

Contents

Preface	iii
1. Introduction	1
2. Radioactivity of Tritium	2
3. Sample Collection for Tritium Analysis	3
3.1 Introduction	3
3.2 Collection of Tritium from Air	3
3.3 Collection of Water	8
3.4 Collection of Urine	8
3.5 Collection of Biota and Soil Samples	8
3.6 Sampling for Tritiated Particles	10
4. Sample Preparation	11
4.1 Introduction	11
4.2 Environmental Samples	11
4.3 Organically-Bound Tritium	16
4.4 Labeled Pharmaceuticals	20
4.5 Urine Samples	21
4.6 Enrichment	22
5. Measurement Techniques	26
5.1 Introduction	26
5.2 Measurement of Discrete Samples	31
5.3 Real-Time Measurement	40
5.4 Measurement of Surface Activity	53
5.5 Miscellaneous Methods	56
5.6 Comparison of Measurement Methods	61
6. Standardization and Calibration	62
6.1 Introduction	62
6.2 Calibration	62
6.3 Use of Standards	67
6.4 Blanks	68
6.5 Calibration of Real-Time Instruments	69
6.6 Propagation of Errors	72
6.7 Expected Accuracies	74
References	75
The NCRP	86
NCRP Reports	92
