

**4th International Symposium on Jet Cutting Technology**  
**April 12th - 14th, 1978, University of Kent at Canterbury, U.K.**

**CONTENTS**

|  | <b>Page</b> |
|--|-------------|
| List of Contents of Volume 1   | vi          |
| Additional papers not published in Volume 1:   |             |
| A4 The effect of nozzle geometry on the turbulent structure of water jets -<br>a photographic study.<br>P.F.Thorne and C.R.Theobald, Building Research Establishment, Fire<br>Research Station, U.K. | A4-55       |
| B3 Study on the generating method of discrete high speed liquid jet using gas<br>acceleration.<br>T.Kinoshita, Railway Technical Research Institute, Japan   | B3-19       |
| C6 Development of water jet drifter.<br>T.Nagano, K.Takagi, Y.Narita and M.Sato, Railway Technical Research<br>Institute, Japan.   | C6-67       |
| E5 Experimental study of the impact of broken water jets.<br>R.A.Metcalf and T.W.Davies, University of Exeter, U.K.  | E5-53       |
| F3 Analysis of the mechanism of interaction between high-pressure water jet<br>and the material being cut.<br>M.Mazurkiewicz, Z.Sebastian and G.Galecki, Wroclaw Technical<br>University, Poland.    | F3-31       |
| H8 Laboratory investigation of jet descaling of process equipment in a bauxite<br>processing (extraction) plant.<br>M.P.du Plessis and A.E.Blach, Concordia University, Canada.                      | H8-95       |
| Discussion and contributions on Session A  | Z1          |
| Discussion and contributions on Session B  | Z9          |
| Discussion and contributions on Session C  | Z14         |
| Discussion and contributions on Session D  | Z27         |
| Discussion and contributions on Session E  | Z35         |
| Discussion and contributions on Session F  | Z42         |
| Discussion and contributions on Session G  | Z54         |
| Discussion and contributions on Session H  | Z56         |
| Discussion and contributions on Session J  | Z69         |
| List of Exhibitors   | Z80         |
| Advertisements   | Z81         |
| Subject Index  | Z83         |
| Name Index   | Z87         |
| List of Delegates  | Z89         |

## CONTENTS OF VOLUME 1

| <b>Paper</b> | <b>Page</b>   |       |
|--------------|---|-------|
| A1           | Water jet nozzle performance tests.<br>C.R.Barker and B.P.Selberg, University of Missouri-Rolla, U.S.A.   | A1-1  |
| A2           | A study of the effect of nozzle configuration on the performance of submerged water jets.<br>F.Erdmann-Jesnitzer, H.Louis and A.M.Hassan, Technical University of Hanover, Federal Republic of Germany.   | A2-21 |
| A3           | Flow characteristics of water jets in air.<br>K.Yanaida, Osaka Prefectural Technical College, Japan, and A.Ohashi, Konoike Construction Co. Ltd., Japan.  | A3-39 |
| B1           | A numerical study of nozzle design for pulsed water jets.<br>D.G.E.Edwards and D.J.Welsh, University of Surrey, U.K.  | B1-1  |
| B2           | Erosion by an interrupted jet.<br>A.Lichtarowicz and G.O.Nwachukwu, University of Nottingham, U.K.  | B2-13 |
| C1           | Application of water-jet assisted pick cutter for rock fragmentation.<br>F.-D.Wang and J.Wolgammott, Colorado School of Mines, U.S.A.   | C1-1  |
| C2           | Water jet breaking of imitation hot dry rock.<br>H.Kiyohashi, M.Kyo and W.Ishihama, Tohoku University, Japan.   | C2-7  |
| C3           | Waterjet drilling of small diameter holes.<br>S.D.Veenhuizen and J.B.Cheung, Flow Industries Inc., U.S.A., and J.R.M.Hill, Bureau of Mines, U.S.A.  | C3-29 |
| C4           | The development of a water jet drilling system and preliminary evaluations of its performance in a stress situation underground.<br>D.A.Summers and T.F.Lehnhoff, University of Missouri-Rolla, U.S.A., and L.A.Weakly, St. Joe Mineral Corporation, U.S.A. | C4-41 |
| C5           | Cutting rocks and other materials by cavitating and non-cavitating jets.<br>M.M.Vijay and W.H.Brierley, National Research Council Canada.   | C5-51 |
| D1           | Design and test of an inlet-nozzle device.<br>P.D.Lohn and D.A.Brent, TRW Systems and Energy, U.S.A.  | D1-1  |
| D2           | Design and dynamic response of a pulse-jet pavement breaker.<br>U.H.Mohaupt and D.J.Burns, University of Waterloo, Canada, G.G.Yie, Institute of Gas Technology, U.S.A. and W.Mellors, Cosmoton Ltd., Canada.   | D2-17 |
| D3           | Jet cutting of metals with Pyronol torch.<br>A.G.Rozner and H.H.Helms, Jr., Naval Surface Weapons Center, U.S.A.  | D3-29 |
| E1           | Erosion resistance of rock.<br>G.Rehbinder, Atlas Copco MCT AB, Sweden.   | E1-1  |
| E2           | Waterjet cutting of deep-kerfs.<br>J.M.Reichman and J.B.Cheung, Flow Industries Inc., U.S.A.  | E2-11 |

