Report of the United Nations Scientific Committee on the Effects of Atomic Radiation to the General Assembly	1
Scientific Annexes	31
Annex A. Exposures from natural sources of radiation	33
Annex B. Exposures from man-made sources of radiation	91
Annex C. Medical radiation exposures	221
Annex D. Occupational radiation exposures	375
Annex E. Mechanisms of radiation oncogenesis	551
Annex F. Influence of dose and dose rate on stochastic effects of radiation	619
Annex G. Hereditary effects of radiation	729
Annex H. Radiation effects of the developing human brain	805
Annex I. Late deterministic effects in children	869

CONTENTS

	<i>Page</i>
INTRODUCTION	4
I. BIOLOGICAL EFFECTS OF IONIZING RADIATION	5
A. RADIOBIOLOGY	6
1. The target for radiation action	6
2. Effects of induced changes in the cell genetic code	7
B. EPIDEMIOLOGY	10
II. QUANTITATIVE ESTIMATES OF RADIATION EFFECTS	12
A. QUANTITIES AND UNITS	12
1. Dosimetric quantities	12
2. Risk and detriment	13
B. EFFECTS IN MAN	14
1. Deterministic effects	14
2. Radiation-induced cancer	15
3. Hereditary effects	17
III. SOURCES OF RADIATION EXPOSURE	17
A. BASIS FOR COMPARISONS	17
B. LEVELS OF EXPOSURE	18
1. Exposures from natural sources	18
2. Medical exposures	19
3. Exposures from nuclear explosions and from the production of nuclear weapons	20
4. Exposures from nuclear power production	21
5. Exposures of the public from major accidents	22
6. Occupational exposures	23
7. Summary of current information	25
IV. THE PERCEPTION OF RADIATION RISKS	26
V. SUMMARY AND PERSPECTIVES	27
A. LEVELS OF EXPOSURE	27
B. BIOLOGICAL EFFECTS	27
C. PERSPECTIVES	28
 <i>Appendices</i>	
I. Members of national delegations	29
II. Scientific staff and consultants cooperating with the Committee in the preparation of this report	30

ANNEX A

Exposures from natural sources of radiation

CONTENTS

	<i>Page</i>
INTRODUCTION	34
I. COSMIC RADIATION	35
A. COSMIC RAYS	35
1. The radiation environment	35
2. Factors affecting dose	36
3. Exposures	37
B. COSMOGENIC RADIONUCLIDES	39
C. SUMMARY	39
II. TERRESTRIAL RADIATION	39
A. EXTERNAL EXPOSURE	39
1. Outdoors	39
2. Indoors	40
3. Dose	42
B. INTERNAL EXPOSURE	43
C. SUMMARY	44
III. RADON	45
A. SOURCES AND MOVEMENT	45
1. Production in terrestrial materials	45
2. Diffusion	46
3. Advection	47
4. Infiltration	48
5. Transfer from water and natural gas	48
6. Entry rates	49
B. EXPOSURE	50
1. Indoor concentrations	50
2. Dose	52
C. SUMMARY	54
IV. EXTRACTIVE INDUSTRIES	54
A. ENERGY PRODUCTION FROM COAL	55
1. Coal mining	55
2. Use of coal	55
3. Use of fuel ash	56

	<i>Page</i>
B. OTHER ENERGY PRODUCTION	57
1. Oil	57
2. Peat	57
3. Natural gas	57
4. Geothermal energy	58
C. USE OF PHOSPHATE ROCK	58
1. Phosphate processing operations	58
2. Use of phosphate fertilizers	59
3. Use of by-products	59
D. MINING AND MILLING OF MINERAL SANDS	60
E. SUMMARY	60
CONCLUSIONS	61
 Tables	62
Figures	75
References	79

