

Contents

POLICY/STRATEGY

1. Opening statement. *Sir Peter Harrop* 1
2. The UK strategy for radioactive waste. *P. T. Matthews* 5
3. Implementation of UK policy and strategy on radioactive waste disposal.
M. E. Ginniff 9
4. The role of private industry in the field of radioactive waste management.
J. C. Bennett 17
5. Public perceptions on nuclear waste. *D. Fishlock* 25
- Discussion 29

SAFETY AND ENVIRONMENTAL ISSUES

6. Radiological protection criteria for waste management. *M. D. Hill and G. A. M. Webb* 31
7. Differing perspectives on the safety of nuclear waste. *W. Cannell* 37
8. Methodology for the assessment of facilities for the storage and disposal of low and intermediate level waste. *J. Fitzpatrick, M. H. Walter, R. N. Dumolo and A. Jacobi* 45
9. Studies related to shallow engineered trenches as repositories for radioactive wastes. *J. Locke* 51
10. Radiological assessment of a shallow land disposal. *A. M. Chapuis and P. Guetat* 61
11. Radiological assessments of land disposal of low and intermediate level wastes.
M. J. Clark and M. D. Hill 65
12. The development of post-closure radiological assessment methods by the Department of the Environment. *B. G. J. Thompson, A. G. Duncan and P. Hall* 73
- Discussion 83

STRATEGY IN OTHER COUNTRIES AND ITS IMPLEMENTATION

13. Radioactive waste management in the United States. *J. L. Smiley* 87
14. The concept of the Federal Republic of Germany for the disposal of radioactive waste and its present status. *K. Kühn* 93
15. The long term management policy for low and intermediate level waste in France. *A. Faussat* 99
16. Regulatory aspects of radioactive waste management in Sweden and its implementation. *A. H. Larsson* 103
- Discussion 107

CONDITIONING AND ENCAPSULATION

17. The packaging of intermediate and low level radioactive wastes. *R. H. Flowers* 109
18. Conditioning options for Magnox fuel element debris. *D. Bennett, D. Bradbury, C. J. Kaye and R. Meese* 117

19.	The conditioning of the cladding wastes from the THORP thermal oxide reprocessing plant. <i>L. R. Fellingham, E. Lyall, B. Longstaff and D. C. Ambrose</i>	129
20.	Some practical considerations affecting intermediate level waste encapsulation and storage. <i>A. D. Elsdon and W. Heafield</i>	139
21.	Cement-based processes for the immobilization of intermediate level radioactive waste. <i>D. J. Brown, D. J. Lee, M. S. T. Price and D. L. G. Smith</i>	145
22.	The design, development, construction and commissioning of a waste solidification plant. <i>A. S. D. Willis, C. P. Haigh, W. Martin and J. E. Williams</i>	153
23.	MOWA — the mobile waste conditioning plant. <i>H. Brunner, B. Ganser, J. Hofmann and G. Klein</i>	161
24.	The product evaluation development programme in support of treatment processes for intermediate level wastes arising from reprocessing operations at Sellafield. <i>G. Matthews</i>	165
25.	The control of radioactive wastes and the quality assurance requirements. <i>I. L. Davies and A. A. Paton</i>	171
26.	Actinide accountancy. <i>J. W. Leake</i>	179
	Discussion	185

PACKAGING AND TRANSPORT

27.	The packaging and transport of low and intermediate level radioactive waste. <i>J. R. Grover and M. S. T. Price</i>	189
28.	Automatic operation of radioactive solid waste interim storage system in nuclear power plants. <i>O. Ohashi, K. Aizawa and K. Kenmotsu</i>	197
29.	Development of a road transport flask system for unconditioned intermediate level waste in slurry form. <i>G. Holt, I. Huckle and R. D. Ward</i>	205
30.	An approach to the development of intermediate level waste package designs for transport. <i>J. E. Cripps, J. C. Miles and M. Shears</i>	213
31.	Comparative study on the use of self-shielded packages or returnable shielding for the land disposal of radioactive wastes. <i>J. Fitzpatrick and S. M. Verrall</i>	221
32.	Assessment of the transport logistic and routeing requirements associated with the disposal of intermediate level radioactive waste. <i>J. W. Constable and C. J. Parsons</i>	229
	Discussion	237

