1 The Setting	I
Objectives and Definitions	I
The Pre-Revolutionary Legacy	4
Influence of the Outside World	9
2 Organization of Science	19
Main Trends of Organization	19
Number and Distribution of Scientists	31
Qualifications and Quality	39
Conclusion	44
3 Planning of Science	46
General Considerations	46
The Soviet Situation	50
Scientific Planning and Socialist Economy	57
4 Trends in Expenditure on Science and Technology	62
5 Technological Policy	87
Accentuated Spheres and Aspects	90
Technology and Economic Structure	114
Technology and Ideology	116
Scientific and Economic Objectives of Technical Progress	119
6 Technical Innovation	122
The Role of Enterprises	122
The Role of Superior Instances	133
Other Influences of the Hierarchical System	137
7 Design as an Institution	140
Historical Background	140
Reasons for Neglect of Design	144
Structure of VNIITE	151

viii | CONTENTS

VNIITE and the Design Hierarchy	155
Growth of VNIITE	161
The Planning of Design	165
The Financing of VNIITE	169
8 Characteristic Features of Design	172
Variety and Interchangeability	172
Quality and Quantity	177
Materials and Substitutes	181
Styles, Shapes, and Colours	190
Arrangement and Movement: Horizontalism and Verticalism	197
Largeness, Grandeur, Grandiosity	208
9 Design and the Conceptual Environment	217
Ideological Symbolism	217
Origins of the Design Revolution	229
Limits on Design Functions	233
Strengths and Weaknesses	237
10 Interaction and Convergence: an Overview	241
Appendices	
I Number of Scientists	255
II Number of Scientific Establishments	257
III Average Number of Scientists per Scientific Establishment	259
IV Percentage Distribution of Scientists	260
V Number of Scientific Establishments per Academy of Sciences	261
VI Distribution of Scientists by Branch of Science	
Part 1: Numbers	262
Part 2: Percentages	264
VII Degrees and Academic Titles of Scientific Personnel: Percentages	266
VIII Innovation and Rationalization	267
<i>Notes</i>	269
<i>Select Bibliography</i>	301
<i>Index</i>	311
