

CONTENTS

Section 1. OVERVIEW OF TECHNIQUES AND APPLICATIONS

ENERGETIC ELECTRON INDUCED PLASMA PROCESSES
FOR REDUCTION OF ACID AND GREENHOUSE GASES
IN COMBUSTION FLUE GAS 1
J.-S. Chang

THE NEED FOR MIXED WASTE TREATMENT OPTIONS
WITHIN THE US DEPARTMENT OF ENERGY 33
W. H. McCulla and D. M. French

PLASMA ARC PROCESSING OF SOLID AND LIQUID WASTES 43
M. P. Schlienger

APPLICATION OF PLASMA TECHNOLOGY FOR PROPOSED
MILITARY AIR PURIFICATION SYSTEMS 49
D. E. Tevault

Section 2. FUNDAMENTALS

CHEMICAL KINETICS MODEL OF SO₂/NO_x REMOVAL
BY ELECTRON BEAM 59
H. Mätzing

PLASMA CHEMISTRY AND POWER CONSUMPTION IN
NON-THERMAL DeNO_x 65
B. M. Penetrante

THE EFFECT OF CLUSTERS AND HETEROGENEOUS
REACTIONS ON NON-EQUILIBRIUM PLASMA
FLUE GAS CLEANING 91
B. V. Potapkin, M. A. Deminsky, A. A. Fridman, and V. D. Rusanov

CHEMICAL KINETICS DATA FOR MODELING
NON-THERMAL PLASMAS 107
J. T. Herron

INTERACTION OF ORGANOPHOSPHONATES WITH
O(³P), N(⁴S), O₂(a¹Δ_g), AND O₃ 123
R. L. Sharpless and T. G. Slanger

DECOMPOSITION OF NO₂ BY GLOW DISCHARGE PLASMA 139
Y. Sakai and H. Tagashira

NEGATIVE CORONA INDUCED DECOMPOSITION OF CCl_2F_2	151
<i>J. D. Skalny, V. Sobek, and P. Lukac</i>	
HIGH PRESSURE DISCHARGE AS A TRIGGER FOR POLLUTION CONTROL	167
<i>E. Marode, A. Goldman, and M. Goldman</i>	
ENERGIZATION OF PULSE CORONA INDUCED CHEMICAL PROCESSES	191
<i>M. Rea and K. Yan</i>	
ELECTRICAL AND OPTICAL STUDY OF PULSED POSITIVE CORONA	205
<i>Y. L. M. Creighton, E. M. van Veldhuizen, and W. R. Rutgers</i>	
EMISSION SPECTROSCOPY OF CORONA DISCHARGES	231
<i>T. H. Teich</i>	
MULTI-DIMENSIONAL MODELING OF THE DYNAMIC MORPHOLOGY OF STREAMER CORONAS	249
<i>P. A. Vitello, B. M. Penetrante, and J. N. Bardsley</i>	
MODELING OF DIELECTRIC BARRIER DISCHARGES	273
<i>G. J. Pietsch, D. Braun, and V. I. Gibalov</i>	
COMPARISONS OF MULTI-DIMENSIONAL FLUID MODELS FOR STREAMERS	287
<i>J.-M. Guo and C.-H. Wu</i>	
ELECTRON DATABASE NEEDED FOR DISCHARGE MODELING IN FLUE GAS TREATMENT	299
<i>M. Yousfi, A. Poinsignon, and A. Hamani</i>	
THE ROLE OF ELECTRON ATTACHMENT TO GAS MOLECULES IN ELECTROSTATIC PRECIPITATORS	331
<i>J. J. Lowke</i>	

Section 3. SUPPORTING TECHNOLOGIES

A LONG LIFE, HIGH REPETITION RATE ELECTRON BEAM SOURCE	339
<i>S. J. Scott</i>	
GENERATION OF ELECTRON BEAM FOR TECHNOLOGICAL PROCESSES	345
<i>S. Pekarek, J. Rosenkranz, and H. Lonekova</i>	

HIGH AVERAGE POWER MODULATOR AND ACCELERATOR TECHNOLOGY DEVELOPMENTS AT PHYSICS INTERNATIONAL.....	355
<i>P. Sincerny, C. Deeney, S. Ashby, D. Bhasavanich, J. Benford, G. Frazier, J. Levine, and L. Schlitt</i>	
INITIAL RESULTS FROM THE RHEPP MODULE	367
<i>E. L. Neau, H. C. Harjes, K. W. Reed, K. J. Penn, R. W. Wavrik, D. L. Johnson, C. R. McClenahan, and K. R. Prestwich</i>	
POWER CONDITIONING FOR CORONA DISCHARGE TREATMENT OF EFFLUENT GASES	379
<i>G. Kirkman, N. Reinhardt, B. Jiang, J. Hur, and J. Yampolski</i>	
INDEX	387