FACILITIES/SITES

33.	A review of construction techniques available for surface and underground radioactive waste repositories. <i>D. G. Godfrey, I. L. Davies and R. D. MacKenzie</i>	239
34.	Groundwater modelling in selected UK basins and its importance in repository site selection. <i>J. H. Black, J. Alexander and D. J. Roy</i>	247
35.	The principles of design of a shallow disposal site for low and intermediate level wastes. <i>R. E. Holmes</i>	253
36.	Disposal of low and intermediate level radioactive waste into granitic bedrock in Loviisa, Finland. <i>E. H. Tusa and R. Gardemeister</i>	259

38.	Engineering of radioactive waste repositories in clay formations. <i>L. M. Lake and D. K. Young</i>	265
	Discussion	273
POSTER PAPERS		
P3.	A comparative assessment of potential waste management procedures for reactor wastes. <i>J. Fitzpatrick, A. J. Johnstone and B. Buchheim</i>	277
P4.	The management of spent oxide fuel: the environmental and radiological effects of alternative approaches. <i>A. Martin, T. M. Fry and J. Edmunds</i>	281
P5.	Radioactive waste management strategies for the nuclides tritium, carbon-14, krypton-85 and iodine-129 in the Federal Republic of Germany. <i>P. H. Brücher, E. Merz and A. Matting</i>	283
P6.	Decontamination and volume reduction as an aid to waste management. <i>G. S. Blackaller and C. R. Witt</i>	285
P7.	The inventory of radioactive wastes in the UK. <i>D. George, P. D. Johnston and B. J. Tymons</i>	287
P8.	Use of the SIMULATION 2 program in the analysis of UK waste management systems. <i>J. A. Richardson, D. R. Goodill and B. J. Tymons</i>	289
P9.	The role of soil structure in the assessment of a shallow burial site for radioactive waste. <i>M. Loxham and G. A. M. van Meurs</i>	291
P10.	Assessment of barrier effects on isolation system performance of land disposal of low level waste. <i>Y. Moriya, M. Makino, K. Nakai and S. Sakata</i>	293
P11.	Sensitivity analysis of biospheric behaviour of radionuclides released from nuclear waste repositories. <i>R. Korhonen, I. Savolainen and V. Suolanen</i>	295
P12.	A review of computer programs for the assessment of radioactive waste disposal in geological formations. <i>T. W. Broyd, R. B. Dean and J. M. Putney</i>	297
P14.	Risk assessments of reprocessing plant waste storage and solidification facilities using a steady state method. <i>R. Leicht, B. Puttke and H. J. Wingender</i>	299
P17.	The pretreatment of sludge and floc wastes by evaporation, drying and calcination. <i>L. R. Fellingham, B. Longstaff, A. M. Purcell and D. C. Ambrose</i>	301
P19.	A high force compaction system for low and intermediate level wastes. <i>W. Kohlpoth and K. Wegner</i>	303
P20.	Laser dismantling of gloveboxes. <i>R. Johnson, M. Fender and A. F. Rollin</i>	307
P21.	Studies on high volume reduction and solidification. <i>H. Kuribayashi, N. Kurumada, T. Yagi, K. Suzuki and M. Shibuya</i>	309
P22.	Combined calcination-cementation system for solidification of liquid radioactive wastes. <i>J. Napravník, V. Skaba, P. Dítl, P. Sázavský, L. Nachmilner and P. Prikryl</i>	311
P23.	Immobilization of krypton in a metallic matrix by combined ion implantation and sputtering. <i>D. S. Whitmell</i>	313
P24.	The conditioning of spent HEPA filters. <i>L. R. Fellingham, B. Longstaff and H. A. Harris</i>	315
P25.	The effects of radiation on intermediate level organic matrix waste forms. <i>D. C. Phillips, D. I. Johnson, S. G. Burnay and J. W. Hitchon</i>	317

P26. Leach test characterization of cement-based nuclear waste forms. <i>A. Atkinson, K. Nelson and T. M. Valentine</i>	319
P27. Experiences in the evaluation of fully active waste products. <i>P. E. Brown and E. W. Hooper</i>	321
P28. A discussion of leach test procedures relevant to the evaluation of intermediate level waste forms. <i>J. H. Rees</i>	323
P29. The development of disposal package designs for the CEGB's operational waste streams. <i>B. N. Grainger, A. S. D. Willis and A. Ziai</i>	325
Closing address. <i>N. R. Geary</i>	329

Papers 37, P1, P2, P13, P15, P16 and P18 were not submitted for publication.
