INTRODUCTION 1

1. General Purposes for the Reference Man	1
2. Historical Development	1
3. Purpose of the Present Report	2
4. Organization of the Report	6
5. Supplementary Reports	6
6. Index, Data Summaries, and Appendices	6
7. Summary	7
References	7

1 ANATOMICAL VALUES FOR REFERENCE MAN

I. TOTAL BODY 8

A. Weight, Length, and Surface Area of the Total Body and Regions of the Total Body	8
1. Weight (<i>W</i>), Length (<i>L</i>), and Surface Area (<i>SA</i>) of the Total Body during Prenatal Life	8
2. Weight (<i>W</i>), Length (<i>L</i>), and Surface Area (<i>SA</i>) of the Total Body during Postnatal Life	10
3. Growth Patterns for Regions of the Total Body during Postnatal Life	20
4. Composition of the Total Body	20
a. Prenatal	20
b. Postnatal	23
5. Specific Gravity of the Total Body	24
6. Body Cell Mass (<i>BCM</i>)	26
a. Prenatal and Newborn	26
b. Adult	26
B. Total Body Water and Extracellular and Intracellular Water	27
1. Total Body Water (<i>TBW</i>)	27
a. <i>TBW</i> during Prenatal Life	27
b. <i>TBW</i> during Postnatal Life	28
2. Extracellular Water (<i>ECW</i>)	29
a. <i>ECW</i> during Prenatal Life	29
b. <i>ECW</i> during Postnatal Life	31
3. Intracellular Water (<i>ICW</i>)	32
a. <i>ICW</i> during Prenatal Life	32
b. <i>ICW</i> during Postnatal Life	32
c. Distribution of <i>ICW</i>	32
C. Total Blood, Erythrocytes, Leucocytes, Platelets, and Plasma	32
1. Total Blood Volume	32
a. Properties of Whole Blood	33
b. Composition of Whole Blood	34

2. Relationship between Total Blood Volume, Red Cell Volume, and Plasma Volume	35
3. Red Cells (Erythrocytes)	35
a. Properties of the Red Cells	36
b. Composition of Red Blood Cells	37
4. White Blood Cells (Leucocytes) and Platelets	37
5. Plasma	38
a. Volume of Plasma	38
b. Properties of Plasma	39
c. Composition of Plasma	40
D. Body Fat, Adipose Tissue, and Lean Body Mass (LBM)	40
1. Body Fat	40
a. Body Fat during Prenatal Life	40
b. Body Fat during Postnatal Life	41
2. Adipose Tissue	43
a. Composition of Adipose Tissue	43
b. Weight and Distribution of Adipose Tissue	44
3. Lean Body Mass (LBM)	44
E. Reticuloendothelial System (RES)	45
F. Connective Tissue	45
1. Volume and Weight of Dense Connective Tissue	46
2. Distribution of Connective Tissue	46
II. INTEGUMENTARY SYSTEM	46
A. Skin and Hypodermis	46
1. Thickness of the Epidermis, Dermis, and Hypodermis during Postnatal Life	47
a. Newborn	47
b. Adult	47
2. Weight of the Skin, Epidermis, Dermis and Hypodermis	50
a. Prenatal	50
b. Postnatal	50
3. Composition of Skin	54
4. Total Blood Content and Blood Flow of the Skin	55
5. Specific Gravity of Skin	56
6. Cellular Turnover Time for Various Regions of Skin	56
a. Observed Cell Renewal Time for the Epidermis	56
b. Calculated Cell Renewal Time for the Epidermis	57
7. Daily Production of Horny Material by the Skin of an Adult	57
8. Glands of the Skin	57
a. Eccrine Sweat Glands	57
b. Apocrine Sweat Glands	57
c. Sebaceous Glands	57
B. Hair	58
1. Weight of Hair of Adults	58
2. Morphological and Growth Characteristics of Hair	58
3. Composition of Hair	59
4. Specific Gravity of Hair	59
C. Nails	59
1. Weight of Nails	59
2. Dimensions of Adult Fingernails	59
3. Growth Rate of Nails	59
4. Composition of Nails	62
5. Specific Gravity of Nails	62