ANNEX B

Exposures from man-made sources of radiation

CONTENTS

	<i>Page</i>
INTRODUCTION	92
I. ATMOSPHERIC NUCLEAR TESTING	93
A. ENVIRONMENTAL INPUT	93
B. DEPOSITS ON THE EARTH'S SURFACE	94
C. TRANSFER FROM DEPOSITION TO DOSE	96
D. DOSE ESTIMATES	98
1. Regional and global exposure	98
2. Local exposure	100
II. UNDERGROUND NUCLEAR TESTS	100
A. WEAPONS TESTS	100
B. PEACEFUL NUCLEAR EXPLOSIONS	101
III. NUCLEAR WEAPONS FABRICATION	102
A. PRODUCTION AMOUNTS	102
B. RELEASES AND DOSE ESTIMATES	103
IV. NUCLEAR POWER PRODUCTION	105
A. MINING AND MILLING	105
1. Effluents	105
2. Dose estimates	106
B. URANIUM FUEL FABRICATION	107
1. Effluents	107
2. Dose estimates	107
C. REACTOR OPERATION	107
1. Effluents	107
2. Local and regional dose estimates	109
D. FUEL REPROCESSING	109
1. Effluents	110
2. Local and regional dose estimates	110
E. GLOBALLY DISPERSED RADIONUCLIDES	111
F. SOLID WASTE DISPOSAL AND TRANSPORT	111
G. SUMMARY OF DOSE ESTIMATES	112

	<i>Page</i>
V. RADIOISOTOPE PRODUCTION AND USE	112
A. PRODUCTION AMOUNTS AND RELEASES	112
B. DOSE ESTIMATES	113
VI. ACCIDENTS	114
A. CIVILIAN NUCLEAR REACTORS	114
1. Three Mile Island	114
2. Chernobyl	114
B. MILITARY INSTALLATIONS	115
1. Kyshtym	115
2. Windscale	116
C. TRANSPORT OF NUCLEAR WEAPONS	117
D. SATELLITE RE-ENTRY	118
E. INDUSTRIAL AND MEDICAL SOURCES	119
CONCLUSIONS	119
 Tables	121
Figures	204

ANNEX C

Medical radiation exposures

CONTENTS

	<i>Page</i>
INTRODUCTION	222
I. ANALYSIS OF MEDICAL EXPOSURES	223
A. MEDICAL RADIATION USAGE	223
B. DOSE EVALUATION	225
C. BENEFITS AND RISKS	226
D. SUMMARY	227
II. DIAGNOSTIC X RAY EXAMINATIONS	228
A. FREQUENCIES OF EXAMINATIONS	228
B. AGE- AND SEX-DISTRIBUTIONS	230
C. DOSES IN EXAMINATIONS	231
1. Fluoroscopy	232
2. Computed tomography	234
3. Chest examinations	235
4. Mammography	236
5. Chiropractic examinations	236
6. Neonatal and child examinations	237
D. DENTAL X-RAY EXAMINATIONS	238
E. WORLDWIDE EXPOSURES	240
F. TRENDS	241
1. Specific x-ray examinations and techniques	243
2. Alternatives to x-ray examination	244
3. Particular patient groups	246
4. Effects of quality assurance programmes	247
G. SUMMARY	249
III. DIAGNOSTIC USE OF RADIOPHARMACEUTICALS	250
A. FREQUENCIES OF EXAMINATIONS	250
B. DOSES IN EXAMINATIONS	252
C. WORLDWIDE EXPOSURES	253
D. TRENDS	254
1. Specific methods in nuclear medicine	254

	<i>Page</i>
2. Alternatives to nuclear medicine	256
3. Effects of quality assurance programmes	256
E. SUMMARY	256
IV. THERAPEUTIC USE OF RADIATION	257
A. FREQUENCIES OF TREATMENTS	257
B. DOSES IN TREATMENTS	258
C. WORLDWIDE EXPOSURES	259
D. TRENDS	260
E. SUMMARY	261
V. THERAPEUTIC USE OF RADIOPHARMACEUTICALS	262
A. FREQUENCIES OF TREATMENTS	262
B. DOSES IN TREATMENTS	262
C. WORLDWIDE EXPOSURES	262
D. TRENDS	263
E. SUMMARY	263
VI. EXPOSURES OF THE GENERAL PUBLIC	263
A. DIAGNOSTIC X-RAY EXAMINATIONS	263
B. RADIOPHARMACEUTICALS	263
C. RADIATION THERAPY	264
D. VOLUNTEERS IN MEDICAL RESEARCH	265
E. SUMMARY	265
VII. EXPOSURES FROM ACCIDENTS IN MEDICAL RADIATION USAGE	266
CONCLUSIONS	266

