

## Volume 2

<b>III. Radiation Protection .....</b>	<b>621</b>
37. The United States Department of Energy / United States Environmental Protection Agency Beneficial Uses Program for the Use of Cesium-137. <b>Dennis L. Krenz and William H. McMullen .....</b>	623
38. Assessment of Radiation Exposure Level for the Protection Around X-ray Installations in Bangladesh. <b>S.R. Husain, S.A. Abdullah, M.M. Rahman, M.A. Hai and M.N. Alam .....</b>	651
39. Intercomparison between Radiation Medical Exposure and Radiation Occupational Exposure in the Atomic Energy Establishment of Egypt. <b>M.A. Gomma, A.M. Eid, M.A. El-Kolaly and M.A. Ayad .....</b>	673
40. Radiation Protection in Modern Nuclear Medicine and Brachytherapy Departments by Management and Regulations and/or by Equipment and Installations. <b>M.W. Görtler and Udo M.F. Altemark .....</b>	693
41. The Role of Radiation Protection Section in Public Health Services in Kuwait. <b>Jasem M. Al-Mudaires .....</b>	705
42. Electron Donors and Radiation Protection. <b>W. Lohmann, A. Bahr, M. Wunderling, J. Schreiber, H. Sapper and V. Penka .....</b>	717
43. Progress in Radiation Protection Instrumentation for Medical and Biochemical Radionuclide Laboratories. <b>R. Maushrat .....</b>	727
<b>IV. Gamma Irradiation .....</b>	<b>735</b>
44. $\gamma$ -Radiation Effect on Trioctyl Amine/Xylene System. <b>Amer M.A. Al-Ani and Fatma M. Masoud .....</b>	737
45. Some Mixed Alkali Borate Glasses Containing Nickel Exposed to Gamma-Rays. <b>A.H. Zahran, F.M. Ezz El-Din, F.A. Moustaffa and N.A. Ghoneim .....</b>	761
46. Gamma-Ray Interaction on Some Glasses Containing Chromium. <b>N.A. Ghoneim, H.A. El Batal, A.H. Zahran and F.M. Ezz El Din .....</b>	777
<b>V. Radiation Chemistry .....</b>	<b>801</b>
47. Study of Decay-Induced Methods for Bromine-80 Labelling. <b>J.F. Mustaklem and H.J. Ache .....</b>	803
48. Practical Applications of Pulse Radiolysis Techniques. <b>Yoneho Tabata .....</b>	837
49. Practical Application of Activation Analysis and Other Nuclear Techniques. <b>W.S. Lyon .....</b>	871

50.	Spectrophotometric and Decontamination Studies on Uranium Wastes. <b>A. Al-Suhybani, S. Al-Khowaiter, F. Abou El-Nour and E. Hallaba</b>	885
51.	A Mobile System for the Analysis of Some High Thermal Neutron-Capture Gamma Cross-section Elements. <b>Ibrahim Kh. Al Haddad and Kamel M. Shihab</b>	893
52.	Labelling of Long Chain Fatty Acids by Nucleophilic Halogen Substitution. <b>E. Hallaba, S. El Bayoumi, A.S.A. El-Wetery, H.H. Coenen, G. Kloster and G. Stocklin</b>	903
53.	Novel Application of Radiotracer Technique in the Study of Molecular Complexes. <b>S.P. Mishra, R.A. Sing and V. Upadhyaya</b>	913
54.	Radiotracer Technique in Adsorption Studies: Adsorption of Phosphate Ions on Metal and Oxide Surfaces. <b>N.S. Lal, S.P. Mishra and T.B. Singh</b>	921
<b>VI.</b>	<b>Radioisotope Production</b>	929
55.	Role of Research Reactors in Applications and Technology of Ionizing Radiations. <b>W.L. Whittemore and R.H. Chesworth</b>	931
56.	Low-Cost Hot Facility for High-CI Gamma-Source Processing. <b>Chia-Chi Chu and Yü-Der Chuang</b>	947
57.	Production of Fission Molybdenum on a Technical Scale at the Nuclear Research Center Karlsruhe. <b>Sameh A. Ali, Josef Konard and Hans J. Ache</b>	957
58.	Preparation and Quality Control of Indium-111 Radiopharmaceuticals <b>D.E. Lovett</b>	963
59.	INER Sterile $^{113m}$ In-Generator - Its Preparation and Medical Applications. <b>Tong-Bao Chen, Shyong Lin, Daw-Quey Tsay, Shin-Hwa Yeh, Tsing-Ko Lin, Zei-Tsan Tsai and Chau-Sung Luan</b>	971
60.	Investigation of Some Parameters Related to the Kit for the Preparation of $^{99m}$ Tc-Human Albumin Microspheres ( $^{99m}$ Tc-HAM) as a Radiopharmaceutical for Lung Scanning. <b>M.A.A. Al-Janabi, H.Y. Ali and A.M. Al-Salem</b>	981
61.	Cyclotrons for Radionuclide Production. <b>Bernth Malm</b>	997
62.	Radioisotope Production at the Cyclotron in Rio de Janeiro. <b>A.G. da Silva, O.F. Lemos, J.L. de Britto, J.A. Osso, M.A.V. Bastos, A.M.S. Braghierioli, D.f.S. Chamma, G.W.A. Newton and R. Weinreich</b>	1007
63.	Utilization of Medium Energy Research Cyclotrons for Medical Isotope Production. <b>F. Hegedüs, J.A. Jungerman and G.L. Denardo</b>	1021

64. The Development of Radioactive Quaternary Ammonium Compounds for Cartilage Visualization.  
**M. Anwar Qureshi** ..... 1035