III. SKELETON, CARTILAGE, NONSKELETAL DENSE CONNECTIVE TISSUE (TENDONS, FASCIA, PERIARTICULAR TISSUE), AND TEETH	62
A. Skeleton	62
1. <i>Weight of the Skeleton</i>	62
a. <i>Prenatal</i>	62
b. <i>Postnatal</i>	62
2. <i>Volume of the Postnatal Skeleton</i>	64
3. <i>Types of Bone Tissue</i>	66
a. <i>Cortical, Compact, or Dense Bone</i>	66
b. <i>Trabecular, Cancellous, or Spongy Bone</i>	68
4. <i>Surfaces of Bone</i>	69
5. <i>Specific Gravity of Bone and Skeleton</i>	70
a. <i>Specific Gravity of Hydrated Cortical Bone Tissue</i>	71
b. <i>Specific Gravity of Hydrated Trabecular Bone Tissue</i>	71
6. <i>Composition of the Skeleton</i>	71
a. <i>Composition of Whole Bones with Marrow and Skeleton of the Fetus, Newborn, and Infant</i>	71
b. <i>Skeletal Composition as a Function of Age</i>	73
c. <i>Composition of Cortical and Trabecular Type Bone</i>	74
7. <i>Blood Content of the Skeleton</i>	74
8. <i>Biodynamics of Bone</i>	74
9. <i>Patterns of Skeletal Ossification</i>	76
B. Bone Marrow	79
C. Cartilage	79
1. <i>Weight of Cartilage during Prenatal Life</i>	79
2. <i>Weight of Cartilage during Postnatal Life</i>	80
3. <i>Thickness of Cartilage</i>	80
4. <i>Composition of Cartilage</i>	80
a. <i>Newborn</i>	80
b. <i>Adult</i>	80
5. <i>Specific Gravity of Wet or Fresh Cartilage</i>	80
D. Nonskeletal Dense Connective Tissue: Tendons, Fascia, and Periarticular Tissue	81
1. <i>Weight of Tendons, Fascia, and Periarticular Tissue during Postnatal Life</i>	81
2. <i>Composition</i>	81
3. <i>Specific Gravity of Wet or Fresh Ligament and Tendons</i>	81
E. Teeth	82
1. <i>Prenatal Growth of Teeth</i>	82
2. <i>Postnatal Weight of Teeth</i>	82
a. <i>Deciduous Teeth</i>	83
b. <i>Permanent Teeth</i>	83
c. <i>Composition of Adult Teeth</i>	85
d. <i>Tissue Composition</i>	85
e. <i>Specific Gravity of Teeth</i>	85
IV. HEMATOPOIETIC SYSTEM, LYMPHATIC SYSTEM, SPLEEN, AND THYMUS	85
A. Hematopoietic System	85
1. <i>Prenatal Hematopoietic Tissues</i>	86
a. <i>Prenatal Hematopoietic Tissue Except Bone Marrow</i>	86
b. <i>Bone Marrow</i>	86
2. <i>Postnatal Hematopoietic Tissue—Bone Marrow</i>	87
a. <i>Weight and Volume of Total Bone Marrow during Postnatal Life</i>	88

<i>b. Distribution of Red and Yellow Bone Marrow</i>	89
<i>c. Histologic and Cytologic Structure of Total Bone Marrow</i>	92
3. <i>Functional Capacity of the Bone Marrow and its Relative Response to Stimuli</i>	95
4. <i>Cell Turnover Time</i>	95
<i>a. Erythrocytic (red cell) Series</i>	96
<i>b. Granulocytic Series</i>	96
<i>c. Thrombocytic (platelet-forming) Series</i>	96
5. <i>Chemical Composition of Bone Marrow</i>	96
6. <i>Specific Gravity of Bone Marrow</i>	97
7. <i>Blood Content of Bone Marrow</i>	98
B. Lymphatic System	98
1. <i>Weight and Distribution of the Lymphocytes</i>	98
2. <i>Turnover Time of Lymphocytes</i>	98
3. <i>Circulating Lymphocytes</i>	99
4. <i>Weight of Lymphatic Tissue</i>	100
5. <i>Volume of Lymphatic Tissue</i>	101
6. <i>Composition of Lymph Nodes</i>	101
7. <i>Blood Content of Mesenteric Lymph Nodes of Adult Male Guinea Pigs</i>	101
8. <i>Volume of Interstitial Lymph Water</i>	101
C. Spleen	102
1. <i>Weight of the Spleen</i>	102
<i>a. Prenatal</i>	102
<i>b. Postnatal</i>	102
2. <i>Dimensions, Shape, and Location of the Spleen</i>	103
3. <i>Composition of Adult Spleen</i>	104
4. <i>Specific Gravity of Spleen</i>	104
5. <i>Cellular Components of Spleen</i>	104
6. <i>Quantitative Histology of the Spleen</i>	104
7. <i>Blood Content of the Spleen</i>	104
D. Thymus	105
1. <i>Weight of the Thymus</i>	105
<i>a. Prenatal</i>	105
<i>b. Postnatal</i>	106
2. <i>Dimensions of the Thymus of the Newborn</i>	107
3. <i>Shape and Location of Thymus</i>	107
4. <i>Specific Gravity of Thymus</i>	107
5. <i>Cell Turnover Time of the Thymus</i>	107
6. <i>Composition of the Thymus</i>	107
7. <i>Blood Content of the Thymus</i>	107
8. <i>Tissue Composition of the Thymus</i>	107
9. <i>Circulation of Thymus Lymphocytes</i>	108
 V. SKELETAL MUSCLE SYSTEM	 108
1. <i>Weight of the Skeletal Muscle</i>	108
<i>a. Prenatal</i>	108
<i>b. Postnatal</i>	109
2. <i>Distribution of Skeletal Muscle Mass</i>	109
3. <i>Composition of Wet Skeletal Muscle</i>	110
4. <i>Total Blood Content and Residual Blood Content of Skeletal Muscle</i>	111
5. <i>Development and Cellular Turnover Time of Skeletal Muscle</i>	112
6. <i>Specific Gravity of Muscle</i>	112

