<i>Preface</i>	v
<i>Introduction</i>	ix
M. VAN DE VOORDE (<i>Division Head, High Temperature Materials Programme, Joint Research Centre, Petten Establishment, 1755 ZG Petten, The Netherlands</i>)	
1 Techniques for Bulk Chemical Analysis, Part 1: Trace Analysis of Refractory Metals	1
H. M. ORTNER (<i>Metallwerk Plansee GmbH, A-6600 Reutte, Tirol, Austria</i>)	
2 Techniques for Bulk Chemical Analysis, Part 2: Atomic Spectroscopy Techniques	43
F. ADAMS (<i>Department of Chemistry, University of Antwerp, B-2610 Wilrijk, Belgium</i>)	
3 Electron Microprobe Analysis	91
S. J. B. REED (<i>Department of Earth Sciences, University of Cambridge, Downing Street, Cambridge CB2 3EQ, UK</i>)	
4 Secondary Ion Mass Spectrometry	129
S. J. B. REED (<i>Department of Earth Sciences, University of Cambridge, Downing Street, Cambridge CB2 3EQ, UK</i>)	

5	Electron Spectroscopy Methods.	141
	J. E. CASTLE (<i>Department of Metallurgy and Materials Technology, University of Surrey, Guildford GU2 5XH, Surrey, UK</i>)	
6	X-Ray Diffraction	189
	E. ERDÖS (<i>Sulzer Bros Ltd, CH-8401 Winterthur, Switzerland</i>)	
7	Chemical and Crystallographic Analysis in the Transmission Electron Microscope	221
	J. VAN LANDUYT (<i>Rijksuniversitair Centrum (RUCA), Groenenborgerlaan 171, B-2020 Antwerp, Belgium</i>)	
	<i>Index</i>	255
