

CONTENTS

OPENING LECTURE

Harm to the cell and harm to the individual (IAEA-SM-266/87)	3
<i>E. Pochin</i>	
Discussion	17

EPIDEMIOLOGICAL STUDIES OF A-BOMB EXPOSURE (Session I)

Potential influence of new doses of A-bomb after re-evaluation of epidemiological research (IAEA-SM-266/88)	21
<i>T. Maruyama</i>	
Evaluation of low-level effects in the Japanese A-bomb survivors after current dose revisions and estimation of fallout contribution (IAEA-SM-266/23)	45
<i>I. Schmitz-Feuerhake, P. Carbonell</i>	
Re-evaluation of biological effects of atomic bomb radiation by changes of estimated dose (IAEA-SM-266/44)	55
<i>S. Fujita, A.A. Awa, D.A. Pierce, H. Kato, Y. Shimizu</i>	
Pragmatic evaluation of repercussions for radiological protection of recent revisions in Japanese A-bomb dosimetry (IAEA-SM-266/52)	61
<i>M.W. Charles, P.J. Lindop, A.J. Mill</i>	
Discussion	77

BASIC RESEARCH (Session II)

A combined hit theory-microdosimetric explanation of cellular radiobiological action (IAEA-SM-266/63)	81
<i>V.P. Bond, M.N. Varma</i>	
Induction of cell death in the testis of <i>Heteracris littoralis</i> by gamma rays (IAEA-SM-266/40)	97
<i>A.A. Al-Taweel, M.A. Shawkit</i>	
UV fluorescence in lymphocytes after incorporation of various radionuclides in rats (IAEA-SM-266/36)	107
<i>F. Gensicke, G. Stopp, E. Trölsch, I. Neuhäuser</i>	

Derangement of cellular plasma membranes due to non-lethal radiation doses (IAEA-SM-266/37)	115
<i>G.J. Köteles, T. Kubasova, Z. Somosy, L. Horváth</i>	
Association between stochastic and non-stochastic effects and cellular damage (IAEA-SM-266/45)	129
<i>H.P. Leenhouts, K.H. Chadwick</i>	
Discussion	139

EFFECTS ON GENETIC MATERIALS (Session III)

Cytogenetic effects of low-dose radiation (IAEA-SM-266/89)	143
<i>P. Metalli</i>	
Chromosomal aberrations in peripheral lymphocytes of patients exposed to diagnostic X-irradiation in combination with contrast medium (IAEA-SM-266/21)	165
<i>W. Hadnagy, G. Stephan</i>	
Comparison of dose dependence of chromosome aberrations in peripheral lymphocytes at low levels of acute in vitro irradiation with 250 kV X-rays and 14 MeV neutrons (IAEA-SM-266/4)	171
<i>J. Pohl-Rüling, P. Fischer, K.E. Buckton, R.N. Mukherjee, W. Binder, R. Nowotny, W. Schmidt, N.O. Bianchi, P.P.W. Van Buul, L. Fabry, M. Kučerová, A. Léonard, D. Lloyd, U. Mukherjee, A.T. Natarajan, G. Obe, F. Palitti, T. Sharma</i>	
Effects of chronic low-dose exposure on DNA repair processes and sister chromatid exchanges (IAEA-SM-266/7)	185
<i>H. Tuschl, H. Altmann, R. Kovac, A. Topaloglou</i>	
Effects of ¹²⁵ I-triiodothyronine on mammalian cells (IAEA-SM-266/50) ...	191
<i>S. Sundell-Bergman, K.J. Johanson</i>	
Dose-response relation for chromosomal aberrations in irradiated human lymphocytes (IAEA-SM-266/92)	199
<i>N.V. Luchnik</i>	
Discussion	207

EPIDEMIOLOGICAL STUDIES OF MEDICAL OR ENVIRONMENTAL EXPOSURE (Session IV)

Health effects in residents of high background radiation regions (IAEA-SM-266/81)	211
<i>G.P. Hanson, E. Komarov</i>	
Cancer of the thyroid and ¹³¹ I fallout in Norway (IAEA-SM-266/48)	231
<i>P. Oftedal, E. Lund</i>	