VI. CARDIOVASCULAR SYSTEM

A. Heart	112
1. <i>Weight of Heart</i>	113
a. <i>Prenatal</i>	113
b. <i>Postnatal Weight of the Heart without the Blood in the Chambers</i>	113
2. <i>Dimensions of the Heart</i>	115
3. <i>Total Volume of the Heart</i>	115
a. <i>Newborn</i>	115
b. <i>Adults</i>	115
4. <i>Intracardiac Volume or Blood Content of the Cavities of the Heart</i>	116
5. <i>Thickness of Walls of Regions of the Heart</i>	116
6. <i>Composition and Properties of Heart Tissue</i>	116
a. <i>Newborn and up to 7 Days of Age</i>	116
b. <i>Adult</i>	116
7. <i>Total and Residual Blood Content of the Heart Tissue (Cardiac Muscle)</i>	117
8. <i>Tissue Growth of the Heart Muscle</i>	117
B. Blood Vessels and Contents of Blood Vessels	117
1. <i>Measurements of Blood Vessels and Distribution of Blood within the Blood Vessels</i>	117
a. <i>Newborn to One Year of Age</i>	117
b. <i>Adult Arterial System</i>	118
c. <i>Adult Venous System</i>	119
d. <i>Adult Pulmonary System</i>	120
2. <i>Blood Pools in the Total Body</i>	121
3. <i>Composition of the Aorta</i>	121
a. <i>Newborn to 9 Years of Age</i>	121
b. <i>Adults</i>	121
4. <i>Composition of Veins for 20–29-year-old Adults</i>	122
5. <i>Turnover Time of Capillary-Endothelial Cells of Mice</i>	122
VII. DIGESTIVE SYSTEM	122
A. Mouth	122
1. <i>Dimensions of the Mouth</i>	122
2. <i>Cell Turnover Time of the Buccal Mucosa</i>	122
3. <i>Composition of Human Buccal Mucosa</i>	123
B. Tongue	123
1. <i>Weight of the Adult Tongue</i>	123
2. <i>Dimensions of the Tongue</i>	123
3. <i>Surface Area for the Root (base) of the Tongue</i>	123
4. <i>Thickness of the Epithelium on the Dorsal Aspect of the Tongue</i>	123
5. <i>Composition of the Adult Tongue</i>	124
6. <i>Turnover Time for Cells of the Tongue</i>	124
C. Teeth	124
D. Salivary Glands	124
1. <i>Weight of the Salivary Glands during Postnatal Life</i>	124
2. <i>Dimensions for One Gland of Each Pair of the Adult Salivary Glands</i>	125
3. <i>Specific Gravity of Salivary Glands</i>	125
4. <i>Total Blood Content of the Adult Salivary Glands of Animals</i>	125
5. <i>Cellular Life Span for the Adult Salivary Glands</i>	126
6. <i>Ducts of the Salivary Glands</i>	126
E. Pharynx	126
1. <i>Dimensions of the Pharynx in the Newborn and Infant</i>	126
2. <i>Dimensions of the Adult Pharynx</i>	127

