1. Japan: the islands and its people 1

- Introduction 1
- Geography and climate 1
- Population 3
- Society 3
- The eight main regions 5

2. Science and technology in Japan 10

- Introduction 10
- Measuring Japan's strength in science and technology 19
- Postwar development of science and technology 24
- The future 29
- The ministries and their budgets 32

3. Science and government 35

- The government of Japan 35
- The highest level of science and technology policy decision making 42

4. Government science policies, the ministries and major science programmes 50

- Introduction 50
- Council for Science and Technology (CST) 51
- Science and Technology Agency (STA) 56
- Policies of the Science and Technology Agency 59
- Ministry of International Trade and Industry (MITI) 61

Policies of the Ministry of International Trade and Industry	63
Ministry of Education, Science and Culture (MESC)	66
Ministry of Health and Welfare	67
Ministry of Agriculture, Forestry and Fisheries	67
Ministry of Transport	68
Ministry of Posts and Telecommunications	69
Ministry of Construction	69
Ministry of Home Affairs	69
Ministry of Labour	70
National Police Agency	70
Research Development Corporation	71

5. Education, the universities and academic research 72

The education system	72
The universities	75
University science and the Ministry of Education, Science and Culture	80
National, public and private universities	82
Research in other universities	87
University of Tsukuba	88
National Research Institutes for Joint Use by Universities	89
Research in academic institutes	101

6. Industrial research and development 104

Introduction	104
Industrial research and development expenditure	104
Government and industry	106
Universities and industry	107
Structure of Japanese industry	108
Central research laboratories and research corporations	110
Research and development in some industrial companies	110

7. Agricultural science and technology 117

Introduction	117
Agricultural policy	119

Forestry	119
Research and development in agriculture	120
Agricultural research in government institutes	120

8. Medicine, life sciences and biotechnology 132

Medicine: introduction	132
Medical research in the universities	133
Medical research in government institutes	135
Medical electronics	140
Biotechnology and the life sciences: introduction	143
Research and development expenditure	144
Science and Technology Agency biotechnology programmes	145
MITI's 'next generation industrial technology' biotechnology project	149
MITI biomass project	149
Ministry of Agriculture, Forestry and Fisheries projects	150
Life science and biotechnology research institutes	151

9. Energy 159

Introduction	159
Nuclear energy	160
Nuclear energy research and development	164
Government nuclear energy research institutes	171
Energy research institutes at universities Nuclear	175
Non-nuclear energy programmes: Sunshine project	179
Non-nuclear energy programmes: New Energy Development Organization (NEDO)	181
Non-nuclear energy programmes: Moonlight project	187
Other power generation research and development projects	190
Research and development in the oil industry	191

10. Aerospace, aviation and railways 194

Aerospace	194
Aviation	217
Railways	221

11. Electronics 226

- Introduction 226
- Japan's electronics industry 227
- Large-scale government-subsidized electronics research projects 234
- Research in electronics 241
- Industrial robots and robotics 262

12. Industrial research and development 265

- Agency of Industrial Science and Technology 265
- Research programmes of the Agency of Industrial Science and Technology 265
- Basic technologies for next generation industries 272
- Government industrial research institutes 276
- Industrial and technical research institutes at universities 305

13. Earthquake and disaster prevention, environmental protection and earth sciences 310

- Earthquakes and disaster prevention 310
- Protection of the environment 316
- Earth sciences 323

14. Marine science and technology 332

- Introduction 332
- Major areas of development 336
- Japan Marine Science and Technology Centre 339
- Ocean Research Institute, University of Tokyo 340
- Development of biological resources 342
- Ship Research Institute 346
- Port and Harbour Research Institute 349

15. Defence 351

- Introduction 351
- Self-defence forces and defence policy 353
- Military research and development in government 356
- Military research and development in industry 358

16. Learned and professional societies and associations 360

- Academic and technical Societies 360
- Japan Academy 361
- Japan Society for the Promotion of Science 361

17. Tsukuba Science City 365

- Tsukuba 'Expo 85' 370

18. Scientific and technical information sources 371

- Introduction 371
- National Diet Library 372
- Academic libraries 372
- Japan Information Centre of Science and Technology 373
- Science Information Processing Centre, University of Tsukuba 375
- Nomura Research Institute of Technology and Economics 375
- National Science Museum 376

19. International scientific and technological cooperation 377

- Introduction 377
- Principal international agreements 377
- Future of cooperation in science and technology 379
- Institute for Transfer of Industrial Technology 383
- Japan International Cooperation Agency 385
- Special projects 391

Appendix: Directory of major research establishments 392

- National universities 392
- Prefectural and municipal universities 395
- Private universities 395
- National research institutes for joint use by universities 397
- University research institutes 397
- Government research institutes 401
- Private companies and corporations 406

Electronics companies	408
Independent research institutes	411

Index of establishments	415
--------------------------------	------------

Subject index	419
----------------------	------------