Risk-benefit-cost considerations for the exposure of man to the natural radiation environment (IAEA-SM-266/5)	241
<i>F. Steinhäusler, E. Pohl</i>	
Relation between cancer incidence or mortality and external natural background radiation in Japan (IAEA-SM-266/41)	253
<i>Y. Ujeno</i>	
Quantitative risk assessment of ionizing radiation: lessons from chemical carcinogens (IAEA-SM-266/77)	263
<i>M. Martinelli, P.F. Ricci</i>	
Risk from exposure to radiation and chemical mutagenic agents at a coal-fired power station (IAEA-SM-266/72)	275
<i>A. Bauman, D. Horvat, V. Šaler, J. Kovač</i>	
Incidence of tumours of the skeleton in ²²⁴ Ra-treated ankylosing spondylitis patients (IAEA-SM-266/15)	281
<i>R.R. Wick, W. Gössner</i>	
Is ¹³¹ I less efficient than external irradiation at producing thyroid cancers? a review (IAEA-SM-266/14)	289
<i>J.R. Johnson, D.K. Myers</i>	
Discussion	303

EPIDEMIOLOGICAL STUDIES OF OCCUPATIONAL EXPOSURE (Session V)

Evaluation of pathological effects in people occupationally exposed to radioiodine and problems of differential diagnosis (IAEA-SM-266/70)	307
<i>D. Stojanović, K. Milivojević, Lj. Vračarić, D. Veljković, Ž. Ubović, M. Trajković, Z. Djukić</i>	
Mortality study of Japanese radiological technologists (IAEA-SM-266/43)	319
<i>T. Aoyama, A. Futamura, Y. Yamamoto, H. Kato, T. Sugahara</i>	
Non-stochastic effects of ²²⁶ Ra and ²²⁸ Ra in the human skeleton (IAEA-SM-266/24)	329
<i>A.T. Keane, I.E. Kirsh, H.F. Lucas, R.A. Schlenker, A.F. Stehney</i>	
Epidemiological studies in three corporations covering the Canadian nuclear fuel cycle (IAEA-SM-266/9)	351
<i>J.D. Abbatt, T.R. Hamilton, J.L. Weeks</i>	
Job-related mortality risks of Hanford workers and their relation to cancer effects of measured doses of external radiation (IAEA-SM-266/58)	363
<i>G.W. Kneale, T.F. Mancuso, A.M. Stewart</i>	

Progress to date in the Central Electricity Generating Board study of low-level radiation effects in classified workers (IAEA-SM-266/53) ...	373
<i>J.A. Bonnell, G.A. Harte, C.A. Rubin</i>	
Comparaison quantitative des faibles doses de radiations et des doses d'un génotoxique chimique industriel: l'oxyde d'éthylène (IAEA-SM-266/35)	383
<i>M. Francart-Kindts, B. Festy, R. Latarjet</i>	
Epidemiological studies of those occupationally exposed to ionizing radiation in the United Kingdom (IAEA-SM-266/61)	395
<i>J.A. Reissland, G.M. Kendall, S.F. Barry</i>	
Discussion	405

NON-STOCHASTIC EFFECTS (Session VI)

General survey of non-neoplastic radiation effects (IAEA-SM-266/90)	409
<i>G. Silini</i>	
Contribution of ADP-ribosylation to cellular recovery of L5178Y-R and L5178Y-S lymphoblasts (IAEA-SM-266/49)	427
<i>I. Szumiel, D. Włodek, M. Zernik, G. Szabo</i>	
Relevance of neutron data to end-points other than carcinogenesis (IAEA-SM-266/75)	435
<i>M. Coppola, B. Bertoncello</i>	
Sensitivity of oocytes in adult mice in the low-dose region (IAEA-SM-266/39)	445
<i>J. Philip, M.B. Bhatt, K. Sundaram</i>	
Acute effect of very low dose in mouse bone marrow cells: a physiological response to background radiation? (IAEA-SM-266/27) ...	459
<i>L.E. Feinendegen, H. Mühlensiepen, C. Lindberg, J. Marx, W. Porschen, J. Booz</i>	

STOCHASTIC EFFECTS (Session VII)

Factors modifying sensitivity to carcinogens and the problem of threshold in carcinogenesis (IAEA-SM-266/91)	475
<i>V.N. Anisomov</i>	
Effects of low-level radiation upon the haematopoietic stem cell: implications for leukaemogenesis (IAEA-SM-266/64)	483
<i>E.P. Cronkite, V.P. Bond, A.L. Carsten, M.E. Miller, J.E. Bullis</i>	
Augmentation des tumeurs extrapulmonaires après inhalation de faibles doses d'oxyde de plutonium par le rat (IAEA-SM-266/28)	497
<i>D. Nolibé, R. Masse, I. L'hullier, H. Métivier, J. Lafuma</i>	

