

CONTENTS

Preface to the series.....	vii
Introduction.....	ix
Contents	xiii
<i>Chapter 1. General properties of carbon materials</i>	<i>1</i>
<i>Chapter 2. Crystal lattice of graphite and synthetic carbons</i>	<i>3</i>
2.1. Chemical bonding in the carbon lattice	3
2.2. General remarks on the crystal structure of carbon materials	6
2.3. Perfect graphite lattice	7
2.3.1. A single graphite layer	7
2.3.2. Three-dimensional graphite lattices.....	8
2.4. Defects in real graphite lattices.....	11
2.4.1. Stacking faults.....	11
2.4.2. Defects of carbon-atom bonding in a layer.....	12
2.4.3. Foreign atoms.....	12
<i>Chapter 3. Mechanical properties of graphite and carbon materials</i>	<i>15</i>
3.1. General remarks on the elastic parameters of crystals with hexagonal symmetry..	15
3.2. Models of interaction between atoms in a graphite crystal	18
3.3. Elastic moduli and force constants for the various kinds of graphite.....	21
<i>Chapter 4. The energy spectrum of electrons and holes in graphite</i>	<i>29</i>
4.1. The energy spectrum of electrons in a single graphite layer	29
4.2. The electron energy spectrum of three-dimensional graphite. The Slonzewski–Weiss–McClure model	35

4.3.	The four-parameter model of the electron energy spectrum of three-dimensional graphite	42
4.4.	Trigonal warping of the Fermi surface. Minority carriers in graphite	46
4.5.	The electron energy spectrum of graphite in a quantizing magnetic field	50
4.6.	Location of the Fermi level in graphite	60
4.7.	The parameters of the Slonzewski–Weiss–McClure model	67
4.8.	The electron energy spectrum of pyrocarbon materials	69
 <i>Chapter 5. Galvanomagnetic effects in graphite and carbon materials ..</i>		 73
5.1.	Electrical conductivity of graphite	73
5.2.	Galvanomagnetic effects in graphite in weak and semiclassical magnetic fields	77
5.3.	Mechanisms of carrier relaxation in graphite	88
5.4.	Galvanomagnetic effects in graphite in high quantizing magnetic fields and in the extreme quantum limit of fields	91
5.4.1.	Magnetic freezing-out of impurity carriers in graphite	93
5.4.2.	Magnetically induced transitions of graphite to the charge density wave (CDW) state	101
5.5.	Peculiarities of galvanomagnetic effects in carbon materials	104
 <i>Chapter 6. Quantum oscillation effects</i>		 109
6.1.	General remarks on quantum oscillation effects	109
6.2.	Oscillation effects in monocrystalline graphite	109
6.3.	Parameters of the electron energy spectrum of graphite obtained from oscillation measurements	122
 <i>Chapter 7. Optical and magneto-optical effects</i>		 129
7.1.	Optical properties of graphite	129
7.2.	Some remarks on magneto-optical phenomena in graphite	135
7.3.	Cyclotron resonance in graphite	137
7.4.	Magnetoreflexion in graphite	146
 <i>Chapter 8. The effects of hydrostatic pressure on the electronic properties and energy spectrum of graphite and pyrocarbon materials</i>		 151
8.1.	Optical properties of graphite under pressure	152
8.2.	Magneto-optical measurements in graphite under pressure	157
8.3.	Galvanomagnetic measurements in graphite and pyrocarbon materials under pressure	158

8.4.	Oscillation effects in graphite under pressure.....	161
8.5.	Transformation of the energy spectrum of graphite under pressure.....	167
<i>Chapter 9. Magnetic susceptibility of graphite and carbon materials ...</i>		175
9.1.	Magnetic properties of single-crystal and pyrolytic graphite in weak and quantizing magnetic fields	175
9.2.	Magnetic properties of graphite in the extreme quantum region of magnetic fields	183
9.2.1.	Magnetic susceptibility of graphite in EQL magnetic fields.....	185
9.2.2.	The relation between the field dependence of the magnetic susceptibility of graphite and the phenomenon of magnetic freeze-out	188
9.3.	Diamagnetism of quasi-two-dimensional graphite	190
9.4.	Magnetic properties of carbon materials	193
<i>Chapter 10. Graphite intercalation compounds (GIC).....</i>		197
10.1.	Concepts and properties.....	197
10.2.	Mechanisms of formation of a periodic structure in GIC	200
10.3.	Synthesis of GIC.....	204
10.4.	Structure of GIC.....	208
10.5.	Phase transitions in GIC.....	216
10.5.1.	Transitions accompanied by a change in stage index, i.e., transitions of the form $n \rightleftharpoons n - 1$	216
10.5.2.	Transitions accompanied by a change in the order of succession of the intercalate layer (intercalate layer stacking).....	216
10.5.3.	Structural transitions associated with a change in the ordering of atoms or molecules in the intercalate layer (from commensurate to incommensurate relative to the graphite-layer structure)	216
10.5.4.	Transitions to the superconducting state	218
10.5.5.	Transitions accompanied by magnetic ordering.....	218
10.6.	The energy spectrum of electrons and holes in GIC.....	219
10.6.1.	Peculiarities of the energy spectrum of carriers in GIC.....	219
10.6.2.	Models of the carrier energy spectrum in GIC of low stage indices in the tight-binding approximation.....	226
10.6.2.1.	A TBA model for the spectrum of GIC with stage index one..	227
10.6.2.2.	A TBA model for the spectrum of GIC with $n = 2$	228
10.6.2.3.	A TBA model for the spectrum of GIC with $n = 3$	230
10.6.3.	The calculation of the energy spectrum of GIC of low stage indices from first principles	232
10.6.4.	The rigid-band model for GIC with high n	235
10.7.	Electrical conductivity of GIC.....	241
10.7.1.	Peculiarities of the electrical conductivity in GIC	241
10.7.2.	Electrical conductivity of GIC in the basal plane.....	245

