

# Contents

Preface	xvii
Introductory Lectures	
Fusion Energy and Its Environmental Impact <i>G.P. Casini and R. Toschi</i>	3
The Gran Sasso Underground Laboratories <i>E. Bellotti, M. Buraschi, E. Fiorini and C. Liguori</i>	11
Synchrotron Radiation in Biophysics and Medicine	
Synchrotron Radiation Applications in Biophysics and Medicine <i>E. Burattini</i>	23
Characterization of Metal Sites in Nucleic Acids by High Resolution X-Ray Spectroscopy <i>M. Belli, A. Balerna, E. Bernieri, A. Bianconi, E. Burattini, M. Matzeu, F. Mazzei, S. Mobilio, C.R. Natoli, G. Onori, L. Palladino, A. Reale, E. Rongoni and A. Scafati</i>	33
XANES Spectroscopy Contribution to the Knowledge of the Hemoproteins Local Structure <i>A. Congiu-Castellano and A. Bianconi</i>	43
Small Angle X-Ray Scattering Experiments with Three-Dimensional Imaging Gas Detectors <i>A. La Monaca, M. Iannuzzi and R. Messi</i>	49
Accelerators in Environmental and Biomedical Research	
Physical Methods in Air Pollution Research: the Second Decade <i>T.A. Cahill</i>	55

The Use of Accelerators in Environmental Study <i>R. Cecchi and G. Ghermandi</i>	63
The Use of the CISE Tandem VdG in Environmental Research <i>E. Caruso, E. Cereda, G.M. Braga Marcazzan, G. Lombardo and P. Redaelli</i>	75
Transport Dynamics of Colloids Across the Water–Air Interface In Aerosol Production. Interest of the Processes in Some Peculiar Environmental Conditions <i>G. Calvelli, D. Ceccato, P. Mittner, E. Schiavuta, P. Giaretta, R. Cini, G. Loglio and U. Tesei</i>	79
Multielemental PIXE Analysis of the Aerosols and High Sensitivity Measurements of the SO <sub>2</sub> Levels in the City of Venice <i>G. Calvelli, D. Ceccato, P. Mittner, E. Schiavuta, A. Zannoni, E. Argese, A. Baldo and A. Rigo</i>	83
Calibration of a PIXE Set-Up Used in the Analysis of Environmental Samples <i>G. Calvelli, D. Ceccato, P. Mittner, E. Schiavuta, V. Bisceglie and P. Giaretta</i>	87
Some Problems in Medicine and Biology Which Can Be Studied by the Use of Particle Accelerators <i>V. Valković</i>	91
Research on Trace Elements in Biomedicine Carried out in Italy Using Nuclear Accelerators <i>R. Moro</i>	99
A New Facility for Radiobiological Studies with Proton Beams : Survival and DNA Damage in Mammalian Cells <i>M. Belli, R. Cherubini, S. Mazzucato, G. Moschini, O. Sapora, G. Simone and M.A. Tabocchini</i>	109

Optimization of Irradiation System for On-Line Production and Recovery of the Generator for Biomedical Purposes $^{195}\text{mAu}$ , $^{195}\text{mAu} / ^{195}\text{mAu} - \text{Au}$ <u>via</u> $^{195}\text{mAu}(\text{p}, 3\text{n})$ Nuclear Reactions	115
<i>C. Birattari, M. Bonardi, A. Bazzocchi and F. Groppi</i>	
Outline of the Design of the System for Production of Electron and Photon Beams by a 20 MeV Microtron to Be Put in Operation at the ENEA Casaccia Center for Metrological and Biological Purposes	119
<i>R.F. Laitano</i>	
Ferrokkinetic Study in Plasma with Stable Isotopes as Tracers	125
<i>M.C. Cantone, N. Molho, L. Pirola, Ch. Hansen, P. Roth and E. Werner</i>	
Determination of Calcium Content in Human Bone by PIXE Technique	129
<i>E. Caruso, G.M. Braga Marazzan, P. Redaelli, E. Bonucci, P. Ballanti, S. Mazzaferro and G. Coen</i>	
Response Functions of an X-Rays Detecting System for Spectral Analysis of Therapeutic Beams.	133
<i>F. Groppi, N. Molho and L. Pirola</i>	
Fluorine Concentrations in Teeth Studied by $^{19}\text{F}(\text{p}, \alpha_0)^{16}\text{O}$ Nuclear Reaction	137
<i>L. Torrasi</i>	
<b>Applications of Nuclear Physics Techniques</b>	
The Physics of Emission Computed Tomography : SPECT and PET	145
<i>A. Del Guerra</i>	
On Latent Track Formation in SSNTDs	159
<i>G. Campos Venuti, M. Cignitti and S. Simula</i>	
The Development of Advanced Radiation Detectors for Biomedical Imaging at the Pisa University	165
<i>R. Bellazzini, A. Brez, M.M. Massai and M.R. Torquati</i>	

