

CONTENTS

1.	INTRODUCTION	1
2.	PURPOSE AND SCOPE	1
3.	RELEASE CRITERIA	2
3.1.	Radiological principles for exemption or release	2
3.1.1.	Individual doses	3
3.1.2.	Optimization of radiation protection	4
3.2.	Derived quantities	4
3.3.	Release mode	5
4.	COMMON PRACTICES FOR UNRESTRICTED RELEASE	6
5.	FACTORS TO BE CONSIDERED IN DETERMINING A MONITORING PROGRAMME	11
5.1.	Type, history and age of the facility	11
5.2.	Isotopes and areas to be considered	12
5.3.	Statistical considerations	13
6.	INSTRUMENTS AND METHODS	15
6.1.	Selection of instrumentation	15
6.2.	Calculational methods	19
7.	FINAL SURVEY	20
8.	QUALITY ASSURANCE AND DOCUMENTATION	22
8.1.	Personnel	24
8.2.	Instruments	24
8.3.	Methods	24
8.4.	Documentation	24
9.	COST OF MONITORING FOR COMPLIANCE	26
9.1.	General	26
9.2.	Materials	26
9.3.	Instruments and equipment	27
9.4.	Sampling and analysis	27
9.5.	Documentation	28