10.7.3.	Electrical conductivity of GIC along the c -axis.....	250
10.7.4.	Temperature dependence of the conductivities σ_a and σ_c in GIC.....	251
10.8.	Galvanomagnetic effects in GIC.....	255
10.9.	Oscillation effects in GIC.....	260
10.9.1.	General remarks on oscillation phenomena in GIC.....	260
10.9.2.	Fermi-surface structure in GIC.....	263
10.9.3.	Angular dependences of quantum oscillations in GIC.....	270
10.9.4.	Trigonal warping of the Fermi surface and magnetic breakdown oscillations in GIC.....	273
10.10.	Magneto-optical effects in GIC.....	280
10.10.1.	General remarks.....	280
10.10.2.	Magneto-optical spectra in GIC with high n	281
10.10.3.	Peculiarities of magneto-optical effects in GIC.....	284
10.11.	The effect of pressure on the structure and energy spectrum of GIC.....	289
10.11.1.	General remarks.....	289
10.11.2.	The effect of pressure on the energy spectrum of GIC with IC1 and CuCl ₂ for $n = 2$	290
10.11.3.	Pressure-induced staging transitions.....	294
10.12.	Magnetic properties of GIC.....	299
10.12.1.	GIC without magnetic ions.....	299
10.12.2.	GIC containing magnetic ions (magnetic GIC).....	303
10.12.2.1.	Paramagnetic spin-glass transitions.....	304
10.12.2.2.	Transitions leading to magnetic ordering in the intercalate layer.....	305
10.12.2.3.	Transitions to phases with imperfect magnetic ordering.....	307
10.13.	Superconductivity in GIC.....	309
10.13.1.	General remarks.....	309
10.13.2.	Classification of superconducting GIC.....	310
10.13.3.	Peculiarities in the superconduction properties of GIC.....	311
10.13.4.	The nature of superconductivity in GIC.....	314
10.13.5.	The effect of pressure on the superconduction properties of GIC.....	317
 <i>Chapter 11. Lattice vibrations and the phonon spectrum of graphite and graphite-based compounds</i>		 322
11.1.	Models of the vibrational spectrum of graphite.....	322
11.1.1.	Vibrational spectrum of the graphite lattice in models with four force constants.....	324
11.1.2.	The axial-symmetric (AS) model of the vibrational spectrum of graphite.....	339
11.1.3.	Graphite-lattice vibrations of small wave vectors (near the Γ -point – the Brillouin-zone centre).....	345
11.2.	Experimental investigation of the phonon spectrum of graphite.....	350
11.2.1.	Inelastic coherent scattering of slow neutrons in graphite.....	350
11.2.2.	Raman scattering and infrared reflectance studies on the lattice dynamics of graphite.....	355

11.3. Phonon spectra of GIC	363
11.3.1. The intercalation-induced change in the vibrational modes of pure graphite	365
11.3.2. Vibrational modes in the phonon spectrum of GIC due to the intercalate layers.....	377
11.3.3. Strongly coupled phonon modes – mixed phonon modes	385
11.3.4. Zone-folding effect in GIC.....	390
11.3.5. Changes in intercalate-layer structure and degree of ordering with temperature.....	394
11.4. Heat capacity of graphite and its intercalation compounds.....	396
11.4.1. Lattice heat capacity of graphite	397
11.4.2. Heat capacity of GIC	402
 <i>Chapter 12. Unsolved problems and applications.....</i>	 410
12.1. Research prospects for graphite, pyrocarbons, and GIC.....	410
12.1.1. Mechanical properties, lattice.....	410
12.1.2. Electron and hole energy spectra in graphite.....	410
12.1.3. Transport phenomena in graphite	412
12.1.4. The energy spectrum of carriers and the magnetic properties of pyrocarbon materials.....	412
12.1.5. Transport properties of pyrocarbons	412
12.1.6. The energy spectrum of GIC	413
12.1.7. Supermetallic conductivity of GIC.....	414
12.1.8. Superconductivity of GIC	414
12.2. Technological applications of graphite, pyrocarbons and GIC	415
12.2.1. Graphite and pyrocarbon materials	415
12.2.2. Graphite intercalation compounds – novel applications	416
12.2.3. Technological and industrial uses of GIC	416
12.2.3.1. GIC as battery and electrode materials	416
12.2.3.2. GIC as high-conductivity materials	418
12.2.3.3. Graphite fibres used to produce composite materials	419
12.2.3.4. Applications in chemical catalysis.....	420
12.3. Graphite and carbon materials in atomic technology.....	420
12.3.1. Properties of carbons used in building nuclear reactors	421
12.3.1.1. Neutron moderating and absorbing power.....	422
12.3.1.2. Heat resistance and strength properties at high temperature...	423
12.3.1.3. Low penetrability	424
12.3.1.4. Chemical reactivity.....	426
12.3.2. Methods of reactor graphite production.....	429
12.3.2.1. Heat treatment and graphitization	429
12.3.2.2. Elimination of impurities.....	430
12.3.3. Radiation damage.....	433
12.3.3.1. Change in the crystal-lattice parameters of graphite	433

12.3.3.2. Defect formation.....	435
12.3.3.3. Changes in size stability and porosity.....	438
12.3.3.4. Changes in thermal and electronic properties.....	441
Proceedings of Conferences on GIC.....	447
References.....	449
Author index.....	467
Subject index.....	483
Cumulative index.....	489