Enhanced Natural Radioactivity Due to Coal-Fired Power Plants	169
<i>R. Borio, G. Campos Venuti, L. Majorana, S. Risica and S. Simula</i>	
Use of Solid State Nuclear Track Detectors for Radon Concentration Measurements Indoors	175
<i>G. Campos Venuti, A. Grisanti, G. Grisanti, S. Risica, A. Antonini, R. Borio, G. Gobbi, M.P. Leogrande and I. Laakso</i>	
Interaction of Monoenergetic Radiation with Matter : Applications in Medicine	179
<i>R. Cesareo, G. Viezzoli, E. Alexiu, G. Sacchetti, M. Sgarbazzini and S. Merli</i>	
Optical Techniques	
Photoacoustics in Environmental Research and Biomedicine	187
<i>D. Fournier</i>	
Photoacoustic Spectroscopy of Erythrocyte Membranes and Spectrin	197
<i>A. Figari, A. Beraldo, A. Martinelli, D. Volpes and A. Zanella</i>	
Photoacoustic Spectroscopy of a Neoplastic Cell Strain	201
<i>M. Grandolfo, G. Mariutti and P. Vecchia</i>	
ATPase Activity Enhanced by GaAs Laser Irradiation	205
<i>G. Majni, L. Bolognani, E. Davolio and N. Volpi</i>	
Continuous and Pulsed Laser Beam Irradiation on Hydrolytic Enzyme Activities	209
<i>G. Majni, L. Bolognani, E. Davolio and N. Volpi</i>	
Perspectives of Magnetic Resonance Techniques	
Some Recent Applications of EPR in Biomedical Research	215
<i>N.J.F. Dodd</i>	
Recent Advances in NMR Imaging	225
<i>E.R. Andrew</i>	

Perspectives of NMR in Oncology : Intermediate Metabolism and Tissue Characterization of Tumors During <i>in vivo</i> Growth and Regression	237
<i>F. Podo, G. Carpinelli, M. Di Vito, M.A. Macri, M. Giannini, E. Proietti, F. Belardelli, I. Gresser, C. Casieri, F. De Luca and B. Maraviglia</i>	
Techniques Different from Fast Fourier Transform for NMR Data Processing.	247
<i>V. Viti, P. Barone, L. Guidoni and E. Massaro</i>	
EPR Evaluation of Iron not Bound to Transferrin in $\beta$ -Thalassemia	253
<i>S. Costantini, R. Giordano, P.L. Indovina, S. Onori and A. Rosi</i>	
<i>In vivo</i> Dynamic Measurements of Intracellular pH and Energetic Charge in Neoplastic Cells by $^{31}\text{P}$ -NMR Spectroscopy	259
<i>L. Bellitto, M.P. Colombini, I. Cozzani and C.A. Verscini</i>	
$^1\text{H}$ -NMR Relaxation in Hydrated Sephadex Systems	263
<i>P. Fantazzini and L. Lendinara</i>	
$^1\text{H}$ -NMR Study of Human Liver Biopsies with the Low Resolution Technique	267
<i>P. Fantazzini, L. Lancellotti, L. Lendinara, F. Novello and L. Sensi</i>	
Effects of All-Trans-Retinol on Human Tumor Cell Growth : $^{31}\text{P}$ NMR Studies	271
<i>A. Rosi, L. Guidoni, G. Mariutti and V. Viti</i>	
Water Proton Relaxation Effects of Paramagnetic Complexes in Solutions and Tissues: $^1\text{H}$ -NMR Spin Echo and EPR Studies	277
<i>P. Marzola, L. Longo, S. Cannistraro, R. Palumbo, G. Caprino and G. Gobbi</i>	
 Imaging and Remote Sensing  	
Image Production Techniques in Biomedicine	285
<i>P.N.T. Wells</i>	

Quantitative Information in Medical Imaging <i>F. Deconinck</i>	295
Nuclear Medicine Imaging in Clinical Practice: Current Applications and Future Trends <i>G. Galli and C.L. Maini</i>	307
Subcutaneous Temperature Imaging by Microwave Radiometry <i>F. Bardati, M. Mongiardo and D. Solimini</i>	321
A System for Biomedical Image Acquisition and Processing <i>L. Azzarelli, M. Chimenti, O. Salvetti, P. Ammannati and M. Lazzeri</i>	325
A Contribution to the Automatic Diagnosis of Laryngeal Pathologies <i>G. Banci, S. Monini, A. Falaschi and N. De Sario</i>	329
Lasers and Electromagnetic Images for Environmental Monitoring <i>D.T. Wruble</i>	333
Remote Sensing Data Processing Techniques <i>V. Cappellini</i>	343
Space Remote Sensing of the Earth: an Overview of Present Activities and Future Trends <i>M. Ricottilli</i>	347
Remote Sensing of Fission Products Gamma Rays Radioactive Contamination <i>A. Bertocchi, R. Crateri, S. Frullani, M. Gaddini, F. Garibaldi, F. Giuliani, M. Gricia, R. Maselli, G. Monteleone, F. Mazzini, C. Naddeo, B. Salusest, F. Santavenere, O. Tacconi and M. Vischetti</i>	361
A System for Territorial Data Processing <i>L. Azzarelli, M. Chimenti and O. Salvetti</i>	367
Acoustic Remote Sensing of Atmospheric Parameters in the Boundary Layer <i>G. Mastrantonio</i>	371

