<b>Preface .....</b>	iii
<b>1. Introduction .....</b>	1
<b>2. Representation and Modification of Photon Beams .....</b>	4
<b>2.1 Introduction .....</b>	4
<b>2.2 Representation of Photon Beams .....</b>	4
<b>2.2.1 Tabular or Matrix Format .....</b>	4
<b>2.2.2 Beam Generating Functions .....</b>	5
<b>2.2.3 The Separation of Primary and Scattered Radiation .....</b>	6
<b>2.2.4 Representations Using Basic Principles .....</b>	7
<b>2.3 Photon Beam Modification .....</b>	8
<b>2.3.1 Beam Limiting Devices .....</b>	8
<b>2.3.1.1 Effective Attenuation of Radiation Through a Shield .....</b>	8
<b>2.3.1.2 Subtraction of Doses for a Shielded Region .....</b>	8
<b>2.3.1.3 Separation of Primary and Scattered Radiation .....</b>	9
<b>2.3.2 Beam Attenuating Devices .....</b>	9
<b>2.3.2.1 Flattening Filters .....</b>	9
<b>2.3.2.2 Wedge Filters .....</b>	9
<b>2.3.2.3 Compensating Filters .....</b>	10
<b>2.4 Beam Data Acquisition .....</b>	10
<b>2.4.1 Types of Data to be Collected .....</b>	10
<b>2.4.1.1 Normalized Dose Distributions .....</b>	10
<b>2.4.1.2 Derived Dosimetric Quantities .....</b>	10
<b>2.4.1.3 Derived Mathematical Coefficients .....</b>	11
<b>2.4.2 Validity of the Data .....</b>	11
<b>3. Representation and Modification of High-Energy Electron Beams .....</b>	12
<b>3.1 Introduction .....</b>	12
<b>3.2 Representation of Electron Beams .....</b>	12
<b>3.2.1 Tabular or Matrix Format .....</b>	12
<b>3.2.2 Beam Generating Functions .....</b>	12
<b>3.2.3 Separation of Direct and Scattering Components .....</b>	13
<b>3.2.4 Representations Using Basic Principles .....</b>	13
<b>3.3 Electron-Beam Modification .....</b>	14
<b>3.3.1 Rectangular Fields .....</b>	14
<b>3.3.2 Irregular Fields .....</b>	14
<b>3.4 Beam Data Acquisition .....</b>	14
<b>4. Acquisition and Representation of Patient Data .....</b>	15
<b>4.1 Introduction .....</b>	15
<b>4.2 Acquisition of Patient Data .....</b>	15
<b>4.2.1 Analog Methods .....</b>	15
<b>4.2.2 Digital Methods .....</b>	15
<b>4.3 Representation of Patient Data .....</b>	16
<b>4.3.1 Representation of Contours in a Section .....</b>	16
<b>4.3.1.1 Polygonal Approximation .....</b>	16
<b>4.3.1.2 Curve Fitting .....</b>	16
<b>4.3.2 Representation of Surfaces in a Volume .....</b>	16
<b>4.3.3 Representation of Densities .....</b>	18

<b>5. Computation of the Absorbed Dose Distribution in a Patient</b>	19
5.1 Introduction .....	19
5.2 Photon Beam Modification by the Patient .....	19
5.2.1 Effect of Source-Surface Distance (SSD) .....	19
5.2.2 Effect of External Shape .....	19
5.2.3 Effects of Composition and Density .....	19
5.2.4 Volume Irradiated .....	23
5.3 Electron Beam Modification by the Patient .....	23
5.3.1 Effect of External Shape .....	23
5.3.2 Effects of Composition and Density .....	23
5.4 Beam Combination .....	24
5.4.1 Stationary Beams .....	24
5.4.1.1 Patient Coordinate System and Patient Grid ..	24
5.4.1.2 Interpolation and Extrapolation .....	24
5.4.1.3 Weighting .....	24
5.4.1.4 Normalization .....	25
5.4.2 Special Problems Related to Moving Beam Therapy ..	26
5.4.3 Special Problems Related to Three-Dimensional Calculations .....	28
