Contents

Preface ... iii

1. Introduction ... 1

2. Principles of Measurement ... 3

2.1 General ... 3
2.1.1 Methods of Measurement ... 3
2.1.2 Instrument Response ... 3
2.1.3 Directional Response ... 3
2.1.4 Accuracy Requirements ... 3
2.2 Operational Quantities ... 4
2.2.1 Terminology ... 4
2.2.1.1 Penetration ... 4
2.2.1.2 Expanded Field ... 4
2.2.1.3 Expanded and Aligned Field ... 4
2.2.2 Definitions of the Operational Quantities ... 4
2.2.2.1 Area Monitoring ... 4
2.2.2.2 Individual Monitoring ... 5

3. Characteristics of Instruments ... 7

3.1 Introduction ... 7
3.2 General Characteristics and Requirements ... 7
3.2.1 Area Survey Instruments ... 7
3.2.2 Individual Dosimeters for Strongly and Weakly Penetrating Radiation ... 9
3.3 Ionization Chambers ... 9
3.3.1 Photon Measurements ... 9
3.3.2 Electron Measurements ... 10
3.4 Proportional Counters ... 11
3.5 Geiger-Müller Counters ... 11
3.5.1 Photon Measurements ... 11
3.5.2 Electron Measurements ... 11
3.6 Scintillation Detectors ... 11
3.6.1 Photon Measurements ... 12
3.6.2 Electron Measurements ... 12
3.7 Semiconductor Detectors ... 12
3.7.1 Photon Measurements ... 12
3.7.2 Electron Measurements ... 12
3.8 Photographic Films ... 13
3.8.1 Photon Measurements ... 13
3.8.2 Electron Measurements ... 13

3.9 Thermoluminescent Dosimeters (TLD's) 14
3.9.1 Photon Measurements 14
3.9.2 Electron Measurements 15
3.10 Thermally Stimulated Exoelectron Emission (TSEE) Detectors 15
3.10.1 Photon Measurements 16
3.10.2 Electron Measurements 16
3.11 Photoluminescent (PL) Detectors 16

4. Calibrations 18

4.1 Introduction 18
4.2 Calibration of Area (Environmental) Monitors 18
4.2.1 X Rays and Gamma Rays 19
4.2.2 Beta Rays and Electrons 19
4.3 Calibration of Individual Dosimeters 19
4.3.1 Phantoms 19
4.3.2 Quantities Used for Calibration 20

5. Impact of New Operational Quantities on the Design of Future Instrumentation 21

5.1 Strongly Penetrating Radiation Measurements 21
5.1.1 Environmental Monitors 21
5.1.2 Individual Dosimeters 21
5.2 Weakly Penetrating Radiation Measurements 21
5.2.1 Environmental Monitors 21
5.2.2 Individual Dosimeters 21

Appendix A: Conversion Coefficients for Dose Equivalent Quantities 22

A.1 Introduction 22
A.2 Conversion Coefficients for Monoenergetic Photons 22
A.2.1 Air Kerma 26
A.2.2 Exposure 26
A.2.3 Ambient Dose Equivalent 27
A.2.4 Directional Dose Equivalent 27
A.3 Conversion Coefficients for Continuous Photon Spectra 28
A.4 Conversion Coefficients for Electrons 28