F. Tonsillar Ring	127
1. <i>Palatine or Faucial Tonsils</i>	127
a. <i>Weight of Palatine Tonsils as a Function of Postnatal Age</i>	127
b. <i>Volume of Palatine Tonsils as a Function of Postnatal Age</i>	127
c. <i>Dimensions of Palatine Tonsil</i>	128
2. <i>Pharyngeal Tonsil (Adenoid)</i>	128
3. <i>Lingual Tonsil</i>	128
G. Esophagus	129
1. <i>Weight of the Esophagus during Postnatal Life</i>	129
2. <i>Length of the Esophagus during Postnatal Life</i>	129
3. <i>Segmental Lengths of the Adult Esophagus</i>	130
4. <i>Diameter and Thickness of the Esophagus during Postnatal Life</i>	130
5. <i>Composition of the Esophagus</i>	130
6. <i>Specific Gravity of the Esophagus</i>	130
7. <i>Turnover Time for the Mucosal Cells of the Esophagus</i>	130
8. <i>DNA Synthesis in the Esophagus</i>	130
H. Stomach	130
1. <i>Weight of the Stomach during Prenatal Life</i>	130
2. <i>Weight of the Stomach during Postnatal Life</i>	131
3. <i>Shape, Size, Position, and Dimensions of the Stomach during Postnatal Life</i>	131
4. <i>Surface Area of the Mucosa of the Stomach</i>	132
5. <i>Thickness of the Mucosal Layer of the Adult Stomach</i>	132
6. <i>Thickness of the Wall of the Stomach for the Adult</i>	132
7. <i>Capacity of the Stomach</i>	133
8. <i>Turnover Time for Cells of the Stomach</i>	133
9. <i>Composition of the Adult Stomach</i>	134
10. <i>Specific Gravity of the Stomach</i>	134
11. <i>Total Blood Content of the Stomach</i>	134
12. <i>Contents of the Stomach</i>	134
I. Intestinal Tract	134
1. <i>Weight of the Intestines during Prenatal Life</i>	135
2. <i>Weight of the Intestines during Postnatal Life</i>	135
a. <i>Newborn</i>	135
b. <i>Adult</i>	135
3. <i>Weight of the Contents of the Gastrointestinal Tract during Postnatal Life</i>	136
4. <i>Volume of the Gas Content of the Gastrointestinal Tract during Postnatal Life</i>	137
5. <i>Length of Intestines</i>	137
a. <i>Prenatal</i>	137
b. <i>Postnatal</i>	138
6. <i>Diameter of the Lumen and Thickness of the Wall of the Intestinal Tract</i>	138
7. <i>Surface Area of the Small Intestine</i>	138
a. <i>Surface Area as a Simple Cylinder</i>	141
b. <i>Surface Area in Considering the Valves of Kerckring</i>	141
c. <i>Surface Area in Considering the Villi</i>	141
d. <i>Surface Area in Considering the Microvilli</i>	141
8. <i>Some Quantitative Characteristics of the Epithelium of the Small Intestine</i>	141
a. <i>Villus Dimensions</i>	141
b. <i>Volume of a Single Villus</i>	141
c. <i>Volume of the Epithelium of a Single Villus</i>	141
d. <i>Number of Villi</i>	141
e. <i>Total Volume of Epithelial Cells</i>	141
f. <i>Dimensions of Columnar Epithelial Cells</i>	141
g. <i>Number of Epithelial Cells</i>	141
h. <i>Total Number of Cells Produced and Lost Per Day</i>	142

9. <i>Surface Area of the Large Intestine</i>	142
10. <i>Thickness of the Wall of the Intestine</i>	142
11. <i>Composition of the Intestine for the Full-term Newborn</i>	142
12. <i>Composition of the Adult Intestine</i>	143
13. <i>Total Blood Content of the Intestines in the Adult</i>	143
14. <i>Specific Gravity of Regions of the Intestine</i>	144
15. <i>Cellular Kinetics</i>	144
J. Liver	144
1. <i>Weight of the Liver</i>	144
a. <i>Prenatal</i>	144
b. <i>Postnatal</i>	145
2. <i>Dimensions of the Liver</i>	146
3. <i>Capsule of the Liver</i>	146
4. <i>Composition of the Liver</i>	146
5. <i>Blood Content of the Liver</i>	147
6. <i>Tissue Composition of the Liver</i>	147
7. <i>Tissue Growth</i>	148
K. Gallbladder	148
1. <i>Weight of the Gallbladder during Postnatal Life</i>	148
2. <i>Dimensions of the Gallbladder</i>	148
3. <i>Thickness of the Wall of the Gallbladder in the Adult</i>	148
4. <i>Shape and Location of the Gallbladder</i>	148
5. <i>Volume of the Gallbladder as a Function of Age</i>	149
6. <i>Composition of the Adult Gallbladder</i>	149
7. <i>Bile</i>	149
L. Pancreas	149
1. <i>Weight of the Pancreas</i>	149
a. <i>Prenatal</i>	149
b. <i>Postnatal</i>	150
2. <i>Dimensions of the Pancreas</i>	150
3. <i>Composition of Pancreas</i>	150
4. <i>Specific Gravity of the Pancreas</i>	151
5. <i>Residual Blood Content of the Pancreas</i>	151
6. <i>Histology of the Pancreatic Tissue</i>	151
VIII. RESPIRATORY SYSTEM	151
A. Nose	152
1. <i>Naris or Nostril</i>	152
2. <i>Vestibule</i>	152
3. <i>Nasal Cavities</i>	153
a. <i>Newborn</i>	153
b. <i>Adult</i>	153
c. <i>Nasal Septum of the Adult</i>	153
d. <i>Dimensions of the Posterior Aperture (Choana) of the Nose during Postnatal Life</i>	153
B. Larynx	154
1. <i>Weight of the Larynx during Postnatal Life</i>	154
2. <i>Dimensions of the Larynx during Prenatal Life</i>	154
3. <i>Dimensions of the Larynx during Postnatal Life</i>	155
4. <i>Specific Gravity and Composition of the Larynx</i>	155
5. <i>Doubling Time for Normal Epithelial Mucosa of the Larynx</i>	156
C. Trachea	156
1. <i>Dimensions of Trachea during Prenatal Life</i>	156