| <b>Paper</b> |   | <b>Page</b> |
|--------------|---|-------------|
| E3           | Material behaviour, material stressing, principle aspects in the application of high speed water jets.<br>F. Erdmann-Jesnitzer, H. Louis and J. Wiedemeier, Technical University of Hanover, Federal Republic of Germany. | E3-29       |
| E4           | Jet induced target material temperature increases during jet cutting.<br>K. F. Neusen and S. W. Schramm, University of Wisconsin - Milwaukee, U. S. A.  | E4-45       |
| F1           | The application of a generalised jet cutting equation.<br>M. Hashish and M. P. duPlessis, Concordia University, Canada.   | F1-1        |
| F2           | On the equivalence between stationary and nonstationary modes of operation of water jets.<br>T. R. Sundaram and H. -L. Liu, Hydronautics Inc. , U. S. A.  | F2-17       |
| G1           | Highway maintenance application of jet cutting technology.<br>T. J. Labus, SCIRE Corporation, U. S. A. , and J. A. Hilaris, IIT Research Institute, U. S. A.  | G1-1        |
| G2           | Cutting and drilling of composites using high pressure water jets.<br>T. J. Labus, SCIRE Corporation, U. S. A.  | G2-9        |
| H1           | Surface cleaning using water-jet cavitation and droplet erosion.<br>G. W. Vickers and R. Houlston, University of British Columbia, Canada.  | H1-1        |
| H2           | Conservation and extraction of energy with the Cavijet <sup>TM</sup><br>A. F. Conn and S. L. Rudy, Hydronautics Inc. , U. S. A.   | H2-19       |
| H3           | Water jetting under the North Sea.<br>D. J. H. Odds, F. A. Hughes and Co. Ltd. , U. K.  | H3-39       |
| H4           | Jet cutting for contouring applications on flexible materials.<br>R. W. T. Skelham and P. Shaw, Shoe and Allied Trades Research Association, U. K.  | H4-47       |
| H5           | 750 kW water jet pump for pile driving.<br>K. Hoshino, M. Hagihara, S. Shikata and Y. Yamatani, Hoshino Research Inc. , Japan.  | H5-61       |
| H6           | Performance of a high-pressure pulsed water-jet device for fracturing concrete pavement.<br>G. G. Yie, Institute of Gas Technology, U. S. A. , D. J. Burns and U. H. Mohaupt, University of Waterloo, Canada.             | H6-65       |
| H7           | An approach to remote controlled jet cleaning of chemical reaction vessels to gain the maximum benefit from the technique.<br>I. D. Bardrick, Powerstream Engineering Ltd. , U. K.  | H7-85       |
| J1           | Jet assisted tunnelling in coal-measure strata.<br>J. Henneke and L. Baumann, Bergbau-Forschung GmbH, Federal Republic of Germany.  | J1-1        |

| <b>Paper</b> |  | <b>Page</b> |
|--------------|--|-------------|
| J2           | Surface trials of the Hydrominer.<br>D.A.Summers and C.R.Barker, University of Missouri-Rolla, U.S.A.  | J2-13       |
| J3           | Some experience in developing mining roadways using the experimental heading machine with pulsed water jets.<br>A.I.Petrakov and O.D.Krivorotko, Ministry of Coal Industry, U.S.S.R. | J3-25       |
| J4           | Investigation of the interaction between high-speed water jet and cutter during breakage of a rock mass.<br>I.A.Kuzmich and M.A.Ruthberg, Ministry of Coal Industry, U.S.S.R.        | J4-39       |
