

# Contents

## *Regulatory requirements*

1. Some implications of ICRP publication 26. *A.S. McLean and J.C.A. Raison* 1
4. Regulatory control of nuclear power stations in the United Kingdom.  
*W.S. Gronow and G. Lewis* 7
7. Critical review from the regulatory position of the control of occupational exposure in commercial nuclear fuel manufacturing and reprocessing plants in the UK. *L. Clark, B.W. Emmerson and E.A. Wojcikiewicz* 15

## *Design and operating criteria*

10. Labour cost of radiation dose. *A. Cook and L.E. Lockett* 37
13. Achievement of reliability and availability in the design of instrumentation systems for radiological protection. *J.B. Kay* 41
14. Non-instrumental constraints upon the performance of systems for radiological protection. *A. Cook and G.C. Meggitt* 49
15. Problems associated with the placement of fixed area monitors around irradiated fuel storage pools. *D.W. McKean* 59

## *Design features*

19. Shielding concept of KWU boiling water reactors up to the KRB II type.  
*L. Seiffert* 65
21. Design and analysis of a PWR reactor cavity shield system. *J. Celnik* 73
22. Update on recent data evaluation concerning control of Cobalt-58 dissolution during refuelling shutdowns of PWRs using a hydrogen peroxide addition.  
*J.W. Kormuth* 83
27. Possibility of in-service inspection and accessibility into an HTR core cavity.  
*P. Pepin* 89
28. Radiation exposure during maintenance and repair of the helium turbine in a direct cycle HTR. *L. Heck, K. Röllig, H.G. Wahsweiler and H. Haselbacher* 99
29. Radiation damage to the permanent and semi-permanent structures of the commercial demonstration fast reactor. *A.W. Phillips and R.F. Burstall* 111
31. Impact of PFR reprocessing at Dounreay Nuclear Development Establishment.  
*E. Lillyman* 117
33. Radiological protection and shielding at Windscale. *K. Schneider, R. Smith, B. Tagg and F.A. Ward* 127
36. Some shielding and engineering aspects of irradiated thermal oxide fuel transport flasks. *M. Twite and P.C. Miller* 139