2. <i>Dimensions and Weight of Trachea during Postnatal Life</i>	156
3. <i>Tracheal Glands, Mucosa, Mucus, and Cilia</i>	157
4. <i>Cartilaginous Tracheal Rings</i>	157
5. <i>Specific Gravity of Tracheal Rings</i>	158
6. <i>Composition of the Trachea</i>	158
D. Lungs	158
1. <i>Weight of Both Lungs</i>	158
2. <i>Dimensions of the Lung</i>	160
3. <i>Anatomical Volume of the Lungs</i>	160
a. <i>Newborn</i>	160
b. <i>Adult</i>	161
4. <i>Volumetric Divisions of the Lung</i>	161
5. <i>Volume of Blood in Both Lungs</i>	161
a. <i>Total Blood Volume in Both Lungs</i>	161
b. <i>Pulmonary Arterial Blood</i>	161
c. <i>Pulmonary Venous Blood</i>	162
d. <i>Pulmonary Capillary Blood</i>	162
6. <i>Specific Gravity of the Lung</i>	163
7. <i>Composition of the Lung</i>	164
8. <i>Bronchial Tree</i>	164
a. <i>Models for Bronchial Tree</i>	164
b. <i>Wall Thickness of Bronchial Tree</i>	165
c. <i>Dimensions of the Bronchi during Postnatal Life</i>	166
d. <i>Volume of the Airways of the Bronchial Tree</i>	166
e. <i>Thickness of Epithelium of Bronchial Surfaces</i>	167
f. <i>Glands, Cilia, and Mucus of the Bronchial Tree</i>	168
9. <i>Airways of the Pulmonary Region (P)</i>	168
a. <i>Respiratory Bronchioles, Alveolar Ducts, Alveolar Sacs, and Atria</i>	168
b. <i>Alveoli</i>	170
c. <i>Thickness of the Alveolocapillary Membrane</i>	171
d. <i>Lung Alveolar Secretion</i>	172
10. <i>Cell Turnover Time in the Respiratory Tract of Animals</i>	172
11. <i>Pleura</i>	173
12. <i>Lymph Nodes</i>	173
 IX. UROGENITAL SYSTEM	173
A. Kidneys	173
1. <i>Weight of Kidneys</i>	173
a. <i>Prenatal</i>	173
b. <i>Postnatal</i>	174
2. <i>Description of the Whole Kidney, Capsule, Medulla, and Cortex</i>	175
3. <i>Dimensions of the Kidney, Medulla, Cortex, and Capsule</i>	175
4. <i>Volume of One Kidney during Postnatal Life</i>	175
2. <i>Volumetric Composition of the Kidney</i>	176
6. <i>Volume of Tissue Components of the Kidney</i>	176
7. <i>Composition of the Kidney</i>	176
8. <i>Specific Gravity of the Kidney</i>	176
9. <i>Volume of Blood in One Adult Kidney</i>	176
10. <i>Tissue Growth of the Kidney</i>	177
B. Ureters	177
1. <i>Dimensions of the Ureters during Postnatal Life</i>	177
2. <i>Weight of Ureters during Postnatal Life</i>	177
3. <i>Passage of Urine in the Ureters</i>	178
4. <i>Miscellaneous Data for Ureters</i>	178