Dose-effect relations for mammary carcinogenesis in different rat strains after irradiation with X-rays and monoenergetic neutrons (IAEA-SM-266/46)	507
<i>J.J. Broerse, L.A. Hennen, M.J. van Zwieten, C.F. Hollander</i>	
Life shortening and tumour induction after single and fractionated neutron or gamma irradiation (IAEA-SM-266/78)	521
<i>J.R. Maisin, G.B. Gerber, J. Gueulette, G. Mattelin, M. Lambert-Collier, B. de Coster, A. Wambersie</i>	
Longevity and tumour incidence in mice exposed to fast neutrons at different ages (IAEA-SM-266/76)	531
<i>V. Covelli, V. di Majo, B. Bassani, S. Rebessi, P. Metalli, M. Coppola</i>	
Discussion	541

APPLICATION OF PRINCIPLES (Session VIII)

Considérations sur les effets non monotones aux faibles intensités de rayonnement, le problème de l'extrapolation des doses entre fortes et faibles intensités, et le problème des seuils (IAEA-SM-266/31)	545
<i>P. Delattre</i>	
L'évaluation des risques dus aux installations nucléaires: variation des résultats en fonction des modèles proposés (IAEA-SM-266/32)	561
<i>Ph. Hubert</i>	
Problèmes posés par les expositions à faible niveau dans l'optimisation de la protection radiologique (IAEA-SM-266/29)	571
<i>H. Jammet, R. Coulon</i>	

POSTER SESSION I

Dimensions of bone cell nuclei and hit probabilities from surface-seeking alpha emitters (IAEA-SM-266/18P)	583
<i>E. Polig, D.B. Kimmel, W.S.S. Jee</i>	
Long-term effects in mice over a wide range of α -doses following inhalation of $^{239}\text{PuO}_2$ (IAEA-SM-266/54P)	586
<i>B.E. Lambert, M.L. Waller, A. Black, S.R. Moores</i>	
Radiation carcinogenesis at low dose levels: theoretical considerations (IAEA-SM-266/56P)	587
<i>P.R.J. Burch</i>	
Specification of low dose in late-effect investigations (IAEA-SM-266/25P) ...	589
<i>J. Booz, L.E. Feinendegen, B. Bauer</i>	

Some theoretical considerations in regard to the effects of low doses of ionizing radiations motivated by track theory (IAEA-SM-266/1P)	590
<i>W. Hofmann, R. Katz</i>	
Quantitative risk assessment: a comparison between smoking and ionizing radiation (IAEA-SM-266/86P)	592
<i>C. Dejak, M. Martinelli, O. Tubertini</i>	
Inhalation d'oxyde de plutonium: relation dose-effet en présence d'un cancérrogène chimique (IAEA-SM-266/33P)	596
<i>H. Métivier, R. Masse, I. L'hullier, D. Nolibé, J. Lafuma</i>	
Followup of employees involved in cleanup operations at research reactors in Chalk River in 1953 and 1958 (IAEA-SM-266/13P)	598
<i>M.M. Werner, D.K. Myers, A.M. Marko, D.P. Morrison</i>	
Risk estimation from medical and occupational exposures in Japan (IAEA-SM-266/80P)	599
<i>T. Maruyama, Y. Kumamoto, H. Nishizawa, T. Hashizumi</i>	
Cancer incidence in occupational exposure at low dose rates (IAEA-SM-266/71P)	600
<i>M.D. Besarabić</i>	
The British Nuclear Fuels Ltd. radiation mortality study (IAEA-SM-266/62P)	602
<i>E.A. Clough, G.B. Schofield</i>	
Cancer incidence and mortality among plutonium and other radiation workers (IAEA-SM-266/65P)	603
<i>G.S. Wilkinson, J.F. Acquavella, G.L. Voelz, G. Tietjen, C. Key</i>	
Estimates of risk of induced leukaemia after neutron or photon radiotherapy (IAEA-SM-266/59P)	606
<i>J.H. Hendry, Fu-Du Chen</i>	
Leukaemia morbidity in Bavaria 1976–1981: an epidemiological study including low-level radiation from natural and artificial sources (IAEA-SM-266/22P)	609
<i>B. Grosche, G. Hinz, C. Tsavachides</i>	
Indicators of possible beneficial effects of low-level radiation (IAEA-SM-266/69P)	611
<i>J.J. Cohen, C.F. Smith, T.D. Luckey</i>	
Radiological safety: will the risk factors prove to be real? (IAEA-SM-266/55P)	613
<i>S. Jackson</i>	
Estimating radiation cancer risks using studies in laboratory animals and human epidemiology (IAEA-SM-266/66P)	615
<i>R.G. Cuddihy, W.C. Griffith, B.B. Boecker, F.F. Hahn, R.O. McClellan</i>	