ANNEX D

Occupational radiation exposures

CONTENTS

	<i>Page</i>
INTRODUCTION	377
I. ANALYSIS OF OCCUPATIONAL DOSE DISTRIBUTIONS	378
A. DOSE MONITORING DATA	378
1. Quantities measured	378
2. Monitoring practice	380
3. Recording and reporting practice	381
B. CHARACTERISTICS OF DOSE DISTRIBUTIONS	382
C. ESTIMATION OF WORLDWIDE EXPOSURES	385
D. CUMULATIVE DOSE DISTRIBUTIONS	387
II. THE NUCLEAR FUEL CYCLE	387
A. URANIUM MINING AND MILLING	388
B. URANIUM ENRICHMENT AND CONVERSION	391
C. FUEL FABRICATION	392
D. REACTOR OPERATION	396
1. Light-water reactors	397
2. Heavy-water reactors	400
3. Gas-cooled reactors	401
4. Light-water-cooled, graphite-moderated reactors	402
5. Fast breeder reactors	402
6. Summary	403
E. FUEL REPROCESSING	403
1. Average annual doses	403
2. Doses for specific tasks and occupational subgroups	405
F. RESEARCH AND DEVELOPMENT	406
G. CUMULATIVE DOSES	408
H. SUMMARY	412
III. DEFENCE ACTIVITIES	413
A. NUCLEAR WEAPONS	414
1. Annual doses	414
2. Cumulative doses	415

	<i>Page</i>
B. NUCLEAR-POWERED SHIPS AND THEIR SUPPORT FACILITIES	415
1. Annual doses	415
2. Cumulative doses	416
C. ALL DEFENCE ACTIVITIES	416
1. Annual doses	416
2. Worldwide annual doses	417
3. Cumulative doses	418
 IV. INDUSTRIAL USES OF RADIATION	418
A. INDUSTRIAL RADIOGRAPHY	419
B. LUMINIZING	420
C. RADIOISOTOPE PRODUCTION AND DISTRIBUTION	421
D. WELL LOGGING	421
E. EDUCATION AND RESEARCH	422
F. ACCELERATORS	423
G. OTHER INDUSTRIAL USES	424
H. ALL INDUSTRIAL USES OF RADIATION	424
I. CUMULATIVE DOSES	425
J. SUMMARY	425
 V. MEDICAL USES OF RADIATION	426
A. DIAGNOSTIC RADIOGRAPHY	427
B. DENTAL PRACTICE	428
C. NUCLEAR MEDICINE	429
D. RADIOTHERAPY	429
E. ALL MEDICAL USES OF RADIATION	430
F. VETERINARY PRACTICE	432
F. SUMMARY	432
 VI. NATURAL SOURCES OF RADIATION	434
A. EXTRACTIVE INDUSTRIES	434
1. Underground mining	434
2. Surface mining	436
3. Transport, storage and use of phosphates	436
B. AVIATION	436
1. Air travel	436
2. Space travel	437
C. OTHER OCCUPATIONS AND PRACTICES	437
D. SUMMARY	438
 VII. ACCIDENTS	438
CONCLUSIONS	439
 Tables	444

