

## CONTENTS

Foreword	v
The influence of the level quantization on the lifetime of metastable states <i>A.I.Larkin, Yu. N. Ovchinnikov</i>	1
Effect of damping on the metastable states in hysteretic Josephson junctions <i>R.Cristiano, S. Pagano and P. Silvestrini</i>	14
Decay of metastable states in the presence of close underbarrier trajectories <i>B.I. Ivlev, Yu. N. Ovchinnikov</i>	25
A simple approach to quantum fluctuations in dissipative systems <i>A. Ranfagni, D. Mugnai, P. Moretti</i>	48
Quantum dynamics of small Josephson Junctions <i>S.V. Panyukov and A.D. Zaikin</i>	59
Model for single electron tunneling (SET) in normal junctions of very small capacitance <i>P. Apell, A. Tagliacozzo and F. Ventriglia</i>	67
D.C. Quantum interference in mesoscopic structures <i>E.N. Bogachek and I.O. Kulik</i>	80
Quantum fluctuations and dissipation in ultra-thin superconducting films <i>H.M. Jaeger, D.B. Haviland, A.M. Goldman and B.G. Orr</i>	96
Effect of disorder on dissipative phase transition in granular superconductors <i>S.V. Panyukov and A.D. Zaikin</i>	109

Investigation of low frequency excess noise in Nb-Al <sub>2</sub> O <sub>3</sub> -Nb Josephson tunnel junctions <i>B. Savo, F.C. Wellstood and J. Clarke</i>	115
Stationary and nonstationary phenomena in super- conducting and low-dimensional systems <i>A.F. Volkov</i>	129
RF Induced steps in long Josephson junctions <i>G. Costabile, R. Monaco and S. Pagano</i>	142
Current-voltage characteristics of RF driven DC SQUIDS <i>C. Vanneste and C.C. Chi</i>	158
Arrays of self-resonant Josephson tunnel junctions <i>M. Cirillo and S. Pagano</i>	168
SQUID in scientific research in USSR at the Institute for Physical problems <i>N.V. Zavaritsky</i>	175
Use of SQUIDS for the measurements of brain magnetic fields: a unique tool for functional imaging <i>L. Narici and G.L. Romani</i>	193
Recent developments in biomagnetic studies of the heart physiology using SQUID based instrumentation <i>R.S. Gonnelli</i>	204
Planar interferometers with anodic oxide window junctions <i>C. Camerlingo, M. Russo and G. Paternò</i>	216
Arrays of long Josephson junctions suitable for reference voltage <i>V. Lacquaniti, D. Andreone, G. Costabile, R. Monaco and S. Pagano</i>	227

Intrinsic resolution of superconducting tunnel junctions used as ionizing particle detectors	236
<i>S. Pace, F. Celani, A. Giorgi, A. Saggese and S. Pagano</i>	
The gyromagnetic electron gyroscope: Theory and Experiments	250
<i>M. Cerdonio, M. Bonaldi, P. Falferi, G.A. Prodi and S. Vitale</i>	
Preparation and Properties of Nb <sub>3</sub> Si and Nb <sub>3</sub> Si <sub>1-x</sub> Al <sub>x</sub> Superconducting thin films	267
<i>A. Di Chiara, G. Peluso and U. Scotti di Uccio</i>	
Applications of superconducting (NbTi) N films	275
<i>R. Di Leo, G. Nobile, V. Palmieri, R. Vaglio, F.C. Maticotta, G. Turisini and E. Olzi</i>	
Superconducting properties of Mo-Ta superlattices	283
<i>A.M. Cucolo, L. Maritato, R. Vaglio and C.M. Falco</i>	
Ion implanted Josephson structures	293
<i>C. Camerlingo, M. Cerdonio, C. Tosello, S. Vitale, G. Jung and P. Gierlowski</i>	
Effect of heat, acoustical and nonequilibrium quasi-particle flows on Josephson SNS junctions	305
<i>V.K. Kaplunenko, G.Yu. Logvenov, V.V. Ryazanov and V.V. Schmidt</i>	
Point-contact spectroscopy of nonequilibrium phonons and electron-phonon interaction in superconductors	321
<i>I.O. Kulik, A.N. Omel'yanchuk and S.I. Beloborod'ko</i>	
Superconductive analogue of spin glasses	340
<i>M. Feigel'man, L. Ioffe, A. Larkin and V. Vinokur</i>	
Ultra-high-T <sub>c</sub> superconductors	360
<i>A. M. Goldman</i>	

Comments to the study of high temperature superconductors <i>N. V. Zavaritsky</i>	378
Fractal dynamics and high temperature superconductivity in inhomogeneous oxide ceramics <i>M.P. Fontana and D. Cassi</i>	384
Critical current evaluation by magnetization of $\text{YBa}_2\text{Cu}_3\text{O}_{9-\delta}$ at 4.2K <i>V. Ottoboni, A. Ricca, G. Ripamonti and S. Zannella</i>	389
Production and characterization of high $T_c$ superconductors <i>F.C. Maticotta, E. Olzi, E. Signorelli and R. Masini</i>	394
Fabrication of sintered single-phase Y-Ba-Cu-O pellets with superconductive transition temperature at 92 K <i>G. Balestrino, S. Barbanera and G. Paternò</i>	401
