G. Johansson</i>	22
SESSION 2: TRANSFER AIR–LAND <i>(Chairman: F. LUYKX)</i>	
A comparison of model predictions of gaseous dispersion with environmental measurements of ^{14}C around Sellafield, UK <i>M. J. Fulker, R. L. Otlet and A. J. Walker</i>	30
Calculation model for the impact on soil due to tritium emission into the atmosphere during snowfall <i>D. Papadopoulos, L. A. König and K.-G. Langguth</i>	38
Confirmation of laboratory results by HT releases under field conditions: HT deposition velocity and reemission rate <i>H. Förstel, H. Trierweiler and K. Lepa</i>	46

Uncertainty analysis and model validation for a retrospective assessment of thyroid dose resulting from atomic weapons' test fallout	54
<i>S. L. Simon</i>	
An application of a diagnostic wind model to describe atmospheric transport	66
<i>N. Moussiopoulos and Th. Flassak</i>	
Sea breeze wind field prediction in atmospheric dispersion modelling	74
<i>M. Varvayanni and J. G. Bartzis</i>	
 SESSION 3: TRANSFER IN TERRESTRIAL ENVIRONMENT	
(Chairman: H. PARETZKE)	
A comparison of model predictions and observations of the transfer of ^{137}Cs through the air–pasture–cow–milk pathway	84
<i>Y. C. Ng and F. O. Hoffman</i>	
From model intercomparison to model validation: an example from the BIOMOVS study	96
<i>H. Koehler and S. Nielson</i>	
Cesium transport in food chains: comparison of model predictions and observations	104
<i>H. Müller and G. Pröhl</i>	
Comparing predictions of two radioecological models with measured values	114
<i>H. Maubert, A. Grauby and V. Ponzetto</i>	
Validation of the farmland models for radionuclide transfer through terrestrial foodchains	127
<i>J. Brown, S. M. Haywood and B. T. Wilkins</i>	
Modelling the radiocesium content in milk and comparison with the measured data after the Chernobyl accident	135
<i>B. Kanyar, N. Fulop, A. Kerekes and L. Kovacs</i>	
Particulate transport processes in agroecosystems: validation of predictive models	141
<i>J. E. Pinder III, K. W. McLeod and D. C. Adriano</i>	
The IUR project on soil-to-plant transfer factors of radionuclides: expected values and uncertainties	151
<i>M. J. Frissel and J. Koster</i>	

Validation of dynamic foodchain models: results of an experimental programme <i>S. Nair</i>	159
Transfer of radionuclides to food plants: root versus foliar uptake <i>P. Kopp, O. Oestling and W. Burkart</i>	167
 SESSION 4a: TRANSFER IN THE AQUATIC ENVIRONMENT FRESH WATER (Chairman: D. ROBEAU)	
Intercomparison of model calculation of the turnover of Ra-226 within an aquatic ecosystem <i>U. Bergström</i>	177
Uncertainties associated with estimates of radium accumulation in lake sediments and biota <i>A. L. Brenkert, R. H. Gardner, S. M. Bartell and F. O. Hoffman</i>	185
Finite element modelling of transport of radium-226 and uranium from Port Granby radioactive waste management site to Lake Ontario <i>S. R. Joshi and A. G. Bobba</i>	193
Biosphere model validation by intercomparison to observed behaviour of fallout radionuclides in the aquatic environment <i>R. Korhonen and S. Vuori</i>	201
Dose assessment and uncertainty with respect to liquid effluent discharges <i>Th. Zeevaert, C. R. Vandecasteele, G. Volckaert and R. Kirchmann</i>	209
 SESSION 4b: TRANSFER IN THE AQUATIC ENVIRONMENT MARINE ECOSYSTEM (Chairman: A. AARKROG)	
A model performance test for the aquatic dispersion of radionuclides in the North-East Atlantic waters <i>S. P. Nielsen and A. Aarkrog</i>	217
Radioactivity of French coast of the Channel due to the release of technetium-99 and iodine-129: modelisation and measurements <i>D. Robeau, F. Patti and S. Charmasson</i>	227

Comparison of marine dispersion model predictions with environmental radionuclide concentrations	233
<i>C. E. Johnson and W. A. McKay</i>	
Modelling the behaviour of long-lived radionuclides in the Irish Sea: comparison of model predictions with field observations	241
<i>P. J. Kershaw, R. J. Pentreath, P. A. Gurbutt, D. S. Woodhead, J. A. Durance and W. C. Camplin</i>	
Comparison of models for assessing the radiological impacts of deep-sea disposal of radioactive wastes	250
<i>M. Chartier, X. Durrieu de Madron and M. Poulin</i>	
Modelling the sea-to-land transfer of marine discharges from Sellafield: validation against environmental measurements	261
<i>J. M. Howorth and A. E. J. Eggleton</i>	
 SESSION 5: TRANSFER IN THE BIOSPHERE FROM WASTE REPOSITORIES (Chairman: M. HILL)	
Comparison of two model approaches for the geosphere/biosphere interface	268
<i>A.-C. Argärde, A.-M. Ericsson, U. Bergström and B. Sundblad</i>	
The reliability of environmental transfer models applied to waste disposal	276
<i>H. Grogan and F. van Dorp</i>	
Sensitivity analysis applied to the disposal of low and medium-level waste	285
<i>Ph. Guétat and Th. Foult</i>	
Modelling the radiological impact of release of radionuclides into the biosphere from solid waste disposal facilities	299
<i>G. M. Smith</i>	
 SESSION 6: UNCERTAINTY ANALYSIS (Chairman: F. O. HOFFMAN)	
DIVIS: a programme package to support the probabilistic modelling of parameter uncertainties	305
<i>E. Nowak and E. Hofer</i>	

The generation of experimental designs for uncertainty and sensitivity analysis of model predictions with emphasis on dependences between uncertain parameters	318
<i>B. Krzykacz and E. Hofer</i>	
Uncertainty analysis for ranking parameters in environmental mathematical modelling	331
<i>A. S. Paschoa and M. E. Wrenn</i>	
Reports from Chairmen of Sessions 1, 2, 4a, 4b, 5	339
<i>Conclusions</i>	347
<i>List of Participants</i>	349