ANNEX E

Mechanisms of radiation oncogenesis

CONTENTS

	<i>Page</i>
INTRODUCTION	552
I. STRUCTURE AND FUNCTION OF MAMMALIAN CELLS	553
A. CELLS AND TISSUES	553
B. CHROMOSOMES	553
II. PRINCIPAL THEORIES OF ONCOGENESIS	554
A. INDUCTIVE AND DEVELOPMENTAL PROCESSES	555
1. DNA as a principal target for radiation action	555
2. The single-cell origin of neoplasia	555
3. Genetic changes in oncogenesis	556
4. Multistage cellular development in oncogenesis	563
5. Viral involvement	570
B. HUMAN SUSCEPTIBILITY TO RADIATION ONCOGENESIS	571
1. Homozygous deficiencies in DNA repair, cell inactivation and chromosome breakage	571
2. Heterozygous carriers of genetic traits	573
3. Systemic factors	574
4. Immunodeficiency and cell surveillance mechanisms	576
III. EXPERIMENTAL INVESTIGATIONS OF CELLULAR AND MOLECULAR MECHANISMS OF RADIATION ONCOGENESIS	577
A. EPIDEMIOLOGICAL STUDIES	578
B. MOLECULAR STUDIES OF MUTAGENESIS AND REPAIR: POSSIBLE IMPLICATIONS FOR NEOPLASTIC INITIATION	578
C. <i>IN VITRO</i> STUDIES WITH CELLULAR SYSTEMS	580
1. Conventional systems	580
2. Novel systems	581
D. <i>IN VIVO</i> STUDIES	582
1. General experimental strategies	582
2. Molecular studies of induced animal neoplasms	583

	<i>Page</i>
IV. COMPARATIVE ASPECTS OF ONCOGENESIS BY RADIATION AND CHEMICALS	585
V. FUTURE PERSPECTIVES	588
A. IMPLICATIONS OF ADVANCES IN RELATED RESEARCH	588
B. METHODOLOGICAL AND CONCEPTUAL ASPECTS	589
CONCLUSIONS	593
 Tables	595
Figures	600
References	603

ANNEX F

Influence of dose and dose rate on stochastic effects of radiation

CONTENTS

	<i>Page</i>
INTRODUCTION	620
I. DOSE RESPONSE FROM RADIATION EXPOSURE	624
A. THEORETICAL CONSIDERATIONS	624
1. Single-hit target theory	625
2. Multi-track effects	626
3. Low doses and low dose rates: microdosimetric considerations	627
4. Radiation quality and relative biological effectiveness	629
5. Deviations from conventional expectations	630
B. MULTI-STAGE MODELS OF CARCINOGENESIS	630
1. Multi-stage models	630
2. Thresholds in the dose-effect relationships	632
C. MECHANISMS OF DOSE-RATE EFFECTS IN MAMMALIAN CELLS	633
1. Repair of DNA damage	634
2. Effect of dose rate	635
D. SUMMARY	636
II. DOSE-RESPONSE RELATIONSHIPS IN EXPERIMENTAL SYSTEMS	637
A. TUMORIGENESIS IN EXPERIMENTAL ANIMALS	639
1. Radiation-induced life shortening	639
2. Tumour induction	647
B. <i>IN VITRO</i> CELL TRANSFORMATION	662
1. Dose-response relationships	664
2. Dose rate and fractionation	665
3. High-LET radiation	667
4. Summary	671
C. MUTAGENESIS	671
1. Somatic mutations	672
2. Germ cell mutations	673
3. Summary	675

	<i>Page</i>
III. DOSE AND DOSE-RATE EFFECTS IN HUMAN CANCER	676
A. LEUKAEMIA AND ALL OTHER CANCERS	676
1. Survivors of the atomic bombings in Japan	676
2. Workers in the nuclear industry	677
B. THYROID CANCER	678
C. BREAST CANCER	679
D. SUMMARY	679
IV. DESIGNATION OF LOW DOSES AND LOW DOSE RATES	680
A. PHYSICAL FACTORS	680
B. BIOLOGICAL FACTORS	681
C. SUMMARY	682
CONCLUSIONS	682
Tables	688
Figures	697
References	715

