Preface	iii
List of Symbols	viii
1. Introduction	1
2. Basic Concepts	3
2.1 Definitions and Specifications	3
2.1.1 Phantoms	3
2.1.2 Interaction Coefficients	3
2.1.3 Dosimetric Quantities	4
2.2 Interactions of Radiation with Body Tissues	5
2.2.1 Photons	5
2.2.2 Electrons	7
2.2.3 Neutrons	7
2.2.4 Heavy Charged Particles	9
2.3 Radiation Interaction Characterization of Tissue Substitutes ..	9
2.3.1 Phantom Materials	9
2.3.2 Radiation Detector Materials	11
3. Selection Requirements for Tissue Substitutes	14
3.1 Radiation-Related Requirements	14
3.1.1 Radiotherapy	14
3.1.2 Radiodiagnosis	15
3.1.3 Radiation Protection	16
3.1.4 Radiobiology	17
3.2 Nonradiation-Related Requirements	18
4. The Composition of Body Tissues	20
4.1 Body Tissues Needing Simulation	20
4.2 Biological Variability of Tissues	20
4.3 Average Body Tissues	21
4.4 Recommended Elemental Compositions	23
5. Comparative Interaction and Depth-Dose Data for Selected Tissue Substitutes	24
6. Conclusions	36
6.1 Concluding Remarks	36
6.2 Recommendations	36
Appendix A: Tissue Substitute Compositions	37
Appendix B: Interaction Data for Body Tissues and Tissue Substitutes	39
Appendix C: Formulation and Fabrication Techniques	174
C.1 Formulation Techniques	174
C.2 Fabrication Techniques	175
References	178
ICRU Reports	184
Index	187