C. Urinary Bladder	178
1. <i>Weight of the Empty Urinary Bladder during Postnatal Life</i>	179
2. <i>Thickness of the Wall of the Urinary Bladder</i>	179
3. <i>Length, Transverse Diameter, and Anteroposterior Diameter of the Urinary Bladder</i>	179
4. <i>Capacity of the Urinary Bladder</i>	180
5. <i>Shape and Position of the Urinary Bladder</i>	180
6. <i>Composition of Adult Urinary Bladder</i>	180
7. <i>Blood Content of Adult Urinary Bladder</i>	181
8. <i>Turnover Time for Cells of the Urinary Bladder in the Rat</i>	181
D. Urethra	181
1. <i>Length of the Urethra</i>	181
2. <i>Diameter of the Lumen of the Urethra</i>	181
3. <i>Thickness of the Wall of the Urethra</i>	181
4. <i>Weight of Urethra during Postnatal Life</i>	181
5. <i>Composition of Urethra</i>	182
E. Testes	182
1. <i>Total Weight of Both Testes</i>	182
a. <i>Prenatal</i>	182
b. <i>Postnatal</i>	182
2. <i>Dimensions of One Testis</i>	182
3. <i>Volume of Both Testes</i>	182
4. <i>Specific Gravity of Testes</i>	183
5. <i>Total Blood Content of the Testes of the Adult</i>	184
6. <i>Cell Turnover Time of the Testes</i>	184
7. <i>Spermatozoa Measurements</i>	184
8. <i>Spermatozoa</i>	184
9. <i>Semen</i>	184
10. <i>Composition of Testes</i>	184
11. <i>Tissue Composition of Testes</i>	184
F. Epididymis	185
1. <i>Total Weight of Both Epididymes</i>	185
2. <i>Volume of One Epididymis of Adult</i>	185
G. Prostate Gland	185
1. <i>Weight of the Prostate Gland during Postnatal Life</i>	185
2. <i>Dimensions of the Prostate Gland in the Adult</i>	186
3. <i>Shape and Location of Prostate</i>	186
4. <i>Specific Gravity of Prostate</i>	186
5. <i>Tissue Growth of the Prostate</i>	186
6. <i>Composition of Adult Prostate</i>	186
H. Seminal Vesicles	186
I. Ovaries	187
1. <i>Total Weight of Both Ovaries</i>	187
a. <i>Prenatal</i>	187
b. <i>Postnatal</i>	187
2. <i>Dimensions of the Ovary</i>	187
3. <i>Shape and Position of the Ovaries in the Body</i>	188
4. <i>Composition of the Ovary</i>	188
5. <i>Specific Gravity of the Ovary</i>	188
6. <i>Tissue Growth of the Ovary</i>	189
a. <i>Cell Dimensions</i>	189
b. <i>Number and Percentage of Ovarian Cells in the Ovaries of the Fetus and Postnatal Female</i>	189

<i>c. Tissue Composition of the Ovary</i>	190
7. <i>Ovum Dimensions, Viability, and Transport</i>	190
J. Fallopian or Uterine Tubes or Oviducts	190
1. <i>Weight of Fallopian Tubes during Postnatal Life</i>	191
2. <i>Dimensions of the Fallopian Tubes during Postnatal Life</i>	191
K. Uterus	191
1. <i>Weight of the Uterus during Postnatal Life</i>	191
2. <i>Dimensions of the Uterus during Postnatal Life</i>	191
3. <i>Shape, Size, and Position of the Uterus</i>	192
4. <i>Cell Turnover Time of the Uterus</i>	192
5. <i>Blood Content of the Uterus</i>	193
6. <i>Specific Gravity of the Uterus</i>	193
7. <i>Muscular Composition of the Adult Uterus</i>	193
8. <i>Composition of the Adult Uterine Muscle</i>	193
9. <i>Endometrium</i>	193
<i>a. Thickness</i>	193
<i>b. Composition of the Adult Endometrium</i>	194
10. <i>Menopause</i>	194
L. Vagina	194
1. <i>Length of Vagina during Postnatal Life</i>	194
2. <i>Width of the Adult Vagina</i>	195
3. <i>Wall Thickness of the Adult Vagina</i>	195
4. <i>Thickness of the Mucosa of the Adult Vagina</i>	195
5. <i>Turnover Time for the Mucosal Cells of the Adult Vagina of Some Animals</i>	195
M. Breast	195
1. <i>Total Weight of Both Breasts during Postnatal Life</i>	195
2. <i>Dimensions of One Breast during Postnatal Life</i>	195
3. <i>Composition of Female Breast</i>	196
4. <i>Tissue Composition of the Breast during Lactation in the Goat</i>	196
5. <i>Specific Gravity of Female Breast Tissue</i>	196
X. ENDOCRINE SYSTEM	196
A. Thyroid Gland	196
1. <i>Weight of the Thyroid Gland</i>	196
<i>a. Prenatal</i>	196
<i>b. Postnatal</i>	197
2. <i>Dimensions of the Thyroid Gland</i>	199
3. <i>Thickness of Tissue Overlying the Thyroid</i>	199
4. <i>Follicles of the Thyroid Gland</i>	199
5. <i>Specific Gravity of the Thyroid Gland</i>	200
6. <i>Composition of the Thyroid</i>	200
7. <i>Tissue Composition by Volume of the Adult Thyroid</i>	200
8. <i>Total Blood Content of Thyroid</i>	200
B. Parathyroid Glands	201
1. <i>Weight of the Parathyroid Glands during Postnatal Life</i>	201
2. <i>Weight of the Parenchyma of the Parathyroid Glands during Postnatal Life</i>	201
3. <i>Shape of One Parathyroid Gland</i>	201
4. <i>Dimensions of One Parathyroid Gland</i>	202
<i>a. Infant</i>	202
<i>b. Adult</i>	202
5. <i>Composition of the Whole Parathyroid Gland of the Ox</i>	202