<b>6. Practical Aspects of Treatment Planning by Computer</b>	30
6.1 Introduction .....	30
6.2 Building a Beam Library .....	30
6.2.1 Automatic Field Scanning .....	30
6.2.2 Manual Dosimetry .....	30
6.2.3 Generating Programs .....	30
6.2.4 Verification and Listing of the Library .....	30
6.3 Input of Patient Data .....	30
6.3.1 Input from Mechanical Contouring Devices and Radio- graphs .....	31
6.3.2 Analog Input from a Video-Display .....	31
6.3.3 Input Using Digital Images .....	31
6.4 Input of Treatment Parameters .....	32
6.5 Absorbed Dose Computation Time .....	32
6.6 Treatment Plan Visualization and Output .....	32
6.6.1 Interactive Presentation .....	32
6.6.2 Permanent Output .....	33
6.7 Optimization .....	33
6.7.1 Optimization Criteria .....	33
6.7.2 Optimization Methods .....	33
6.7.2.1 Visual Procedures .....	33
6.7.2.2 Mathematical Procedures .....	34
6.7.2.3 Mixed Procedures .....	34
<b>7. Presentation of Results of Calculation</b>	35
7.1 Introduction .....	35
7.2 Alphanumeric Information .....	35
7.2.1 Identification of Patient and Dose Plan .....	35
7.2.2 Description of Technique .....	35
7.2.3 Single Values of Absorbed Dose .....	36
7.2.4 Distribution of Absorbed Dose .....	37
7.2.5 Magnitude of Areas and/or Volumes .....	37
7.2.6 Total Energy Imparted .....	38
7.3 Graphic Information .....	38
7.3.1 Information to be Included on Dose Distribution .....	38
7.3.2 Isodose Pattern—General Remarks .....	39
7.3.3 Type of Presentation—Two-Dimensional .....	39

7.3.3.1 Isodose Line Presentation .....	39
7.3.3.2 Printer Output .....	39
7.3.3.3 Grey-Scale Presentations .....	39
7.3.3.4 Color-Scale Presentation .....	39
7.3.3.5 Isometric Display .....	39
7.3.4 Type of Presentation—Three-Dimensional .....	39
7.3.4.1 Multiplane Display .....	39
7.3.4.2 Display of Surfaces .....	43
7.3.4.3 Digital Dissection .....	43
7.3.4.4 Stereometric Presentation .....	46
7.3.4.5 Beams Eye-View and Projection Through the CT Data .....	46
<b>8. Recording, Monitoring, Automatic Set-Up and Documenta- tion of Treatment .....</b>	<b>47</b>
8.1 Treatment Preparation .....	47
8.2 Automatic Recording .....	47
8.3 Treatment Monitoring .....	47
8.4 Automatic Set-Up and Dynamic Treatment .....	47
8.5 Documentation .....	48
<b>9. Quality Assurance .....</b>	<b>49</b>
9.1 Introduction .....	49
9.2 Program and System Documentation .....	49
9.3 Initial System Checks .....	49
9.4 Repeated System Checks .....	49
9.5 Quality Assurance Through Manual Procedures .....	50
9.6 <i>In vivo</i> Dosimetry .....	50
<b>10. Concluding Remarks .....</b>	<b>51</b>
<b>APPENDIX A: Representation of Photon Beams .....</b>	<b>52</b>
A.1 Representation of Central Ray Dose Distributions for Photon Beams .....	52
A.2 Representation of Cross-Beam Dose Distributions for Photon Beams .....	53
<b>APPENDIX B: Representation of Electron Beams .....</b>	<b>55</b>
B.1 Representation of Central Ray Dose Distributions for Elec- tron Beams .....	55
B.1.1 Empirical Functions .....	55
B.1.2 Semi-Empirical Functions .....	55
B.2 Representation of Cross-Beam Dose Distributions for Elec- tron Beams .....	55
