

CONTENTS

1.	INTRODUCTION.....	1
	Background (101–103)	1
	Objective (104–105)	1
	Scope (106)	1
	Structure (107)	2
2.	TYPES OF IRRADIATORS	2
	Gamma irradiation facilities (201–202)	2
	Electron beam facilities (203)	7
3.	RADIATION SAFETY OBJECTIVES (301–302)	7
4.	SAFETY PHILOSOPHY (401)	9
	Defence in depth (402–405)	9
	Redundancy (406)	11
	Diversity (407–408)	11
	Independence (409)	11
	Programmable electronic systems (410)	12
	Safety analysis (411–416)	12
5.	DESIGN REQUIREMENTS (501)	13
	Design of sealed sources (gamma radiation sources) (502–507)	14
	Internal design (508–510)	15
	Shielding (511–514)	16
	Access to the radiation source, and interlocked systems (515–525)	16
	Control console (526–530)	18
	Radiation room (531–533)	19
	Wet storage irradiators (534–542)	20
	Geological site considerations (543–545)	22
	Fire protection (546–547)	23
	Power failure (548–549)	23
	Ventilation (550–555)	23
	Warning signs and symbols (556–565)	24

6.	REGULATORY CONTROL	26
	Regulatory programme (601–604)	26
	Approval process (605–631)	26
	Regulatory inspection and enforcement (632–642)	32
	Existing facilities (643–644)	35
7.	RESPONSIBILITIES OF THE OPERATING ORGANIZATION	36
	General responsibilities (701)	36
	Appointment of radiation protection advisers (702–706)	36
	Appointment of radiation protection officers (707–710)	38
	Responsibilities of qualified operators (711–717)	39
	Staff training (718–722)	39
	Radiation monitoring (723–728)	40
	Testing and maintenance of equipment (729–737)	41
	Records (738–740)	44
	Facility maintenance and modification (741–746)	44
	Operational instructions (747–749)	45
	Procedural matters (750–753)	46
8.	RESPONSIBILITIES OF DESIGNERS AND MANUFACTURERS, IMPORTERS AND SUPPLIERS, AND CONSTRUCTORS AND INSTALLERS	47
	Designers and manufacturers (801–803)	47
	Importers and suppliers (804)	48
	Constructors and installers (805–807)	48
9.	THE TRANSPORT, LOADING AND UNLOADING OF SOURCES	48
	Transport (901–905)	48
	Loading and unloading of sources (906–910)	49
10.	SPECIAL SAFETY REQUIREMENTS FOR ELECTRON ACCELERATOR FACILITIES	50
	Safety considerations in the design of electron accelerators (1001–1006)	50
	Shielding (1007–1013)	51
	Other requirements (1014–1015)	53

11. EMERGENCY RESPONSE PLANNING (1101–1108) 53

 Incident report (1109) 54

 Special problems with gamma irradiation facilities (1110–1115) 55

 Emergencies involving high accidental exposures (1116) 56