POSTER SESSION II

Radiomimetic action of ozone in mice: temporary elevation of serum thymidine concentration and inhibition of IUdR uptake into whole-body DNA (IAEA-SM-266/26P)	619
<i>W. Porschen, L.E. Feinendegen</i>	
Alpha radiation induces changes of gene expression (IAEA-SM-266/19P) ...	621
<i>P. Herrlich, L. Hieber, C. Lücke-Huhle, U. Mallick</i>	
Compared effects of physical and chemical genotoxic agents (IAEA-SM-266/85P)	622
<i>Z. Toman, L. Tenenbaum, J. Rommelaere, A. Radman, C. Dambly, M. Errera</i>	
Identification of heterozygotes for Fanconi's anaemia mutation (IAEA-SM-266/73P)	623
<i>A. Farulla, G. Naro, F. Tomei, G. Dragagna, F.R. Ugliano</i>	
X-ray-induced chromosomal aberrations in germ cells of the rhesus monkey (IAEA-SM-266/47P)	625
<i>P.P.W. Van Buul</i>	
Effects of low-dose irradiation from tritium-labelled uridine on the induction of somatic mutations in <i>Tradescantia</i> (IAEA-SM-266/42P)	626
<i>S. Tano, H. Yamaguchi</i>	
Temporary changes of mitotic activity following low-level gamma and neutron irradiation (IAEA-SM-266/8P)	628
<i>P. Eckl, E. Pohl, F. Steinhäusler</i>	
Applications of radiation chemical methods to the study of biological damage (IAEA-SM-266/74P)	630
<i>R. Badiello</i>	
Physiological factors influencing repair of ionizing radiation damage and its somatic genetic consequences in <i>Saccharomyces cerevisiae</i> (IAEA-SM-266/11P)	631
<i>P. Unrau, J.R. Johnson</i>	
Chromosome aberrations induced in lymphocytes from man and crab-eating monkey at low doses (IAEA-SM-266/79P)	633
<i>I. Tobari, E. Takahashi, M. Hirai, S. Nakai</i>	
Effects of natural ionizing radiations and very low doses of gamma rays on the cell fission potential (IAEA-SM-266/34P)	634
<i>R. Tixador, H. Planel, E. Monrozies, G. Daste</i>	
Low-dose alpha irradiation: response of mouse embryo fibroblast cells in vitro (IAEA-SM-266/16P)	637
<i>J. Schmidt, V. Erfle, H. Schetters, W.A. Müller</i>	

Effects of X-rays and γ -rays or neutrons determined in plant and mammalian cells: dose-relationship curves (IAEA-SM-266/51P)	640
<i>M. Bianchi, I. Marshall, M. di Paola, B.R. Guerra, M. Quintiliani</i>	
Activation of endogenous C-type retroviruses by low-dose internal α -irradiation (IAEA-SM-266/17P)	642
<i>J. Schmidt, H. Schetters, V. Erfle</i>	
Low-level radiation-induced biophysical effects of mammalian cells (IAEA-SM-266/3P)	645
<i>F. Steinhäusler, B. Reubel, W. Heidegger, M. Huber, J. Pohl-Rüling</i>	
The effects of chronic γ -irradiation on experimental fish populations: a preliminary account (IAEA-SM-266/60P)	646
<i>D.S. Woodhead, C.J. Barker, B.D. Rackham</i>	
Haematological results of mice irradiated with low doses and fractionated regime (IAEA-SM-266/83P)	648
<i>R. Gallini, S. Belletti, F. Bontempi, U. Giugni</i>	
Effect of daily and multiple daily dose fractioning at low dosage on haematopoietic tissue of mice (IAEA-SM-266/82P)	650
<i>S. Belletti, R. Gallini, U. Giugni, F. Bontempi</i>	
Induction of mammary tumours in rats by X-rays and tritium β -rays (IAEA-SM-266/12P)	653
<i>D.K. Myers, N.J. Gragtmans, J.R. Johnson, L.D. Johnson, A.R. Jones</i>	
Effets d'irradiation globale par des neutrons de fission à des doses comprises entre 10^{-3} Gy et 10^{-2} Gy (IAEA-SM-266/30P)	654
<i>M. Morin, J. Lafuma</i>	
Chairmen of Sessions and Secretariat of the Symposium	657
List of Participants and Designating Member States and Organizations	659
Author Index	677
Index of Papers and Posters by Number	681