C. Adrenal Glands	202
1. <i>Weight of Both Adrenal Glands during Prenatal Life</i>	203
2. <i>Weight of Both Adrenal Glands during Postnatal Life</i>	203
3. <i>Volume of One Adrenal Gland and its Medulla and Cortex</i>	204
4. <i>Shape of the Adrenal Glands</i>	204
5. <i>Dimensions of One Adrenal Gland</i>	204
6. <i>Capsule of the Adrenal Gland</i>	205
7. <i>Specific Gravity of the Adrenal Gland</i>	205
8. <i>Histological Structure of the Adrenal Cortex</i>	205
9. <i>Tissue Growth of the Adrenal Glands</i>	205
10. <i>Composition of the Adrenal Gland</i>	205
11. <i>Total Blood Content of the Adrenal Gland</i>	206
12. <i>Residual Blood Content of the Adrenal Gland</i>	206
D. Pineal Gland (Epiphysis)	206
1. <i>Weight of Pineal Gland during Postnatal Life</i>	206
2. <i>Dimensions of the Pineal Gland</i>	206
3. <i>Specific Gravity of the Pineal Gland</i>	207
4. <i>Tissue Growth</i>	207
E. Pituitary Gland (Hypophysis)	207
1. <i>Weight of the Pituitary Gland</i>	207
a. <i>Prenatal</i>	207
b. <i>Postnatal</i>	207
2. <i>Weight of the Capsule of the Pituitary Gland during Postnatal Life</i>	209
3. <i>Divisions of the Pituitary Gland</i>	209
4. <i>Shape of the Pituitary Gland</i>	209
5. <i>Dimensions of the Pituitary Gland during Postnatal Life</i>	209
6. <i>Specific Gravity of the Pituitary Gland</i>	209
7. <i>Total Blood Content of the Pituitary Gland</i>	209
8. <i>Residual Blood Content of the Pituitary Gland</i>	209
9. <i>Composition of the Pituitary Gland</i>	209
10. <i>Cytological Composition of the Pituitary Gland</i>	210
11. <i>Mitotic Index of the Pituitary Gland</i>	210

XI. CENTRAL NERVOUS SYSTEM 210

A. Brain	211
1. <i>Weight of the Brain</i>	211
a. <i>Prenatal</i>	211
b. <i>Postnatal</i>	211
2. <i>Relative Weight of the Major Divisions of the Brain Expressed as Percent of the Weight of the Whole Brain</i>	213
3. <i>Dimensions and Shape of the Adult Brain</i>	213
4. <i>Composition of the Brain</i>	213
a. <i>Newborn</i>	213
b. <i>Adult</i>	214
c. <i>Effect of Increasing Age</i>	214
5. <i>Tissue Composition</i>	214
6. <i>Blood Content of the Brain for the Adult</i>	215
7. <i>Specific Gravity of the Brain</i>	215
B. Spinal Cord	216
1. <i>Weight and Development of the Spinal Cord</i>	216
a. <i>Prenatal</i>	216
b. <i>Postnatal</i>	216

2. <i>Volume of the Spinal Cord and its Subdivisions</i>	217
a. <i>Prenatal</i>	217
b. <i>Postnatal</i>	217
3. <i>Length of the Spinal Cord and its Subdivisions</i>	217
a. <i>Prenatal</i>	217
b. <i>Postnatal</i>	217
4. <i>Other Dimensions of the Adult Spinal Cord</i>	218
5. <i>Specific Gravity of the Spinal Cord</i>	218
6. <i>Composition of the Spinal Cord</i>	218
7. <i>Blood Content of the Spinal Cord</i>	218
C. Cerebrospinal Fluid	219
1. <i>Volume of the Cerebrospinal Fluid during Postnatal Life</i>	219
2. <i>Composition and Properties of Cerebrospinal Fluid</i>	219
3. <i>Renewal of Cerebrospinal Fluid</i>	219
D. Meninges	219

