

CONTENTS

DEFINITIONS	1
1. INTRODUCTION	7
Background (101-104)	7
Objectives (105-106)	8
Scope (107-111)	8
Structure (112-119).....	9
2. SAFETY OBJECTIVES (201-204)	10
3. REGULATORY SUPERVISION	11
General (301-307)	11
Licensing process (308-313)	12
4. SITING REQUIREMENTS (401-410)	13
5. GENERAL DESIGN REQUIREMENTS	15
General (501-504)	15
Defence in depth (505-508)	15
Safety analysis for design (509-517)	17
Design limits of parameters (518-519)	18
Safety functions (520)	18
Design for reliability (521-529)	19
Quality assurance requirements (530-532)	20
Codes and standards (533-534)	21
Special considerations for experimental use (535-538)	22
Design for operational states (539-543)	22
Design for accident conditions (544-548)	23
Radiation protection (549-552)	24
Physical protection (553)	25
Commissioning (554)	25
Operational limits and conditions (555)	25
Emergency planning (556)	25
Decommissioning (557)	26

6. SPECIFIC DESIGN REQUIREMENTS	26
General (601)	26
Buildings and structures (602–604)	26
Reactor core design and control (605–613)	27
Reactor coolant system (614–620)	28
Reactor shutdown system (621–625)	29
Protection system (626–634)	29
Emergency core cooling system (635–638)	30
Confinement system (639–645)	31
Instrumentation and control (646–651)	31
Electrical power supply system (652–656)	32
Auxiliary systems (657–661)	33
Experimental devices (662–665)	33
Radioactive waste systems (666–669)	34
 APPENDIX: SELECTED POSTULATED INITIATING EVENTS	 35
 ANNEX: SELECTED SAFETY FUNCTIONS	 37
 CONTRIBUTORS TO DRAFTING AND REVIEW	 39
 PROPOSED SAFETY SERIES PUBLICATIONS ON RESEARCH REACTOR SAFETY	 41
 SELECTION OF IAEA PUBLICATIONS RELATED TO THE SAFETY OF RESEARCH REACTORS	 43