ANNEX G

Hereditary effects of radiation

CONTENTS

	<i>Page</i>
INTRODUCTION	730
I. GENETIC DISEASES IN HUMANS	731
A. SINGLE-GENE DISORDERS	731
1. Dominant traits	732
2. Recessive traits	732
3. X-linked traits	733
B. CHROMOSOMAL ABERRATIONS	733
C. MULTIFACTORIAL AND POLYGENIC INHERITANCE	733
1. Determining factors	733
2. Risk of recurrence within families	734
D. NON-TRADITIONAL INHERITANCE	735
1. Mosaicism	735
2. Genomic imprinting	737
3. Uniparental disomy	738
4. Cytoplasmic inheritance	739
5. Anticipation and allelic expansion	739
6. Gene amplification	740
7. Transposable elements	740
E. SUMMARY	741
II. MONITORING THE BACKGROUND INCIDENCE OF GENETIC DISEASE	741
A. REGISTRIES OF CONGENITAL ANOMALIES	741
1. Types and incidence of congenital anomalies	741
2. Scope of monitoring	743
B. CONSIDERATIONS ON BACKGROUND INCIDENCE	744
1. Sentinel Mendelian diseases	744
2. Autosomal recessive diseases	745
3. Chromosomal diseases	746
4. Congenital anomalies and multifactorial diseases	746
C. MOLECULAR AND BIOCHEMICAL STUDIES OF SPONTANEOUS AND RADIATION-INDUCED MUTATIONS ..	748
1. Location and effects of mutations	748

	<i>Page</i>
2. Protein studies	751
D. SUMMARY	752
III. GENETIC RISK ESTIMATION	753
A. HUMAN STUDIES	754
1. Genetic follow-up studies on the survivors of the atomic bombings	754
2. Epidemiological study of leukaemia cases at Sellafield	757
3. Epidemiological studies on other human populations	759
B. METHODS OF RISK ESTIMATION: ANIMAL STUDIES	760
1. The doubling dose (indirect) method	761
2. The direct method	762
C. EXPERIMENTAL STUDIES	767
1. New experimental data relevant to risk estimation	767
2. Studies of mutations in mouse oocytes	768
3. Induction of translocations in primates	769
4. Induction of dominant mutations causing congenital malformations	769
5. Results of the direct method to estimate risk	770
6. Mouse versus human genes	771
D. GENETIC RISK ESTIMATES	772
1. Estimates of UNSCEAR	772
2. Estimates of BEIR, ICRP AND NUREG	773
3. Re-evaluation of doubling dose estimates in mice and humans	774
4. Molecular biological developments	775
E. SUMMARY	776
IV. FUTURE PERSPECTIVES	777
A. MOLECULAR INVESTIGATIONS	777
B. THE HUMAN GENOME PROJECT	778
CONCLUSIONS	779
Tables	782
Glossary	786

ANNEX H

Radiation effects on the developing human brain

CONTENTS

	<i>Page</i>
INTRODUCTION	806
I. THE HUMAN BRAIN	806
A. DEVELOPMENT	806
B. DEVELOPMENTAL DEFECTS	810
1. Cerebral and cerebellar abnormalities	811
2. Abnormalities of the brain adnexa	811
II. RADIATION EFFECTS	812
A. PRENATAL EXPOSURE TO ATOMIC BOMBINGS	814
1. Severe mental retardation	816
2. Small head size	816
3. Intelligence test scores	818
4. School performance	819
5. Seizures	820
6. Pathologic and other findings of brain abnormalities	821
B. OTHER HUMAN STUDIES	825
1. Prenatal exposure	825
2. Exposure of the infantile and juvenile brain	827
C. EXPERIMENTAL STUDIES	828
III. RISK ESTIMATES	830
A. RISK FROM ACUTE EXPOSURE	831
1. Mental retardation	831
2. Small head size	831
3. Diminution in intelligence and academic performance	832
4. Seizures	833
B. RISK FROM FRACTIONATED OR CHRONIC EXPOSURE TO NEUROTOXINS	833
1. Ionizing radiation	833
2. Neurotoxic chemicals	834
C. UNCERTAINTIES	836
IV. FUTURE PERSPECTIVES	839
CONCLUSIONS	840

Tables	842
Figures	852
Glossary	855