XII. SPECIAL SENSE ORGANS

A. Eye	219
1. <i>Weight of the Eyeball during Postnatal Life</i>	219
2. <i>Shape and Dimensions of the Eyeball during Postnatal Life</i>	219
3. <i>Specific Gravity of the Eyeball</i>	219
4. <i>Conjunctiva</i>	220
5. <i>Cornea of the Eye during Postnatal Life</i>	221
a. <i>Weight of the Cornea</i>	221
b. <i>Diameter of the Cornea</i>	221
c. <i>Radius of Curvature of the Cornea</i>	221
d. <i>Thickness of the Cornea</i>	221
e. <i>Surface Area of the Cornea</i>	221
f. <i>Shape of the Cornea</i>	222
g. <i>Structure of the Cornea</i>	222
h. <i>Composition of Stroma of the Cornea of the Ox</i>	222
i. <i>Specific Gravity of Cornea</i>	222
j. <i>Time of Cell Turnover</i>	222
6. <i>Iris of the Eye</i>	223
7. <i>Aqueous Humor of the Eye</i>	223
a. <i>Volume of Aqueous Humor</i>	223
b. <i>Specific Gravity of the Aqueous Humor</i>	223
c. <i>Half-life of Aqueous Humor</i>	223
d. <i>Composition of Aqueous Humor</i>	223
e. <i>Anterior Chamber of the Eye</i>	223
f. <i>Posterior Chamber of the Eye</i>	224
8. <i>Vitreous Humor of the Eye</i>	224
9. <i>Lens</i>	224
a. <i>Weight and Volume of the Lens during Postnatal Life</i>	224
b. <i>Dimensions of the Postnatal Lens</i>	224
c. <i>Composition of the Lens</i>	225
d. <i>Specific Gravity of the Lens</i>	225
e. <i>Geometry of the Lens</i>	226
f. <i>Cell Turnover and Mitosis</i>	226
g. <i>Cataract</i>	226
h. <i>Blood Content of the Lens</i>	227
<i>Depth and Size of Lens</i>	227
10. <i>Sclera</i>	227
a. <i>Weight of Postnatal Sclera</i>	227

<i>b. Wall Thickness of Postnatal Sclera</i>	227
<i>c. Composition of Sclera</i>	227
11. <i>Blood Content of the Eye</i>	227
B. Ear	228
1. <i>External Acoustic Meatus (auditory canal)</i>	228
2. <i>Tympanic Membrane (also called the eardrum)</i>	228
<i>a. Shape</i>	228
<i>b. Dimensions of Axes</i>	228
<i>c. Thickness</i>	228
<i>d. Surface Area</i>	228
3. <i>Auricle or Pinna of Ear</i>	228
 XIII. PREGNANCY	228
A. Duration of Pregnancy or Time of Gestation	228
B. Components in Gained Weight during Pregnancy	229
C. Total Blood Volume, Red Cell Volume, and Plasma Volume during Pregnancy	229
D. Total Body Water, Lean Body Mass, and Total Body Fat during Pregnancy	230
E. Uterus during Pregnancy	231
1. <i>Weight of the Uterus during Pregnancy</i>	231
2. <i>Thickness of the Uterine Wall during Pregnancy</i>	231
3. <i>Rate of Blood Flow and Amount of Blood in the Pregnant Uterus</i>	232
F. Placenta	232
1. <i>Weight of the Placenta</i>	232
2. <i>Volume of the Placenta</i>	232
3. <i>Dimensions of the Placenta</i>	233
4. <i>Tissue Composition of the Placenta</i>	233
5. <i>Gross Composition of Placenta</i>	233
6. <i>Blood Content of the Placenta</i>	233
7. <i>Capillary Volume of the Placenta</i>	233
8. <i>Villous Surface Area of the Placenta</i>	233
9. <i>Thickness of the Maternal-fetal Barrier</i>	233
10. <i>Capillary Surface Area of the Placenta</i>	234
11. <i>Decidual Surface Area of the Placenta</i>	234
12. <i>Specific Gravity of the Placenta</i>	234
<i>Addendum. Reference Man: Summary of Anatomical Data</i>	235
<i>Weights of Organs and Tissues</i>	235
<i>Other Anatomical Values</i>	236
<i>References</i>	237

2 GROSS AND ELEMENTAL CONTENT OF REFERENCE MAN

I. Introduction	273
II. Physical Properties, Blood Content, and Gross and Elemental Content of Reference Man	274
Addendum I. Weights of Organs and Tissues of Reference Man	325
Addendum II. Variation of Elemental Concentration with Age	329
References	331

3 PHYSIOLOGICAL DATA FOR REFERENCE MAN

A. Introduction	335
B. Energy Expenditure	338
1. <i>Standard Energy Expenditure</i>	338
2. <i>Relation of Energy Expenditure to Age and Sex</i>	339
3. <i>Relation of Energy Expenditure to Occupation</i>	341
4. <i>Relation of Energy Expenditure to Oxygen Consumption</i>	342
5. <i>Adjustment of Basal Metabolism for Body Size</i>	342
6. <i>Adjustment for Environmental Temperature</i>	342
7. <i>Effect of Pregnancy and Lactation</i>	343
C. Respiratory Standards	343
1. <i>Lung Capacities</i>	344
2. <i>Lung Volumes and Respiration</i>	346
D. Daily Dietary Intake	348
1. <i>Consumption Based on Household Surveys</i>	348
2. <i>Consumption Estimate from National Supplies</i>	348
E. Principal Nutrient Content of Diet	348
