## Contents

1. Introduction. By H. Beck and HJ. Güntherodt (With 4 Figures) .	. 1
1.1 Introductory Remarks	. 1
1.1.1 Preparation	. 1
a) Splat Cooling	. 2
b) Melt Spinning	. 2
1.1.2 Characterization	. 3
1.2 Experiments	. 4
1.2.1 Static Structure	. 4
1.2.2 Ionic Dynamics	. 5
1.2.3 Electronic Structure and Transport	. 7
1.2.4 Magnetic and Mechanical Properties	. 8
1.3 Theoretical Approaches	. 9
1.3.1 Electronic Properties	. 10
1.3.2 Ionic Properties	. 12
1.4 Special Features	. 15
1.4.1 Applications $\ldots$ $\ldots$ $\ldots$ $\ldots$ $\ldots$	. 15
1.4.2 Cross Disciplinary Relations	. 16
References	. 16
Bibliography	. 17
2. Metallic Glasses – Historical Background	
By P. Duwez (With 1 Figure)	. 19
References	. 23
3. Structural Study by Energy Dispersive X-Ray Diffraction	
By T. Egami (With 12 Figures).	. 25
3.1 Principles	. 26
3.2 Equipment	. 27
3.2.1 System Design	. 27
3.2.2 X-Ray Source	. 27
3.2.3 Optical System	. 28
3.2.4 Detector System	. 29
3.3 Data Reduction	. 30
3.3.1 Theory	. 30
3.3.2 Determination of the Parameters	. 32
3.3.3 Structural Determination	. 34

3.4	Results of Structure Study	35
	3.4.1 Structural Relaxation Observed by EDXD	35
	3.4.2 Kinetics of Structural Relaxation	39
	3.4.3 Structural Defects and Physical Properties.	41
3.5	Further Applications	43
Refere	ences	43
4. EX	AFS Studies of Metallic Glasses. By J. Wong (With 19 Figures) .	45
4.1	Background	45
4.2	EXAFS Fundamentals	49
	4.2.1 The Physical Mechanism	49
	4.2.2 The Single Scattering Approximation	51
	4.2.3 Synchrotron Radiation as Light Source for EXAFS	
	Experiments	53
	4.2.4 Data Analysis	55
	425 Unique Features of EXAFS	58
43	Metallic Glasses	60
т.5	A 2.1 Structure of Metallic Glasses A Brief Survey	60
	4.5.1 Structure of Metallic Olasses – A blief Survey,	62
	4.3.2 EAAFS Results	05
		64
	b) Metalloid Environment	68
	c) Metal Environment	71
4.4	Concluding Remarks	73
Refere	ences	75
5. Bri	llouin Light Scattering from Metallic Glasses	
Bv	A.P. Malozemoff (With 5 Figures)	79
51	Overview	70
5.1	Experimental Pecults and Discussion	87
5.2	5.2.1 Surface Dhonons	02
	5.2.1 Sufface Honors,	02
	5.2.2 Bulk and Surface Magnons: Inick Materials.	85
	5.2.3 Bulk and Surface Magnons: Thin Films	87
5.3		88
Refere	ences	90
Notes	Added in Proof	91
6 Th	acry of the Structure Stability and Dynamics of Simple Matel	
	uses By I Hafner (With 22 Figures)	03
6.1	Deckground	03
6.1	Interactions in Dinary Alloys	95
0.2	(2.1. Deve de retentiele fen Dineme Genteme	90
	6.2.1 Pseudopotentials for Binary Systems	99
	6.2.2 Effective Pair Potentials	100