LIDAR Remote Sensing of Vegetation	375
<i>G. Cecchi, L. Pantani and I. Pippi</i>	

## Ionizing and Non-Ionizing Radiation Dosimetry

ESR Dosimetry Activity at ISS	381
<i>A. Bartolotta, B. Caccia, P.L. Indovina, S. Onori and A. Rosati</i>	

New Trends in Radiation Protection Dosimetry	385
<i>M. Pelliccioni</i>	

Recent Advances in the Dosimetry of Radiofrequency and Microwave Radiation	393
<i>O. P. Gandhi</i>	

Evaluation of Dose Distribution in Radiotherapy with Magnetic Resonance Imaging	403
<i>G. Scielzo, L. Landoni and E. Parietti</i>	

Dosimetry of Large Fields for Linear Accelerators	407
<i>M. Benassi, L. Bianciardi, V. Panichelli, F.P. Gentile, A.M. Di Nallo, P. Tonna and A. Guerra</i>	

Computed and Measured Doses in 10 MV Linear Accelerator Dosimetry	411
<i>M. Benassi, L. Bianciardi, L. D'Angelo, A.M. Di Nallo, F.P. Gentile, V. Panichelli and P. Tonna</i>	

Dosimetry of Radiation Fields Smaller than $3 \times 3 \text{ cm}^2$ for 10 MV X-Rays	417
<i>L. Bianciardi, M. Benassi, L. D'Angelo, A.M. Di Nallo, F. P. Gentile, V. Panichelli and G. A. Lovisolo</i>	

## Models

Spin Glass Models for Neural Networks	423
<i>D.J. Amit</i>	

Modeling and Identification of Endocrine-Metabolic and Pharmacokinetic Systems. Theoretical and <u>in vivo</u> studies	433
<i>C. Cobelli</i>	

Global and Limited Area Models of Atmospheric Circulation <i>A. Speranza</i>	443
The Role and Perspectives of Atmospheric Diffusion Models in Environmental Impact Evaluations <i>P. Cagnetti</i>	449
Pulsatile Model of the Cardiovascular System with Neural Reflexes <i>M. Guerrisi, A. Magrini, C. Franconi, J.J. Settels, B. de Wit and K.H. Wesseling</i>	459
Incorporation of Trace Elements into Hair Structure <i>N. Limić and V. Valković</i>	463
A Model for Radiological Risk Assessment from Transportation of Radioactive Material <i>S. Mancioffi and S. Piermattei</i>	469
A Non Linear Model for the Human Smooth Pursuit System <i>M. Scotto</i>	473
Low Dose Extrapolation and Computer Simulation in Risk Assessment Procedures for Carcinogenic Compounds <i>C. Lupi, G.A. Zapponi and A.R. Bucchi</i>	477
Models in Radiological Protection: Necessity, Potentiality, Limitations <i>L. Frittelli</i>	481
Dynamical Aspects of the Tumor-Specific Immune Response <i>J. Hiernaux</i>	487
Statistical Mechanics of the Lotka-Volterra Model <i>F. de Pasquale and A. Mecozzi</i>	493
Kinetic Theory of Neural Systems: Long Distance Effects <i>F. Ventriglia</i>	503

Quantitative Studies on Splanchnic Circulation by Means of Non-Invasive Fluorimetric Evaluations	513
<i>A. Magrini, G. Izzo, E. Abruzzese and M. Banci</i>	
Measurement of Charge Distribution on Aerosol Particles	517
<i>V. Prodi, G. Maltoni Giacomelli, P. Lucialli and F. Monari</i>	
Collective Effects in Polypeptides	521
<i>U. Buontempo and G. Careri</i>	
Superconductivity in Biological Systems: Proposals and Perspectives	529
<i>G. Giaquinta, S. Onori, C. Di Mauro and S. Cannistraro</i>	
Abnormal Growth of the EPR Signal Amplitude in Human Ceruloplasmin Solutions and Fluctuational Onset of Superconductivity	541
<i>G. Giaquinta, S. Onori, C. Di Mauro, S. Cannistraro and G. Falci</i>	
Membrane Physics	
The Role of Physical Science in Biomembrane Studies	549
<i>F.S. Gaeta</i>	
Effects of Ionizing Radiations on the System Water-Membrane	559
<i>G. Erriu</i>	
Effects of Gamma-Irradiation on Human Erythrocyte Membranes Studied by Conductivity Measurements	567
<i>C. Ballario, A. Bonincontro, C. Cametti, A. Rosi and L. Sportelli</i>	
Effects of Gamma-Rays on Water Structure in Water-Membrane Models: ESR and Calorimetric Studies	573
<i>C.M. Cutrera, F. Ianzini, G. Erriu and P.L. Indovina</i>	
Evaluation of Electrical Parameters of Biological Membranes by Means of Conductometric Techniques	579
<i>A. Di Biasio, A. Bonincontro and C. Cametti</i>	

Ionic Transport through Channels in Lipid Model Membranes <i>A. Menini, F. Gambale, G. Rauch and A. Gorio</i>	585
